"And, more than that, we have witnessed certain attempts to return to the state of things. Nobody could be mistaken about the real bearing of what was called the Kapp putsch. We know very well that if it had succeeded Germany would have returned to her prewar state. And we do not know what might have happened, or rather we know too well what would have been the consequences of such a state of things.

"Gentlemen, a volume has been published by no less a man than Field Marshal Ludendorff, who still enjoys great authority in many German circles, and who is followed by a great part of the elite in Germany, professors, philosophers, writers, etc.

"What do we read in this book? Gentlemen, I should not like to make too many quotations. I should not like to prolong this speech and perhaps draw too much of your attention, but this is part of my brief, and if you are, like me, convinced that the moral element is of the utmost importance, you will allow me to read just two or three passages. This is the first quotation:

"'It is necessary that we should learn to understand that we live in a warlike time, that struggle will remain forever for the single individual as for the state, a natural phenomenon, and that the struggle is equally on the divine order of the world.'

"In the same book Marshal Ludendorff produces these terrible words of Moltke on the 11th of December, 1910:

"'Eternal peace is a dream. It is not even a beautiful dream, and war is one of the parts of the order of the world, such as it has been created by God. It is by war that are developed the noblest virtues of man, courage, disinterestedness, devotion to duty and spirit of sacrifice, up to the abandonment of one's own life. Without war the world would slink in the morass of materialism.'

"And further—this is Marshal Ludendorff himself speaking now:

"'It is for the political education of the German people, and it is an indispensable notion with the knowledge of this fact, that in the future war will be the last and the only decisive means of policy; that thought, completed by the virile life of war, the entente shall not be able to forbid the German people to entertain, though they are trying to take it away from us. War is the corner stone of all intelligent policy. It is the corner stone of every form of future even, and chiefly of the future of the German people.'

"And, lastly, Marshal Ludendorff says this:

"'The warlike qualities of the Prussian and German army have been put to the proof on the bloody battle fields. The German people

need no other qualities for their moral renovation. The spirit of the former army must be the germ which will allow this renovation to take place.'

"Such, gentlemen, are the words used by the highest German authorities who have preserved, and I can quite understand it, the full part, the great part at least, of the confidence of the German people. After a war that has caused the death of millions of men, after the sore wounds that have been inflicted and that are still bleeding in the sides of the countries of Europe, that is the sort of thing that is being taught at the very door of France. How can you expect that France should close her eyes to such words?

Physical Aspects of Disarmament.

"I now come to the physical aspects of disarmament. I can quite understand that somebody might say it is not sufficient to harbor evil designs; to make war one must have appropriate means, because when it is a question of war enormous effectives are necessary; you must have the officers and noncommissioned officers; you must have plentiful material—rifles, guns, machine guns, artillery, etc.—and Germany no longer has any of these.

"Germany, from the point of view of effectives, just emerging from the war, from a war where her men have been fighting for four years—and I should be the last to underestimate the valor of her soldiers—our soldiers have had to face and to fight the German soldiers, and they know to what point the German soldier is able to carry his heroism; but Germany, just issued from the war, still has 7,000,000 men over there in Germany who have made the war. Of course, you will say they are not actually serving under the flag; they are not living in barracks, certainly. Have these men any officers and noncommissioned officers ready to be marshaled to the field? Is it possible to mobilize such an army tomorrow?

"To this question I answer yes, and I am going to explain it. Since the war, since the moment peace was signed, Germany has constituted a force, a so-called police force, which was intended for the maintenance of public order. That force is called the reichswehr. It is to include 100,000 men, and, in fact, does include 100,000 men. But what men? They are nearly all officers or noncommissioned officers. I mean, gentlemen, regulars, all having served in or having belonged to the old army. Therefore, the cadres are ready there, the officers and noncommissioned officers are ready to marshal the army of to-morrow.

"And what is that army? Is it in conformity with the requirements of the peace treaty? Is it only for purposes of public order? No. There are a certain number of those on which I have to express the state of facts as they are.

"According to secret instructions issued by the military authorities the reichswehr is to prepare not only for police purposes but also for war, and is to train for war, with the necessary rehearsals and maneuvers.

"There is something more. Germany has another denomination—there is another group called einwohnerwehr. This group includes almost all the men of good will who are ready to serve their country in time of need, and instead of using it only to preserve internal order it might be used for other purposes.

"The danger was so real that the allies were obliged to send an ultimatum to Germany to demand this force should be disarmed.

"At another moment, under an organization called the orgesch, which is the organization of war, the einwohnerwehr acquired such strength and became such a threat that the prime minister of Bavaria, animated by a spirit of revolt, informed the world that he had at his disposal and he could raise in a short time an army of 300,000, plentifully provided with rifles, machine guns and artillery.

"Well, that force has been disorganized. The German government has done its duty, and nobody more than myself is ready to recognize it.

"I am ready to recognize that the German chancellor, Chancellor Wirth, is a man of good will, animated by fair purposes, loyal and frank, and that he has applied every endeavor to realize a state of peace and to honor the signature of Germany.

"But this government in Germany is weak. It is being watched. Snares are laid in their path and they might fall at any moment. While I may say on our side we are ready to do everything in order to allow this great people to return to normal conditions of peace, and the German government, as I said, dissolves the einwohnerwehr there is something else, gentlemen. There is another force, which is called the sicherheitspolizei. That is also a police force. It includes 150,000 men. These are enlisted men. The force is composed almost exclusively of regulars, officers and noncommissioned officers, or at least noncommissioned officers, ready to undergo a new period of military service.

"We demanded the dissolution of this force, but what happened? The sicherheitspolizei disappeared, but another came in its place—schutzpolizei, but it was just the same. That included 150,000 men. So that instead of its being a local police force it became a general police force at the disposal of the central government, that could be used anywhere on German territory; so that we come to a total of 250,000 men, and enough men that are real officers, ready to marshal the troops who are training, to be ready instantly in case of war.

"The government keeps them under their hands. These 7,000,000 men have not returned to civil life, to civil occupations, entirely. They are grouped together, in this marvelously ingenious way which the German people always have when they want to achieve their purposes. They are called frei corps, or former combatants' associations, and what not. Any day, any anniversary—and Germans are rather fond of anniversaries—is favorable in order to convene these men and marshal them to see that you have got them under your hand, ready to do the work that is to be done.

"We are Frenchmen. We know what is happening at our door. And I will only give you an example to show you how rapidly these organizations might be put on a war footing. Just one second. When the Upper Silesian question reached a somewhat acute stage recently, within a few weeks, I might almost say within a few days, there were, out of these frei corps or other bodies, about 40,000 men ready with guns, machine guns, rifles, armored trains, and with most perfect military instruments, so that this force should have its full combatant value.

"These are facts, gentlemen, that everybody can ascertain for himself.

"Therefore, as a question of fact and from the point of view of effectives, Germany can rise in a few weeks, and perhaps almost in a few days, and can begin to raise her 6,000,000 or 7,000,000 men with their officers again, and the noncommissioned officers are ready to do the work and to help them do the work.

"Now, I must ask the great people of the United States, so fond of justice, so noble in their purposes, to answer me when I ask them this:

"Suppose that by your side, O American

people, a nation, a nation which has been for years and centuries in bloody conflict with you: and suppose that this nation, you feel, is still ready, morally and materially, to enter into a new struggle. What would you do? Would you turn away your eyes? Would you close your eyes to a danger that was threatening you? You that are said to be such a positive, such a precise people, would you close your eyes? Would you not desire to do everything in your power in order to safeguard your life and, what is more, your honor? Would you do anything to weaken yourselves? No. There is not one citizen in the whole United States who would not answer me, 'No. Never in the world!'

"France is looking upon what is happening. France does not exaggerate. She is only watching and waiting.

Has War Material.

"What is Germany but a vast country of industry—industrially organized? Germany always had two aims. The first was trade, commerce. And that is only natural. The second was war. All her industries, all her manufactories have been working to the full during the war and they have developed since.

"Everything is ready in Germany, the plans, the designs and calibers. Everything is there ready to insure a steady manufacturing of guns, machine guns and rifles. Suppose that during a period of diplomatic tension, purposely protracted for a number of weeks, certain of the manufacturers, certain of the works, begin to fabricate, just at the beginning, just to start the war, just to set the war going, and then go on manufacturing guns and rifles and artillery; what would happen?

"It is not only in Germany that industry can work to the full. You can make preparations outside. In fact, preparations have actually taken place. In fact, great captains of industry or great industrial magnates have bought important firms in Scandinavia and in other parts of Europe.

"It is easy enough to fabricate these guns without our seeing it, outside of our supervision. You know very well that it is possible to build great railroads. You know very well that it is impossible to bring here the proof that Germany is not actually making or purchasing war materials. It is different from the navy. It is rather difficult to lay the keel of the ship in the stocks, to prepare the dockyards without the world knowing it. But suppose that was possible, do you think you could launch a capital ship without somebody being on the spot and knowing what was happening? But the guns, and the rifles, the machine guns—many instruments used on the field of battle—they can be manufactured and cannot be controlled with any measure of certainty.

"Ah, gentlemen, this is not the first time in history that France has had to face a situation of this kind. We have known Prussia disarmed. And disarmed by whom? By Napoleon. Well, that Prussia, which seemed practically disarmed, which was harmless to all intents and purposes, we found her again on the battle field and we were nearly bled white. How can we forget that?

Danger from Russia.

"I will just draw your attention to one subject to which I may refer later on, and that is the subject of Russia. Russia is a country of 120,000,000 men, which is actually boiling over with anarchy. They have an enormous standing army, which is in theory a million and half men, but which has a practical strength of 600,000 men.

"What will Russia do? Who can say what will happen on that side? About a year and a half ago there was a wild rush of Russia on Europe. Russia tried to rush Poland and, through Poland, to reach Germany, where some people were beckoning to them. Gentlemen, we had at that time known terribly anxious hours in France. If the barrier had not held good, if that anarchic army had been able to join the people who were calling them on the other side, what would have happened? Where would France be and where would the rest of Europe be? Happily there was the French army, which was the soldier of order for its own account and for the sake of the world.

"The situation in Russia is far from being settled. It is a source of permanent anxiety to everybody. What will become of its enormous army? What could or might Germany do in order to equip Russia and exploit her? We know not.

"When we say we contemplate a reduction of naval armaments, when we discuss it with ourselves, heart to heart, we could have nothing in our minds—we were speaking between friends. There is no threat of war; if there is any menace to peace it is so far distant that you can hardly conceive it, and yet you have not assumed the rights of ignoring this danger altogether. You intend to keep your navies to the extent necessary to defend your liberties and insure your life.

"While, if you do that, gentlemen, on the sea, what shall we do when the danger is there at our doors and hanging over our heads?

"Only the other day the course of events turned in such a way that it certainly became acute, as you know, in Upper Silesia. Germany, which did not think that the French people were ready to undertake a military operation, suddenly informed us that she was going to send the reichswehr on the spot in Upper Silesia in order to preserve order.

"These were momentous times for us, and although I have been through many critical times in my life I may say that no hour was perhaps of more importance than that, and I clearly and definitely made up my mind, and I told Germany that such a thing was not possible, and that if Germany undertook a thing of that sort she would have to bear the consequences, and the language was understood.

"But, gentlemen, if I had spoken without having the French army back of me, what would my words have become? And if the event had actually taken place, what would have become of Europe itself? Europe is still in a troublous state. It is composed of young states, newly come to life. Who could say what such conflict might have become?

"That is the problem, and that was the problem, and the struggle did not take place, because it was felt that there was still a sufficient force in Europe and in France to preserve order.

"Gentlemen, I give you these reflections for you to ponder over. You will see that there is nothing in that that would draw us aside from the path that leads to final peace.

"The thought of reducing the armaments, which was the noble purpose of this conference, is not one from which we would feel disinterested from the point of view of land armaments. We have shown it already—immediately after the armistice demobilization began, and demobilization began as rapidly and as completely as possible.

"According to the military laws of France there are three classes of men—that is, three generations of young men under the flag. That law is still extant; that law is still valid. It has not been abrogated yet, and the government has taken the responsibility to reduce to two years the time spent under other flags,

and instead of three classes—three generations of young men—we have only two undergoing military service.

"It is, therefore, an immediate reduction by one-third that has already taken place in the effectives—and I am speaking of the normal effectives of the metropolis, leaving aside troops needed for colonial occupation or obligation imposed by treaty in Rhineland or other countries or plebiscites.

"We do not think that endeavor was sufficient, and in the future we have plans in order to further restrict the extent of our armies. In a few days it is certain that the proposals of the government will be passed in the chamber in order to further reduce the military service by half. That is to say, there will be only one class and a half actually serving. The metropolitan French army would be, therefore, reduced by half, but if anybody asks us to go further, to consent to other reductions, I should have to answer clearly and definitely that it would be impossible for us to do it without exposing ourselves to a most serious danger.

"You might possibly come and tell us: 'This danger that you are exposed to—we see it, we realize it, and we are going to share it with you. We are going to offer you all means—put all means at your disposal—in order to secure your safety.'

"Immediately, if we heard those words, of course, we would strike upon another plan. We should be only too pleased to demonstrate the sincerity of our purpose. But we understand the difficulties and the necessities of the statesmen of other countries. We understand the position of other peoples who have also to face difficult and troublous situations.

"We are not selfish enough to ask other people to give a part of their sovereign national independence in order to turn it to our benefit and come to our help. We do not expect it, but here I am appealing to your consciences. If France is to remain alone, facing the situation such as I have described, and without any exaggeration, you must not deny her what she wants in order to insure her security. You must let her do what she has to do if need arise and if the time comes.

"I should be the last one here to try to restrict the noble endeavors which are being made here in order to limit armament, as in the conference which has been convened with such noble purposes in view; and I should like to be able to say that I foresee no limit, no restriction to your labors and to the results which you may achieve. Any question here can be debated and can be resolved upon, but I must draw your attention to one thing—moral disarmament of France would be very dangerous.

"Allow me to say it would be most unjust. We do not enjoy the sufficient condition. We should be ready to do it, but the time has not come yet to give up our defense for the sake of final peace in Europe. We have to know, however, that France is not morally isolated; that she still has with her the men of good will and the hearts of all people who have fought with her on the same battle field.

"The true condition of a moral disarmament in Germany—I am referring to these noxious elements of which I have already spoken—the true condition at this time of disarmament in Germany lies in the fact that it should be known over there that France is not alone, and then I feel quite sure that the poisonous propaganda of which I have spoken will simply run up dead against the wall; that it will not be able to go through, and that nobody anywhere will believe in it.

"If those that still harbor evil designs know that, and if those that entertain happy ideas of peace—this working class that wants to return to a normal state of peace—if it is known in Germany that France is not morally alone, peace will come back much quicker, and the words of anger, the words of revenge, will be simply preached in the wilderness.

"It will then be impossible for Germany to reconstruct a defensive army and she will be able to install democratic institutions, and then we can all hope for final conditions of peace. Everything that France can do in this direction she will do. In fact, she has already done much. She did not hesitate to open conversations with the German government in order to settle this painful question of reparation for the devastated regions. Everything has been done and will be done in order to restore normal conditions, and the hour will come when everything will be settled, but the hour has not come yet.

"If by direction given to the labors of the conference it were possible somewhere over there in Europe—if it were possible to say that the outcome of this conference is indirect blame and opprobrium cast upon France—if it were possible to point out France as the only country in the world that is still imperialistic, as the only country that opposes final disarmament, then, gentlemen, indeed this conference would have dealt us a severe blow; but I am quite sure that nothing is further from your minds and from your intentions.

"If, after listening to this argument, after weighing the reasons which you have just heard, you consider it then as valid, then, gentlemen, you will still be with us and you will agree with me and say that France cannot possibly do anything but what she has actually done."

BRITISH PLEDGE RENEWED.

When Premier Briand closed his address Arthur J. Balfour, speaking for the British empire, said:

"Mr. Chairman, evidently this is not a fitting moment to deal at length or in detail with the great speech which has just come to its conclusion. It has been your privilege and my privilege to hear one of the great masters of parliamentary oratory.

"He has told us, I believe without reserve, what are the anxieties, what are the preoccupations, of the country over whose destinies he presides. He has told us what they fear and why.

"It must be acknowledged, sorrowfully acknowledged, that the speech to which we have just listened is not hopeful for any immediate solution of the great problems of land armament. And why is it—why is it that there is this great difference between land armaments and sea armaments?

"It is because, as M. Briand has explained to you, in that case there has not been moral disarmament, because we have no assurance, or because the French government, who watch these things closely, have no assurance either in Russia or in Germany, that moral disarmament has made the progress which would make material disarmament an immediate possibility.

"I do not venture to offer an opinion of my own upon this question. Only this I would say—M. Briand appears to fear lest France should feel herself in moral isolation. That would be a tragedy indeed. That the liberties of Europe and the world in general and of France in particular should be maintained and guarded against the dominating policy of her eastern neighbor is the cause for which the British empire fought and in which it still believes.

"Killed on the field of battle, we lost nearly a million men. I am talking of the British empire now. We lost well over 2,000,000 men in addition maimed and wounded.

"We grieve over the sacrifice; we do not

repent it. And if the cause of international liberty was worthy of this immense sacrifice, and if we, at all events, have not changed our views, either as to the righteousness of the war or as to its necessity, how can it be otherwise than if again the lust of domination should threaten peace, how should it be possible that we who had done so much for the great cause of international liberty should see that cause perish before our eyes rather than make further sacrifices in its defense?"

ITALY FOR PEACE.

"Gentlemen, I am going to use the French language because I wish that the thought of the Italian delegation should arrive direct, and without the short delay of translation, direct to the French delegation across the table," said Senator Schanzer.

"It is far from my mind to discuss what France considers indispensable for her national safety. That safety is as dear to us as it may be to them, and we are still morally by the side of our allies of yesterday and our friends of to-day."

JAPAN APPROVES PRINCIPLE.

Admiral Baron Kato, for Japan, said:

"It is needless for me to assure M. Briand that Japan has nothing but a most profound sympathy for her peculiarly difficult position.

"As to land armament limitation, Japan is quite ready to announce her hearty approval of the principle which aims to relieve a people of heavy burdens.

"Japan has not the slightest intention of maintaining land armaments in excess of those absolutely necessary for purely defensive purposes, necessitated by the far eastern situation."

FRANCE NOT ISOLATED, SAYS HUGHES.

Secretary Hughes made the closing speech of the day. He said:

"No words ever spoken by France have fallen on deaf ears in the United States. The heart of America was thrilled by her valor and sacrifice, and the memory of her stand for liberty is imperishable in this country.

"It is evident from what M. Briand has said that what is essential at this time in order that we may achieve the great ideal is the will to peace. And there can be no hope of a will to peace until institutions of liberty and justice are secure among all peace loving people.

"May I say, in response to a word which challenged us all as it was uttered by M. Briand, that there is no moral isolation for the defenders of liberty and justice? We understand the difficulties; what has been said will be read throughout this broad land by a people that desires to understand.

"The essential condition of progress toward a mutual understanding and a maintenance of the peace of the world is that we should know exactly the difficulties which each nation has to consider, that we should be able justly to appraise them, that we should have the most candid and complete statement of all that is involved in them.

"We cannot go into a statement of detail now. Apparently the conference is so organized that this matter may have an appropriate place in our discussion. We cannot foresee at the moment what practical measures may be available, but the expressions that we have heard from the representatives of the powers make us confident that here will be generated that disposition which is essential to national security, the final assurance of security which armies and officers and men and material can never supply, that is, the disposition of a world conscious of its mutual interests and of their dependence upon the fact that if they desire, most ardently and wholly desire it, peace will be enduring."

ROOT RESOLUTIONS ON CHINA.

Representatives of eight powers, sitting in the committee on the far east, adopted resolutions, drafted by Elihu Root, setting forth the general principles to guide the committee in its further investigation in regard to China. The text of the resolutions follows:

"It is the firm intention of the powers attending this conference, hereinafter mentioned, to wit: The United States of America, Belgium, the British empire, France, Italy, Japan, the Netherlands and Portugal—

"1. To respect the sovereignty, the independence and the territorial and administrative integrity of China.

"2. To provide the fullest and most unembarrassed opportunity to China to develop and maintain for herself an effective and stable government.

"3. To use their influence for the purpose of effectually establishing and maintaining the principle of equal opportunity for the commerce and industry of all nations throughout the territory of China.

"4. To refrain from taking advantage of the present conditions in order to seek special rights or privileges which would abridge the rights of the subjects or citizens of friendly states and from countenancing action inimical to the security of such states."

EFFORT TO CLIMB MOUNT EVEREST.

Under the auspices of the Royal Geographical society and the Alpine club of London, England, a strong expedition was fitted out in 1921 to explore and if possible ascend to the summit of Mount Everest, the highest peak in the Himalayas and the world. It was to do most of its preliminary work in the course of the year and if no easy way to the summit was discovered to prepare for another attempt in 1922. On Nov. 7 Sir Francis Younghusband, president of the geographical society, announced that the explorers had accomplished as much of the task as was set for them in 1921. After exploring the mountain in many directions, G. H. Bullock and G. L. Mallory had reached a point on the northeastern spur 6,000 feet below the summit, from which a way to the top seemed reasonably practicable.

The leading members of the expedition in 1921 were Col. Howard Bury, Harold Raeburn, G. L. Mallory, G. H. Bullock, A. L. Wollaston, Capt. Oliver Wheeler, Maj. Morshead and Dr. A. M. Heron. All were experienced mountain climbers.

FEDERAL BOARD FOR VOCATIONAL EDUCATION.

Chairman—The secretary of labor.
Vice-Chairman—Harry F. Fidler, representing labor; term expires 1924; salary $5,000.
(Vacancy), representing commercial and manufacturing interests; term expires 1923; salary $5,000.
Director—Lewis H. Carris.
Secretary—E. Joseph Aronoff.

The secretaries of agriculture, commerce and labor and the commissioner of education are ex officio members.

NATIONAL CONFERENCE ON UNEMPLOYMENT.

In response to a request from the United States senate directed to the secretary of labor for an estimate of unemployment in the United States, Ethelbert Stewart, commissioner of labor statistics, sent in a report from which the following was taken:

The best estimate that can be made from available sources of information is that there are at present (Aug. 12, 1921) 5,735,000 persons unemployed in the United States. These figures relate to the difference in the numbers of employes carried on pay rolls July, 1921, as compared with the peak of employment in 1920. Figures of the unemployed industries are:

Manufacturing and mechanical industries (including building trades)	3,900,000
Mining	250,000
Transportation	800,000
Trade and clerical workers	450,000
Domestic and personal service	335,000
Total	5,735,000

No estimates can be given as to the number of ex-service men unemployed, as the reports covering pay roll data do not segregate them. The same applies to woman workers.

In view of this state of affairs President Harding, through the secretary of commerce, Herbert C. Hoover, arranged for a national conference on unemployment to begin Sept. 26 in Washington. In his letter of invitation to prospective members the president said in part:

"The conference is called to inquire into the volume and distribution of unemployment, to advise upon emergency measures that can properly be taken by employers, local authorities and civic bodies and to consider such measures as would tend to give impulse to the recovery of business and commerce to normal."

DELEGATES TO CONFERENCE.

On Sept. 19 the names of the delegates to the conference were announced. They were:

Samuel McCune Lindsay, professor of social legislation, Columbia university, New York, N. Y.; vice-chairman national child labor commission.

Wesley C. Mitchell, professor of economics, New School for Social Research, New York.

Henry R. Seager, professor of economics, Columbia university.

Edward R. A. Seligman, professor of economics, Columbia university.

Sanford E. Thompson, Boston, Mass.

Walter F. Wilcox, professor of economics and statistics, Cornell university, Ithaca, N. Y.

Leo Wolman, New York, N. Y.

Allyn A. Young, Harvard university, Cambridge, Mass., chief of the division of economics and statistics, American commission to negotiate peace, 1918-1919.

On Sept. 22 the names of ten additional members of conference were announced. They were:

Mrs. Sarah Conboy of New York, N. Y., secretary of the United Textile Workers of America.

James B. Neal of Minerville, president of the Buckwin Coal company.

Benjamin Strong of New York, N. Y., governor of the Federal Reserve bank of New York.

M. F. Tighe of Pittsburgh, Pa., president of the Amalgamated Association of Iron, Steel and Tin Workers.

James E. Gibson of Seattle, Wash., president of the Waterfront Employers' union.

Bird S. Coler of New York, N. Y., commissioner of public welfare.

John Donlin of Washington, D. C., president of the building trades department of American Federation of Labor.

H. H. Stackhouse of Springfield, O., president of the National Implement and Vehicle association.

William Black of Louisville, Ky.

John D. Ryan of New York, N. Y., the United Metals Selling company.

In announcing the day of the conference and those who had accepted invitations to attend, a statement from the department of commerce said:

"In naming the members of the conference it has been the desire of the president to secure geographic representation and at the same time have regard to the different elements of the community who are interested and can be helpful in the problem, without any attempt at proportional numbers or particular groups. Those of experience in those industries where there is the largest degree of unemployment have been called upon in larger proportion than from trades where there is less unemployment difficulty. It was impossible to include representation of the whole of some fifty trade groups in the conference and hold its size within workable limits.

"The economic advisory committee has been appointed in advance of the conference by enlarging the economic advisory committee of the department of commerce. This committee has been at work for the last few days in formulation of statistical and other information and in preparation of agenda material for the conference. Its members will be included in the special committees appointed by the conference to deal with special subjects."

PRESIDENT OPENS CONFERENCE.

The conference began on Sept. 26 in the assembly room of the interior department building. President Harding, before turning over the direction of the proceedings to Secretary Hoover, said:

"It is a pleasure to express to you in advance of your labors the gratitude of the government for your service to the nation. Perhaps it is not too much to say a service for the world. Not so long since I was receiving the call of a distinguished foreigner and in the course of our conversation he alluded to the conference which is met this morning and said:

" 'Mr. President, our people are deeply interested in the American conference on unemployment because our problem is akin to your own, and your relief in the United States will be an added signal of hope from America to us and other peoples who are like depressed.'

"That remark of a distinguished foreigner emphasized our responsibility. If it be true that no citizen is without example to some one among his fellows, which I believe to be everlastingly true, then nations, great and small, are influencing others in all they do.

"You are invited together to consider a condition which is in nowise peculiar to the United States. The industrial depression which we are feeling is a war inheritance throughout the world. We saw humanity stressed in that production which is impelled by nations desperate in self-preservation. We saw the industrial call to arms which marshaled the family as well as the accustomed breadwinners, and we saw the spiritual, mental and physical might of the people cast in the scales measuring the might of the republic. From such a test there is inevitable reaction. To such heights there is necessary ascent and inescapable descent. With the world involved there is no escape for any of the world from the valleys of depression. Though we suffered less than many of those with whom we were associated, and less than any of those against whom we contended, it was inevitable that we should experience the fever's aftermath and come to know depression before we could become normal again.

"Liquidation, reorganization, readjustment, re-establishment, taking account of things done and the sober contemplation of things to be done, the finding of firm ground and the open, sure and onward way—all these are a part of the inevitable, and he who thinks they might have been avoided by this plan or that or this policy or that or this international relationship or that only hugs a delusion when reason is needed for a safe counsel.

"Even though the world's storehouses were depleted at the same time the finances were unbalanced and none was ready to store a war crop for the more deliberate consumption of peace, momentarily there was elation, but it was not the glow of abiding health. We mistook elation for restoration. To-day we are met in realization. You have been summoned to counsel all America, to apply your knowledge and your experience in relieving a condition which concerns all America. Specifically, you are to deal with unemployment, to suggest the way of repairing the arterial circulation which is the very life blood of the republic.

"There is always unemployment. Under most fortunate conditions, I am told, there are a million and a half in the United States who are not at work. The figures are astounding only because we are a hundred million and this parasite percentage is always with us.

"But there is excessive unemployment to-day and we are concerned not alone about its diminution, but we are frankly anxious, under the involved conditions, lest it grow worse, with hardships of the winter season soon to be met.

"I do not venture to quote the statisticians, whether the maximum figures are accurate or the minimum more dependable. Owing to the far swing from intensive endeavor and the effort to get down to solid foundations, coupled with the difficulty of readjusting expenditure—public, corporate and individual—from abnormal to normal, the problem of unemployment is the most difficult with which we are confronted.

"But there are no problems affecting our national life and the welfare of the American people which we cannot and will not solve. If we fail to-day we will try again to-morrow. There has been vast unemployment before and will be again. There will be depression after inflation, just as surely as the tides ebb and flow, but we can mitigate, we can shorten duration, we can commit all America to relief. And all America has never failed when committed to a common cause. If out of your councils there comes a remedy which all America helpfully may apply to-day it may be helpfully employed some time again when similar conditions are encountered.

"It is fair to say that you are not asked to solve the long controverted problems of our social system. We have builded the America of to-day on the fundamentals of economic, industrial and political life which made us what we are, and the temple requires no remaking now. We are incontestably sound. We are constitutionally strong. We are merely depressed after the fever and we want to know the way to speediest and deperdable convalescence. When we know the way everybody in America—capital and labor, employer and employe, captains of industry and the privates in the trenches—will go over the top in the advance drive of peace. Frankly, it is difficult to know whether we have reached that bedrock to which reaction runs before the upward course begins, but here are representatives of the forces which make for all we are or ever can be, and your soundings ought to be reliable.

"I would have little enthusiasm for any proposed relief which seeks either palliation or tonic from the public treasury. The excess of stimulation from that source is to be reckoned a cause of trouble rather than a source of cure. We should achieve but little in a remedial way if we continued to excite a contributing cause.

"It is not my thought to suggest your lines of conference. Mr. Hoover, the secretary of commerce, to whom has been committed the arrangements for this important meeting, will present the agenda. I have wished to say to you that the people of the United States are very deeply interested, not alone the unemployed, but all who are concerned for our common weal, and the world is looking on to find helpfulness in our American example. Fundamentally sound, financially strong, industrially unimpaired, commercially consistent and politically unafraid, there ought to be work for everybody in the United States who chooses to work, and our condition at home and our place in the world depend on everybody going to work and pursuing it with that patriotism and devotion which makes for a fortunate and happy people."

SECRETARY HOOVER'S ADDRESS.

Secretary Hoover, the only other speaker, emphasized the same point. The country, he said, was on the upgrade, but economic progress could not, under any expectation, come with sufficient rapidity to itself handle the situation.

"In other countries that have been primarily affected by the war," he added, "solution has been had by direct doles to individuals by their governments. We have so far escaped this most vicious of solutions, and I am hopeful, and I believe you will be, that it is within the intelligence and initiative of our people that we may find remedies against hardship and bitterness that do not—except in exceptional cases—come within the range of charity."

Secretary Hoover said in part:

"In calling this conference the president has hoped to mobilize the sense of service in our people for the solution of a problem that not only commands our sympathies but is of primary necessity to public welfare.

"There can be no question that we are on the upgrade, but economic progress cannot, under any expectation, come with sufficient rapidity to prevent much unemployment over the forthcoming winter.

"Great numbers will have exhausted their savings and must be subjects of great concern to the entire public. It is the duty of this conference to find definite and organized remedy for this emergency, and I hope also that you may be able to outline for public consideration such plans as will in the long view tend to mitigate its recurrence.

"We need first a determination of the volume and distribution of unemployment. We need a determination of what emergency measures should be undertaken to provide employment and to mitigate the suffering that may arise during the next winter, and the method of organization for their application.

"We need a consideration and a statement of what measures must be taken to restore our commerce and employment to normal, or, to put it in another way, what obstacles need to be removed to promote business recovery—the only real and lasting remedy for unemployment is employment.

"The remedies for these matters must, in the latest degree, lie outside of the range of legislation. The administration has felt that a large degree of solution could be expected through the mobilization of the fine co-operative action of our manufacturers and employers, of our public bodies and local authorities, and that if solution could be found in these directions we would have accomplished even more than the care of our unemployed; that we will have again demonstrated that independence and ability of action among our own people that saves our government from that ultimate paternalism that would undermine our whole political system.

"What our people wish is the opportunity to earn their daily bread, and surely in a country with its warehouses bursting with surpluses of food, of clothing, with its mines capable of indefinite production of fuel, with sufficient housing for comfort and health, we possess the intelligence to find solution. Without it our whole system is open to serious charges of failure.

"It is my belief that in the intelligence and influence which you command we shall be able to lay out a program by which, in great measure, these things can be accomplished. It is neither the desire nor in the power of the federal government to enforce such a program.

"This crisis in some respects is fraught with hardships quite as grave as those which confronted the country during the period of its participation in the great war."

These speeches ended the talk, and Mr. Hoover then selected a permanent committee on organization, headed by H. N. Robinson,

president of the Los Angeles Trust company, which was instructed to select subcommittees of specialists and report at 3 o'clock in the afternoon.

COMMITTEES NAMED.

At that hour the following committees were named:

Unemployment Statistics—James A. Campbell, Mayor James Couzens, C. R. Markham, Henry N. Robinson, Miss Mary Van Kleeck, Matthew Wall, Clarence Mott Woolley, W. L. Burdick, Carroll W. Doten, Allen A. Young, Walter F. Wilcox, Leo Wolman; executive secretary, T. W. Mitchell.

Employment Agencies and Registration—Julius H. Barnes, Elizabeth Christman, Bird S. Coler, Joseph H. De Frees, Mortimer Fleishacker, Clarence J. Hicks, Jackson Johnson, William M. Leiserson, M. F. Tighe, Henry S. Dennison, George E. Barnett, Bailey B. Burritt, Sam A. Lewisohn, Henry R. Seager.

Emergency State and Municipal Measures and Public Works—Charles M. Babcock, Bird S. Coler, Mayor James C. Couzens, Bascom Little, Mayor Andrew J. Peters, Ida M. Tarbell, Matthew Woll, Col. Arthur Woods, Evans Woolen, Henry S. Dennison, Edwin F. Gay, Otto T. Mallery, Edward R. A. Seligman; executive secretary, Otto T. Mallery.

Emergency Measures by Manufacturers—William M. Butler, James A. Campbell, Mrs. Sarah Conboy, John E. Edgerton, Samuel Gompers, Clarence J. Hicks, A. L. Humphrey, Jackson Johnson, W. C. Procter, Charles M. Schwab, W. H. Stackhouse, J. A. Penton, R. M. Dickerson, Henry S. Dennison, Sanford E. Thompson, William S. Rossiter, E. S. Bradford; executive secretary, Gordon Lee.

Emergency Measures in Transportation—W. S. Carter, Edgar E. Clark, C. H. Markham, Raymond A. Pearson, Davis R. Dewey, Clyde L. King, J. H. Parmelee; executive secretary, Charles P. Neill.

Emergency Measures in Construction—Winslow B. Ayer, John Donlin, John H. Kirby, Bascom Little, Richard C. Marshall, Jr., Ernest T. Trigg, Sanford E. Thompson; executive secretary, John M. Gries.

Emergency Measures in Mining—John T. Connery, W. K. Field, John L. Lewis, J. Moore, James B. Neal, E. M. Posten, John D. Ryan, Miss Mary Van Kleeck, John P. White, Samuel A. Lewisohn; executive secretary, David L. Wing.

Emergency Measures in Shipping—James F. Gibson, Thomas V. O'Connor, Charles M. Schwab, Carroll W. Doten; executive secretaries, E. S. Gregg and R. A. Lundquist.

Public Hearings—S. McCune Lindsay; executive secretary, John B. Andrews.

EMERGENCY PROGRAM ADOPTED.

On Sept. 30, after a number of public hearings and consideration by various committees, the following emergency program was adopted by the conference:

"1. The conference finds that there are variously estimated from 3,500,000 to 5,500,000 unemployed and there is a much greater number dependent upon them. There has been an improvement, but pending general trade revival this crisis in unemployment cannot be met without definite and positive organization of the country.

"2. The problem of meeting the emergency of unemployment is primarily a community problem. The responsibility for leadership is with the mayor, and should be immediately assumed by him.

"3. The basis of organization should be an emergency committee representing the various elements in the community. This committee should develop and carry through a community plan for meeting the emergency, using existing agencies and local groups as far as practicable. One immediate step should be to co-ordinate and establish efficient public employment agencies and to register all those desiring work. It should co-ordinate the work of the various charitable institutions. Registration for relief should be entirely separate from that for employment.

"4. The personnel of the employment agencies should be selected with consideration to fitness only and should be directed to find the right job for the right man and should actively canvass and organize the community for opportunities for employment. The registry for employment should be surrounded with safeguards and should give priority in employment to residents. Employers should give preference to the emergency employment agencies.

"5. The emergency committee should regularly publish the numbers dependent upon them for employment and relief that the community may be apprised of its responsibility. Begging and unco-ordinated solicitation of funds should be prevented.

"6. Private houses, hotels, offices, etc., can contribute to the situation by doing their repairs, cleaning and alterations during the winter instead of waiting until spring, when employment will be more plentiful.

"7. Public construction is better than relief. The municipalities should expand their school, street, sewage, repair work and public building to the fullest possible volume compatible with the existing circumstances. That existing circumstances are favorable is indicated by the fact that over $700,000,000 of municipal bonds, the largest amount in history, have been sold in 1921. Of these $106,000,000 were sold by 333 municipalities in August. Municipalities should give short-time employment the same as other employers.

"8. The governor should unite all state agencies for support of the mayors and, as the superior officer, should insist upon the responsibility of city officials, should do everything compatible with circumstances in expedition of construction of roads, state building, etc.

"9. The federal authorities, including the federal reserve banks, should expedite the construction of public buildings and public works covered by existing appropriations.

"10. A congressional appropriation for roads, together with state appropriations amounting to many tens of millions of dollars already made in expectation of and dependence on federal aid, would make available a large amount of employment. The conference under existing circumstances, notwithstanding various opinions as to the character of the legislation and the necessity for economy, recommends congressional action at the present session in order that work may go forward.

"11. The greatest area for immediate relief of unemployment is in the construction industry, which has been artificially restricted during and since the war. We are short more than a million homes; all kinds of building and construction are far behind national necessity. The senate committee on reconstruction and production, in March of this year, estimated the total construction shortage in the country at between ten and twenty billion dollars. Considering all branches of the construction industries, more than two million people could be employed if construction were resumed. Undue cost and malignant combinations have made proper expansion impossible and contributed largely to this unemployment situation. In some places these matters have been cleaned up. In other places they have not and are an affront to public decency. In some places these things have not existed. In others costs have been adjusted. Some materials have been reduced in price as much as can be expected. Where conditions have been righted, construction should proceed, but there is still

a need of community action in provision of capital on terms that will encourage home building. Where the costs are still above the other economic levels of the community there should be searching inquiry and action in the situation. We recommend that the governors summon representative committees, with the co-operation of the mayors or otherwise, as they may determine: (a) to determine facts, (b) to organize community action in securing adjustments in costs, including removal of freight discriminations and clean-out campaigns against combinations, restrictions of effort and unsound practices where they exist, to the end that building may be fully resumed."

RECOMMENDATIONS OF MANUFACTURERS.

The recommendations of the manufacturers' committee, included in the program, were as follows:

"Manufacturers can contribute to relieve the present acute unemployment situation by—

"(a) Part-time work, through reduced time or rotation of jobs.

"(b) As far as possible manufacturing for stock.

"(c) Taking advantage of the present opportunity to do as much plant construction, repairs and cleaning up as is possible, with the consequent transfer of many employes to other than their regular work.

"(d) Reduction of the number of hours of labor per day.

"(e) The reduction of the work week to a lower number of days during the present period of industrial depression.

"(f) That employers and employers cooperate in putting these recommendations into effect.

"A large number of employers have already, in whole or in part, inaugurated the recommendations herein set forth, and for this they are to be commended, and it is earnestly urged upon those employers who have not done so to put same into use, wherever practicable, at the earliest possible opportunity.

"(g) Specific methods for solution of our economic problems will be effective only in so far as they are applied in a spirit of patriotic patience on the part of all our people.

"During the period of drastic economic readjustment, through which we are now passing, the continued efforts of any one to profit beyond the requirements of safe business practice or economic consistency should be condemned. One of the important obstacles to a resumption of normal business activity will be removed as prices reach replacement values in terms of efficient producing and distributing cost plus reasonable profit.

"We therefore strongly urge all manufacturers and wholesalers who may not yet have adopted this policy to do so, but it is essential to the success of these measures when put into effect that retail prices shall promptly and fairly reflect the price adjustment of the producer, manufacturer and the wholesaler.

"When these principles have been recognized and the recommendations complied with, we are confident that the public will increase their purchases, thereby increasing the operations of the mills, factories and transportation companies, and consequently reducing the number of unemployed."

PRESIDENT ISSUES APPEAL.

On Oct. 3 President Harding issued the following official appeal:

"The conference which I recently summoned to Washington to advise as to the unemployment situation has demonstrated that an unusual volume of unemployment exists and that, pending the recuperation of trade, the situation cannot be met, in due regard to our obligations and necessities, without a much more than usual organization throughout those states and municipalities where unemployment has reached considerable proportions.

"The conference has recommended a plan of organization which has had the support of commercial, manufacturing, professional and labor representatives of the country. It is highly necessary that more accurate knowledge should be had, through such organization, of the volume and necessities of the unemployed.

"It is essential that the co-operation of all sections of each community should be brought into action behind such organization to provide work and assistance that we may pass through the coming winter without great suffering and distress. It is of national importance that every community should at once undertake such organization, in order that the nation may be protected as a whole. Moreover, the thorough commitment to such a task is sure to start a thousand activities which will add to our common welfare.

"I therefore appeal to the governors and mayors of the nation that they should take the steps recommended by the conference.

"In order that there may be unity of action by all the forces which may be brought to bear, whether governmental or private, the unemployment conference is establishing an agency in Washington through which appropriate co-ordination can be promoted and through which reports on progress and suggestions may be given general circulation and co-operation. I trust this agency will be supported in this endeavor."

REPORT OF SECRETARIES.

On Oct. 9 the following report from the executive secretaries setting forth the progress made toward relief of the unemployment situation under the emergency measures adopted by the conference was made public:

"The predominant object of the conference was to recommend and organize measures to meet the emergency situation during the winter. The preliminary recommendations and organization plans have had the following response in the seven days since their issue:

"1. Mayors' emergency committees have been created and are actively at work in thirty-one cities, on the lines of the conference plan of co-ordination of effort of all sections of the community, with more than a score of other cities reporting that organization is in process.

"2. Conferences have been held during the last week by the president, Secretary Hoover and members of the conference with the heads of the great national industries, including railways, coal and shipping, from which have resulted definite steps undertaking to meet the emergency in many practical ways.

"3. The active participation of the great national commercial and employers' associations has been assured, in definite organization of their branches throughout the country to assist the mayors and to meet the situation generally. The United States chamber of commerce, the National Manufacturers' association, various regional and state associations have actively entered into the problem of organization and provision of work for the unemployed and assistance to the state and municipal authorities.

"4. A number of cities have undertaken steps for the immediate advancement of local public works and for definite advancement of construction work in the community. Steps organized in this direction have been formally reported from eight cities.

"5. An office has been set up and is at work in Washington, under Col. Arthur Woods, to continue the stimulation and co-ordination of

national, state and municipal agencies under the general direction of the unemployment conference."

General measures to aid in the permanent recovery of business and industry were approved in a report adopted on Oct. 11.

Limitation of world armament "and consequent increase of tranquillity and further decrease of the tax burden" was urged both in the general report and in a report from the subcommittee on foreign trade, which also was approved by the conference.

Other recommendations contained in the general report included the following:

Readjustment of railway rates.
Speedy enactment of tax legislation.
Definite settlement of tariff legislation.
Settlement of the financial relationship between the government and the railways.
Steps toward the minimizing of fluctuations of foreign exchange.
Elimination of waste and more regular employment in seasonal and intermittent industries, notably in the coal industry.
Adjustment of inequalities in prices during the deflation process.

The report of the committee on foreign trade, which was presented by Joseph H. De Frees of Chicago, besides urging limitation of armament, urges that the United States exert its influence toward a reasonable control of the present unregulated payment of reparations by Germany and early legislation enabling the administration to deal with the funding of foreign loans.

The reports were approved by unanimous vote.

The conclusions of the committee on foreign trade are thus summarized:

"1. The conference for limitation of armament should bring about a reduction in military burdens and be a long step toward arresting constantly increasing inflation, increasing depreciation and extreme fluctuations of various foreign currencies.

"2. The United States should be effective in the deliberations and decisions of the reparations commission and other agencies so that it may influence a reasonable control of the present unregulated payment of reparations by Germany.

"3. Authority should immediately be granted to the administration to deal with the funding of foreign debts owing to the United States in such a way as to avoid injury to the country's foreign trade and our employment.

"The broad questions of policy, such as national shipping, tariff and taxes, will have important effects upon movement of our commodities to overseas markets."

CLOSE OF THE CONFERENCE.

The conference adjourned finally on Oct. 13 after the employer members had reported that neither commodity prices nor wage rates could be maintained above the natural economic level. A flat declaration against any general policy of wage reduction was contained in minority views of the labor members of the subcommittee on manufactures, signed by Samuel Gompers, Mrs. Sarah A. Conboy and Roy Dickinson.

RAILWAY WAGE CRISIS IN 1921.

After extended hearings the United States labor board announced on May 1, 1921, that the wages of railroad employes on 104 lines would be cut on an average of 12 per cent beginning July 1. On June 27 the board extended the cut to practically every large railroad in the United States. The railway executives held that the wages of their employes were larger than those in other industries and should be reduced in conformity with the decrease in the cost of living. The men replied by claiming that the reduction in the cost of living was small and by pointing out that their occupation was hazardous in many instances and that the working conditions were unsatisfactory. The reduction went into effect on the date named and talk of a general strike began. The leaders of the train service brotherhoods submitted the matter to a referendum, which was taken in September. It resulted in favor of a strike if wage and working condition concessions were not made. Arrangements were made by the brotherhood chiefs for a walkout on Oct. 30. Many meetings were held between the railway labor board and representatives of the railway employes and finally on Oct. 27 the controversy ended in a peaceful settlement and the proposed strike was called off. This result was due in large measure to the fact that the railway unions outside the "big five" were opposed to a strike and to the further fact that public sentiment was against any such step at a time when the country was undergoing severe business depression and striving to find a remedy for the increasingly grave unemployment crisis.

DEATH OF CHRISTINE NILSSON.

Christine Nilsson, one of the most noted singers of her day, died in Copenhagen, Denmark, Nov. 22, 1921. She was born near Vexio, Sweden, Aug. 20, 1843. She made her first appearance as a singer in Stockholm in 1860 and after three years of study in Paris made her debut there with great success. Three years later she sang in London and in 1870 came to the United States and met with success wherever she appeared, either in opera or on the concert stage. Among the operatic parts she sang were those of Violetta in "La Traviata," Elsa in "Lohengrin," Marguerite in "Faust" and Ophelia in Ambroise Thomas' "Hamlet." She was married twice, her first husband being Auguste Rouzaud, who died in 1882, and her second Count Miranda, who died in 1902. She went into permanent retirement in 1888.

CONSTITUTION OF THE KINGDOM OF SERBS, CROATS AND SLOVENES (JUGO SLAVIA).

Adopted by the national assembly in Belgrade on June 15, 1921, and proclaimed by the king on June 28, 1921.

[Translated by John R. Palandech.]

SECTION 1—GENERAL PROVISIONS.

Article 1. The government of the Serbs, Croats and Slovenes is a constitutional parliamentary and hereditary monarchy. The official title of the government is kingdom of Serbs, Croats and Slovenes.

Art. 2. The coat of arms of the kingdom is a double-headed white eagle with wings widespread upon a red shield; the crown of the kingdom is directly above both heads of the double-headed white eagle; upon the breast of the eagle is a shield having thereon the Serbian coat of arms, consisting of a white cross upon a red shield, with one jewel in each angle of the cross; the Croatian coat of arms, consisting of a shield with twenty-five squares alternately of red and silver color; the Slovenian coat of arms, consisting of three gold six-angled stars upon a blue shield. Under this is a white half moon.

The flag is blue, white and red, in horizontal stripes against an upright spear.

Art. 3. The official language of the kingdom is Serbo-Croatian-Slovene.

SECTION 2—THE FUNDAMENTAL RIGHTS AND DUTIES OF CITIZENSHIP.

Art. 4. The right of citizenship is equal (uniform) in the entire kingdom. All the citizens are equal before the law. All enjoy equal protection of the government. Nobility and titles are not recognized, neither are any privileged rights of birth.

Art. 5. Personal liberty is guaranteed. No one can be held responsible or imprisoned or deprived of his liberty by any one except in cases provided by law. No one can be imprisoned for any crime without written statements giving the reasons and facts substantiating the charges of the competent authorities. The charges must be submitted to the party accused at the time of arrest, or, if that is not possible, at the latest within twenty-four hours from the time of imprisonment. Against an order for imprisonment an appeal can be made within three days to the competent court. If there is no appeal filed within this period the prosecuting authorities must send their decision to the court within twenty-four hours. The court must make its findings in the period of two days from the time it received the decision. The findings of the court are supreme. Organs of the authorities who violate these provisions shall be punished for unlawful deprivation of liberty.

Art. 6. No one can be tried except by a competent court.

Art. 7. No one can be sentenced until he has been authoritatively heard or has been summoned to defend himself according to law.

Art. 8. Punishment can be dealt only by law and applied only to the acts for which the law provides and prescribes such punishment.

Art. 9. The death penalty cannot be inflicted for purely political crimes, except in cases of accomplished or attempted assassination of the ruler and of members of the royal house, for which the death penalty is provided in the criminal code. Exceptions are made in addition to the above in cases where with purely political crimes some other criminal act is committed, for which death penalty is provided in the criminal code, and also in cases which the military law punishes with death penalty.

Art. 10. No citizen can be exiled from the country. A citizen cannot be forcibly moved within the border of the country from one place to another, nor can he be confined in one place, except in cases for which the law explicitly provides. Under on condition can any one be driven out from his native place without due process of law.

Art. 11. The home is inviolable. The authorities cannot attempt any search or investigation in the home of a citizen except in cases authorized by law and in the manner prescribed by law. Before any search can be made the authorities are in duty bound to give the person whose home is being searched a written notice from the competent authorities on the strength of which the search is made. Against this order there is an appeal to the court of first instance. However, the appeal does not delay the process of search. The search must always be made in the presence of two citizens. Immediately after the search is completed the authorities are bound to give the person whose home was searched a statement of the results of the search and a signed list of all articles taken for the purpose of further investigation. At night the police can enter a private home only in cases of extreme necessity or when they are appealed to for help from the home. To that act a representative of the community or two citizens should be present, except in cases where an appeal for help is made. Agents (officials) of the authorities who violate these orders will be punished for an unlawful violation of the home.

Art. 12. Freedom of faith and conscience is guaranteed. Acknowledged religious denominations are equal before the law and are at liberty to profess their faith publicly. Enjoyment of civil and political rights is independent of any religious belief. No one can be exempt from his civic and military duties and responsibilities upon the grounds of his religious belief. Creeds that have secured lawful recognition in any part of the kingdom are sanctioned. Other creeds can be recognized only by the law. Authorized and recognized creeds govern their internal church activities, affairs and administration independently and manage their property and funds within the boundary of the law. No one is compelled publicly to confess his religious belief. No one is compelled to take a part in religious activities, feasts, ceremonials and exercises except at national holidays and celebrations, within the manner provided by law, for persons who are subordinate to parental, guardian or military authorities. Authorized and recognized denominations may preserve the ties of their faith with the religious heads outside of the borders of the country in so far as the necessity of spiritual regulations of the different creeds require. The manner in which these ties should be preserved will be regulated by law. The disbursement which the national budget provides for lawful religious purposes will be divided between lawful and recognized spiritual bodies, according to the number of their faithful and actually shown necessity. Spiritual representatives cannot employ their spiritual authority outside of their spiritual edifices or outside of their spiritual character, or in any act while doing their official duty in partisan affairs.

Art. 13. Freedom of press is guaranteed. No measure can be instituted that would prevent printing, selling and distributing of literature and newspapers. Censorship can be enforced only in time of war or mobilization and that for measures foreseen by law. Distribution and selling of newspapers or printed matter which contain libel on the ruler or the members of the royal house, foreign ruling heads, national assembly, indirectly calling upon the citizens to change the constitution or the national laws by force, or contain offense against

public morals, are forbidden. However, in these cases the authorities are bound to take the matter to court within twenty-four (24) hours after the suspension and the court is duty bound to sustain or dismiss the charge within twenty-four hours, otherwise it is considered the suspension is rescinded. Courts of proper jurisdiction decide the matter of damages independently of court's decision regarding the suspension. For offense committed by the press the following are responsible: The writer, editor, printer, publisher and distributor. By special law for the press it will be decided when and in what cases and which of the abovementioned persons and in what manner they will be responsible for the offense committed through the press. All offenses committed by the press will be tried by courts of proper jurisdiction.

Art. 14. Citizens have right of assembly, meetings and conferences. Additional regulations regarding this will be provided by law. No person will be permitted to carry arms to meetings. Holding of open-air meetings must be announced to the proper authorities at least twenty-four hours beforehand. Citizens have right of assembly for any objects that are not punishable by law.

Art. 15. Citizens have right to petition. Petition can be signed by one or more of them, as well as all judicial persons. Petitions can be submitted to any of the authorities without exception.

Art. 16. Learning and arts are free and enjoy protection and support of the government. University education is free. Education is national. Education is based upon the same foundation throughout the country, adapting itself to the localities for which it is intended. All schools must teach moral uplift and broad national ideals in spirit of national unity and religious tolerance. Elementary education is national, general and compulsory. Religious training is given according to the wishes of the parent or elders, based on their creeds and in accordance with their religious beliefs. Technical schools will be established according to the needs of vocation. Education is given by the government without entrance fees, tuition or other taxes. The manner in which private schools, their like and under what conditions they shall be permitted will be provided by law. All institutions for education are under government control. The government will aid work of national education. Minority of the races and languages is given elementary education in their mother tongue, under provisions which will be prescribed by law.

Art. 17. The secrecy of letters, telegrams and telephone communication is inviolable, except in cases of criminal investigations, mobilization or war. All those who are guilty of violating the secrey of postal, telegraph or telephone communication will be punished according to law.

Art. 18. Every citizen has the right directly and without any one's approval to bring complaint to the court against the governmental or self-governing bodies for criminal acts which they may make against him in their official capacity. For ministers, judges and soldiers, under colors, special provisions apply. For damages done to citizens by governmental or self-governing bodies by illegal performance of their duties the government or self-governing bodies are responsible before the proper court. The agent in question is responsible to them. Limitation for damages expires in nine months.

Art. 19. To all positions in all branches of government service all citizens are equally eligible under the provisions of the law, those by birth as well as those who become naturalized, who are of the Serbo-Croat-Slovene nationality. Other naturalized citizens can obtain government positions only if they are residents of the country for ten years, and by special permission of the government's council upon the prior recommendation of the competent minister.

Art. 20. Every citizen enjoys the protection of the government in foreign countries. Every citizen is at liberty to withdraw from citizenship after he has fulfilled his obligations to the government. Extradition of citizens is forbidden.

Art. 21. Every citizen is obliged to obey the law, serve the interest of national unity, defend his native country and carry the national burden according to his earning ability, according to the provisions of the law.

SECTION 3—SOCIAL AND ECONOMIC REGULATIONS.

Art. 22. The government will endeavor to create for its citizens equal opportunity to prepare themselves for profitable vocations to which they are inclined. In that direction it will establish educational trade organizations and arrange for permanent assistance for education of worthy poor children.

Art. 23. The laboring classes are under the protection of the government. Women and minors must be protected from work dangerous to their health. The law provides separate measures for the welfare and protection of the workman and prescribes working hours in all undertakings.

Art. 24. Inventions are the property of the inventor and enjoy the protection of the government.

Art. 25. Freedom of negotiation and organization in business affairs is recognized in so far as it does not interfere with social interests.

Art. 26. The government has, in the interest of the whole and based upon the spirit of the law, right and duty to intervene in the economic affairs of its citizens in the spirit of justice and preventions of social adversity.

Art. 27. The government will take care: (1) To improve general hygienic and social conditions, which are essential to national health; (2) to give special protection to mothers and small children; (3) to guard the health of all citizens; (4) to check and prevent all the acute and chronic, contagious diseases, as well as to check the harmful use of alcohol, and (5) to furnish free medicine and other necessities for the protection of national health to poor and needy citizens.

Art. 28. Marriage is under the protection of the government.

Art. 29. The state aids materially national associations; also the state aids materially other national economic organizations that are not for profit. To such associations and to such economic organizations priorities are given in the transaction of business upon equal terms with other private institutions. Laws will be formulated as regard the associations which will apply to the entire country.

Art. 30. By special legislation betterment of the agrarian conditions will be provided.

Art. 31. Protection of workmen in case of accident, illness, lack of work, incapability, old age or death will be provided by special legislation.

Art. 32. Invalids, war orphans, war widows, the poor and incapable for work, parents of the killed or who died in the war, enjoy special protection of the state and assistance as a mark of appreciation. The question of rehabilitation of the invalid and the education of war orphans for work and the future will be regulated by law.

Art. 33. The rights of the workingmen to organize for the purpose of improving working conditions is guaranteed.

Art. 34. To fisheries will be given special

attention. The welfare of the seaman in case of sickness, invalidity, old age and death will be provided for by special law.

Art. 35. The state will supervise the building and maintaining of all transportation facilities wherever the general national interest demands.

Art. 36. Usury of every description is forbidden.

Art. 37. Property is guaranteed. Property creates responsibilities. The use of property must not be to the detriment of the whole. Contents, size and limits of private property are fixed by law. Expropriation of private property in the public interest is permissible according to law, with just compensation.

Art. 38. Fidei commissum is abolished. Bequests with general advantageous purposes are recognized. It will be determined by legislation what changes of the bequests can be made in accordance with change of conditions.

Art. 39. By the inheritance tax law the government will be assured of its participation in the inheritance, having in mind the interests of the relations between the heir and the deceased and the value of the inheritance.

Art. 40. The supplying of provisions and other necessities for the army is carried out for just compensation.

Art. 41. Large private forest tracts are expropriated according to law and become the property of the state or its self-governing bodies. The law will provide how large forest tracts can be property of other lawful public bodies that now exist or will be created. Natural forestry whose cultivation is necessary for climatical and cultural purposes also passes over, according to the law of expropriation, to the ownership of the state or its self-governing bodies, in so far as forestation cannot be done by other means. Large forest tracts which foreign powers have given to individual persons become, according to law, the property of the state or municipality without any compensation to those persons. The forestry law will make provisions under which farmers and those who are indirectly occupied with tilling the land can benefit by wood cutting for building and fuel; also for grazing purposes in the state forests.

Art. 42. The feudal system is abolished from the day of the liberation from foreign authority. In so far as before that time injustice was committed by feudal system or by its transformation to self-justification these conditions must be corrected by law. Land tenants and land workers in general who cultivate lands in tenancy are considered freeholders of government lands without any compensation for the same, and they will receive title to the property.

Art. 43. Expropriation of large estates and their apportionment to ownership to those who till the lands will be regulated by law. The law will provide the kind of compensation that will be given expropriated estates. For large estates which belong to members of former alien dynasty and those which the foreign powers have granted to individuals no compensation will be given. Land settlements will be carried out primarily by the aid of organized colonization societies, seeing that the inheritors must be provided with necessary means for successful production. In colonization and in apportionment of expropriated lands needy soldiers have first choice, meaning those who have fought for the liberation of the Serbs, Croats and Slovenes and their families. The law will provide the maximum possession of property and the cases in which the minimum of land cannot be alienated from them.

Art. 44. For the framing of social and economic legislation the economic council is created. Its regulations, duties and competence will be designated by law.

SECTION 4—GOVERNMENT AUTHORITIES.

Art. 45. All government functions are carried out according to this constitution.

Art. 46. Legislative power is vested in the king and national assembly together.

Art. 47. Executive power is administered by the king, through his responsible ministers, according to the provisions of the constitution.

Art. 48. Judicial power is administered by the courts. Their rulings and sentences are pronounced and administered in the name of the king, according to law.

SECTION 5—THE KING.

Art. 49. The king approves and proclaims the laws, appoints government officials and gives military titles as prescribed by law. The king is the supreme commander of the entire military forces. He gives decorations and other honorary distinction.

Art. 50. The king has the right to grant amnesty for political and military offenses. Amnesty nullifies legal consequences of punishable acts, but amnesty cannot interfere in damages allowed to individual persons. Amnesty can be given before the beginning of the proceedings, during the proceedings or after the decision is given. Amnesty is general or individual. For amnesty to the ministers it is necessary to first have the concurrence of the national assembly. However, no amnesty can be given to ministers until after the sentence is pronounced. The king has the power to pardon. He can pardon, reduce or lighten the sentence. The right to pardon for the crime of the defendant, on personal appeal, will be provided by law of court procedure in criminal acts.

Art. 51. The king represents the nation in all intercourse with foreign governments. He declares war and makes peace. If the country is not attacked or war is not declared against it by some other nation it is necessary first to have the consent of national assembly to declare a war. If war is declared against the country or the country is attacked the national assembly must be convened at once.

Art. 52. The king calls the national assembly in regular or extra sessions. He opens and closes the sessions in person with a message from the throne or through the council of ministers by a message or a decree. The message from the throne, communication or decree must be signed by all the ministers. The decree by which one session is adjourned must contain the order for the date of calling a new session. The king can at all times, in case of national emergency, convene the national assembly which has adjourned. The king has the right to dismiss the national assembly, but the decree of its dismissal must contain an order for new election, at the latest within three months' time, and an order for convening of the national assembly, at the latest within four months from the day of the dismissal of the assembly. The decree to dissolve the national assembly is attested to by all ministers.

Art. 53. The king cannot rule over some other state at the same time without the consent of the national assembly. If the king should, notwithstanding this act, accept the crown of some other country it will be considered that he has resigned the rulership of the kingdom of Serbs, Croats and Slovenes.

Art. 54. No act of the king's authority is valid nor can it be executed unless it has been signed by the competent minister. For all king's actions, verbal or written, signed or unsigned, as well as for all his acts of political nature, the competent minister is responsible.

For the actions of the king, as the commander in chief of the army, the minister of war and navy is responsible.

Art. 55. The king and the heir to the throne are of age when they attain 18 years. The king's person is immune. He cannot be held responsible nor can a complaint be brought against him. This does not apply to the king's personal property.

Art. 56. In the kingdom of Serbs, Croats and Slovenes the ruler is Peter, the first Karagorgjevich. King Peter's successor is Crown Prince Alexander and his male issue from a legal marriage in order first born. When the king has no male issue he will select for himself his heir from the royal line, with the approval of the national assembly. For this act it is therefore required a majority of one-half, plus one vote of the entire membership of the national assembly.

Art. 57. The royal household is made up of the queen wife, the living ancestors and heirs to the king in direct line, with their wives, full brothers and their heirs, with their wives, and the sisters of the ruling king. Relatives and prerogatives of the members of the royal household will be defined by statute. No member of the royal household can become a minister or a member of the national assembly.

Art. 58. The king takes oath before the national assembly, which is as follows:

"I, ———— (name), ascending the throne of the kingdom of Serbs, Croats and Slovenes, and accepting the royal power, do hereby swear in the name of Almighty God that I will guard the union of the people, independence of the nation and the entity of the national authority; that I will keep the constitution inviolable; that I will rule by the constitution and the law, and that I will endeavor to have the welfare of the people before me, so help me God. Amen."

Art. 59. The king resides in the country permanently. Should it be necessary for the king to leave the country for a short time, the heir to the throne will represent him. If the heir to the throne is a minor or prevented from acting by any reason the king will be represented by the council of ministers. Representation is conformed to according to the instructions given by the king within the bounds of the constitution. This applies also in case of the king's disability when it is not of a permanent nature During the absence of the king or the heir to the throne the ministers' council has no right to adjourn the national assembly. The king can be represented by the ministers' council at the most for six months. Upon the expiration of that time the provision made by the constitution relative to substitutes becomes effective.

SECTION 6—SUBSTITUTION.

Art. 60. The royal prerogatives are performed by substitutes: First, when the king is a minor, and second, when he is mentally or physically permanently incapable of performing royal acts. The creation and suspension of substitutes will be done by national assembly by secret ballot. When the council of ministers finds that the king is disabled they report to the national assembly, together with an opinion from three physicians taken from the national medical faculties. The same procedure is followed in the case of the heir to throne.

Art. 61. The right to substitute for the king belongs to the heir of the throne if he is of age. If the heir to the throne, because of the reasons set forth in paragraph 60, cannot perform the duties of substitute, the national assembly elects by secret ballot three royal substitutes. The royal substitutes are elected for four years. After that in case the substitution has to be prolonged for at least one year, there must be a new election. If the substitution is to last longer the election is again for four years. The substitutes must be born Serbian, Croatian or Slovenian, 45 years of age and of higher education. Before they assume the royal authority the substitutes will take an oath before the national assembly that has elected them, that they will be faithful to the king and that they will rule according to the constitution and the laws of the country.

Art. 62. If one of the three substitutes is temporarily absent, the other two can perform the governmental functions without him.

Art. 63. The substitutes will supervise the education of the minor king. The property of the minor king will be supervised by guardians named in the king's will. If the deceased king has not named a guardian, they will be named by the substitutes in co-operation with the council of ministers.

Art. 64. Until the substitutes are elected, the council of ministers will temporarily execute royal authority under their own responsibility.

Art. 65. In case of death or abdication of the king the heir to the throne, if he is of age, immediately takes authority and announces the same to the people by proclamation. Within ten days he takes the prescribed oath before the national assembly. If the national assembly has adjourned earlier and the new assembly is not elected the old national assembly is reconvened.

Art. 66. If at the time of the king's death there is no male issue, but the queen is enceinte at the time of his death, the national assembly will elect temporary substitutes who will execute the king's authority only to the time of the birth. The government is obliged to put before the national assembly the opinion of three physicians taken from medical faculties of the nation as to the queen's prospects of becoming a mother. This also applies in case of the death of the crown prince if his wife should be pregnant at the time of the king's death.

Art. 67. In case the throne in accordance with this constitution is left without an heir the council of ministers will take charge of the royal powers and at once call the national assembly in special session, which will decide the matter of succession.

Art. 68. The civil list of the king will be appropriated by law. The civil list once established cannot be enlarged without the consent of the national assembly, nor diminished without the consent of the king. The king's substitutes will receive from the state treasury for the time they perform their duties the amount allowed by the national assembly at the time of their election.

SECTION 7—NATIONAL ASSEMBLY.

Art. 69. The national assembly is composed of representatives freely chosen by the people by general, equal, direct and secret ballot with representation of the minority. For every 40,000 inhabitants one representative is chosen. If the excess of inhabitants in one elective district is more than 25,000, one additional representative will be chosen for that excess. The national assembly is elected for four years. Other regulations for the election will be prescribed by law.

Art. 70. The right to vote belongs to every citizen by birth or naturalization if he is 21 years of age. Officers, active or out of service, as well as noncommissioned officers and soldiers under the colors, cannot have the privilege of voting, nor can they be candidates for office. The law will provide for woman suffrage.

Art. 71. The franchise is denied temporarily to those (1) who are sentenced to prison, until their rights are restored; (2) who are sentenced to lose their citizenship for the dura-

tion of the sentence; (3) who are public charges, and (4) who are under guardianship.

Art. 72. For representative to the national assembly only a person who has right to vote, regardless of whether his name appears on the ballot, can be elected. Every candidate must comply with the following: (1) That he is a citizen by birth or naturalization of the kingdom of Serbs, Croats and Slovenes; a naturalized citizen if he is not of the nationality of Serbs, Croats and Slovenes, must be a resident at least ten years from the date of naturalization; (2) that he is 30 years of age, and (3) that he speaks and writes the national language. A national assemblyman cannot at the same time be a government supply agent or government contractor.

Art. 73. Police, customs and forestry officials, as well as the officials of the agrarian reforms, cannot be candidates unless they have resigned one year prior to the call for the election. Other officials who perform public duty cannot be candidates in the election districts of their territorial jurisdiction. Officials who are elected to the national assembly must resign their office for the time of their tenure as assemblyman. Ministers, active and at large, and university professors may be candidates and, if elected, hold their positions.

Art. 74. Every national assemblyman represents all the people and not only those who have elected him. The voters cannot give nor the national assemblyman accept commanding and obligatory instructions. All national assemblymen take an oath that they will faithfully uphold the constitution.

Art. 75. The national assembly meets at the capitol Beograd (Belgrade), in regular session annually on the 20th day of October, unless it has been previously called by the king's decree in special session. If, in case of war, the capital is moved, the national assembly meets in the place of the temporary capital. Regular call of the national assembly cannot be made until the national budget is passed. In time of war the national assembly is permanently in session unless the assembly rules otherwise.

Art. 76. The national assembly verifies the credentials of its members and passes on them. The national assembly prescribes its own rules of order.

Art. 77. The national assembly elects from its membership its officers for every session.

Art. 78. Legislative measures are submitted by the ministers' council or individual ministers with the authority of the king. The right to present legislative measures is a privilege of the national assembly.

Art. 79. The king concludes treaties with foreign nations. However, for confirmation of those treaties the concurrence of the national assembly is necessary. For approval of purely political agreements, if they are not contrary to the constitution and the law, it is not necessary to have the confirmation of the national assembly. A treaty to allow a foreign army to occupy the territory of the kingdom or to pass over the country is not valid without first being confirmed by the national assembly. The national assembly can, when the national interests demand it, by resolution in advance authorize the ministerial council to take measures for immediate acceptance of the submitted treaty. National territory cannot be alienated or exchanged without the sanction of the national assembly.

Art. 80. The king proclaims the laws by a decree which contains also the laws adopted by national assembly. The decree is signed by all ministers. The minister of justice attaches to it the government seal and publishes the law in the "official organ." The law becomes effective fifteen days after publication in the "official organ" unless the law specifies otherwise. One day's publication in the "official organ" is sufficient.

Art. 81. The national assembly has the right of inquiry and also of investigation in elections and purely administrative questions.

Art. 82. Every member of the national assembly has the right to direct questions and interpellations to the minister. The ministers are obliged to reply during the same session within the time prescribed by the rules of order.

Art. 83. The national assembly communicates directly with the ministers only.

Art. 84. The national assemblymen, members of the government and government representatives are the only ones having right to speak in the national assembly.

Art. 85. The national assembly can legally function if one-third of all the assemblymen are present at the sessions. To carry a motion it is necessary to have a majority of the assemblymen present. In case of equal division of votes the motion is considered lost.

Art. 86. No legislative motion can be debated in the national assembly until it first has gone through the proper committees. Voting in the national assembly is public; only the elections are carried out by secret ballot. Votes can be cast only in person. On every legislative motion two votes must be taken in the same session of the national assembly before it can be finally carried.

Art. 87. At no time can any one hold an assemblyman responsible for the vote he has given as a member of the national assembly. For all statements and conduct of the national assemblymen in performing their duty in sessions of the national assembly, in committees, in special sessions or in special duties delegated to them by the assembly, the assemblymen are responsible only to the national assembly according to the rules of order.

Art. 88. Without the authority of the national assembly its members cannot be held for any offense regardless of its nature, nor can they be deprived of their freedom by any authority or for any cause as long as their mandats have not expired, except when they are apprehended in the act of actual crime or transgression. However, even in the latter case, the national assembly, if in session, is at once informed, and the national assembly gives or rejects the authority to have the trial continued during the session. The right of immunity of the national assemblyman begins on the day of his election. If any one becomes assemblyman before the sentence is pronounced on him for any offense the authorities that have the matter in charge will inform the national assembly, which will give or refuse permission to prolong the action. Members of the national assembly can be held responsible only for the acts of which they are accused.

Art. 89. The national assembly has the exclusive right to preserve order at its meetings through its president. No armed force can be placed in the building of the national assembly nor its grounds without the permission of the president of the national assembly; without its permission no government agents can perform any of its functions in the national assembly. No one carrying arms can enter the grounds of the national assembly except persons who are authorized to carry weapons and are on duty at national assembly.

SECTION 8—ADMINISTRATIVE AUTHORITY.

Art. 90. The ministerial council is composed of all the ministers and stands immediately under the king. The king names the president and members of the ministerial council. Ministers are placed at the heads of respective branches of the government authority. A minister can be without portfolio. State under-

secretaries can be appointed in the ministries should a need require them for a specified part of duties in that branch of government service. The state undersecretaries, if they are taken from the national assembly, do not lose their mandats. The ministers name subordinate government officials according to the provisions of the law. The ministers take an oath before entering upon their duties of fidelity to the constitution and the king.

Art. 91. The ministers are responsible to the king and the national assembly. The king and the national assembly can accuse ministers for violation of the constitution and the country's laws while in official positions. For damages done by ministers, by unlawful acts, the state is responsible.

Art. 92. A minister can be accused during the time of his service and for five years after leaving office. A motion to accuse the minister must be made in writing and contain the charges. When the national assembly accuses a minister a decision as to whether or not the minister be placed on trial must be brought by two-thirds of the votes of the members present.

Art. 93. The ministers are tried before the state court. The state court is composed of six state counselors and six Supreme court judges, who are chosen by their respective bodies by a ballot in a plenary meeting. The president of the Supreme court is the president of the state court. For deeds which are not provided for in the criminal code the punishment will be fixed by the law of ministerial responsibilities. More detailed directions regarding ministers' responsibilities are to be embodied in a separate law.

Art. 94. Administrative authority can issue ordinances necessary for the application of the law. Administrative authority may, with an ordinance of legal force, regulate conditions only on the basis of lawful authority, which is to govern separately in every instance. The ordinance must not be contrary to the constitution or the law in behalf of whose application they are given. They cannot be contrary to the legislative provisions on the grounds of which they have been prescribed. The national assembly can by a resolution place the ordinance given it by the authority of the law out of force in whole or part. The ordinances must be published and in them must always be indicated the law on the ground of which they were given.

Art. 95. The administration in the kingdom is executed by provinces, districts, counties and municipalities. Division of governments is done by law, in accordance with natural, social and economical conditions. A province can have at the most 800.000 inhabitants. Two or more smaller provinces can unite in one larger one. The final decision rests with the provincial conventions of the said provinces, and such a province cannot have more than 800.000 inhabitants. At the head of every province is a governor, who is appointed by the king and governs through the state's agencies the affairs of the state administration in the province.

Art. 96. For the affairs of a local character of the municipality, county, district and province a municipal, county district and provincial home rule is established and organized upon the principle of elections. For the home rule and self-administration of cities a special law will be enacted. In the line of provincial home rule authorities are these duties:

(1) Provincial finances: (a) Making of provincial budget; (b) disposition of provincial taxation, which is payable according to law to cover the provincial expenditures.

(2) Provincial public works; also building laws.

(3) Attending to advancement of provincial economic interests—farming, stock raising, wine growing, fruit growing, forestry, river and lake fishing, hunting—as well as technical and agricultural betterments.

(4) Administration of provincial property.

(5) Supervision of the national health in the province and making all provisions for the betterment of health conditions in the province.

(6) Supervision of social tasks in the province.

(7) The humanitarian institutions in the province.

(8) Transportation institutions in the province.

(9) Contributions to the advancement of culture in the province.

(10) Contributions to special education in the province.

(11) Instituting and maintaining organizations for savings, mutual benefits and insurance.

(12) Giving opinions at the request of the government as to the advisability of proposed laws that have to do with the province and in general in all other objects for which the government asks their opinion. Other matters also can be intrusted by law to the home rule authorities of the province.

If in some of the enumerated conditions the province cannot perform by its own means the government will, upon the application of the provincial assembly and according to the decision of the national assembly, give the necessary means, or will itself carry out the undertakings.

Art. 97. Home rule units have their own yearly budgets. The administration of the home rule units is under the supervision of the minister of finances and the supreme controller and will be regulated by special law.

Art. 98. Agencies of the provincial administration are the provincial assembly and the provincial committee. The provincial and county assemblies elect their own presidents, who preside at their meetings; they choose also the local provincial and county committees. According to law, with exceptions, combined authority can be provided for the same objects of state and home-rule competence in the province. The governor is the supreme authority of the general state administration in the province, in so far as there do not exist, according to law, for special affairs of state, special administrative authorities for one or more provinces. The law provides which of the states' functions are decided by the governor, with the advice of the provincial committee. Detailed regulations regarding organization and competent home-rule bodies, of municipality, county, district and province, will be enacted by special legislation.

Art. 99. The provincial assembly has the right to establish provincial regulations in all questions within its jurisdiction. Provincial regulations are proclaimed by the governor. The provincial governor will not proclaim regulations which he finds are not based upon the constitution and the law. In that case he sends such regulations with his opinion to the state council for decision and advises the competent minister. If the state council finds that the order is not based on the constitution or some law it will not be proclaimed or published. The state council is bound to make its decision within two months. If the state council does not make the decision in that time it becomes operative.

Art. 100. The provincial committee prescribes regulations for performing the provincial functions.

Art. 101. The state administrative authorities supervise the activities of the home-rule authorities through the provincial governor and other special organs. The provincial gov-

ernor has the power to suspend the enforcement of any decision of the home-rule officers that is not based upon the constitution, the law or the provincial regulations. A complaint can be filed against the decision of the governor with the state council, within the time provided by law.

Art. 102. For disagreements of an administrative nature administration courts are established. The law will provide their locality, jurisdiction and organization.

Art. 103. The state council is the supreme administrative court. Members of the state council are appointed by the king on the motion of the president of the council of ministers and in the following manner: One-half of the members are named by the king from twice the number of names submitted by the national assembly; the national assembly elects the other half from a like number and in a like manner submitted by the king. The filling of vacant places in the state council will be done by especially formulated laws, which may obviate the above principles. For members of the state council only the higher public officials or men in public life who have a higher education and have been for ten years in government service or public work can be appointed. At least two-thirds of the members of the state council must have diplomas of qualification as having finished law studies. Members of the state council can be removed from their places, moved to other branches of the government service and placed on pension only upon the judgment of the court. When they arrive at the age of 70 years or when through illness they cannot perform their duties they will be placed on pension.

The duties of the state council are: (1) As the supreme administrative court it decides conflicts of an administrative nature. Conflicts based on complaints against the decree and ministerial decisions are decided by the state council in the first and last instance. (2) As the administrative organ of the supreme state administration it decides acts of administrative nature for which it is necessary to have its consent by special laws. (3) It performs supervising duties over the home-rule bodies by order of the law. (4) It decides conflicts of jurisdiction between the state and the administrative authorities, and also decides conflicts of jurisdiction between the state and the home-rule authorities. (5) It also decides other questions that are placed by the law in its jurisdiction. Detailed regulations regarding the composition of jurisdictions and procedure in the state council will be prescribed by special law.

Art. 104. State jurisdictions are established by and according to rules prescribed by law.

Art. 105. The law will prescribe the manner in which the officials will be appointed.

Art. 106. Professions in government service, rights and duties, salaries and pensions of government officials in all branches will be regulated by law for officials.

Art. 107. Government employes are agents of the whole government and are obliged to work in the common interest of the state. The use of authority and position by the government employes for partisan aims, as well as the use of influence by the supervisors of government employes in that direction, will be punished by law.

Art. 108. Any employe who is guaranteed a permanent position by the law cannot be discharged against his wish without being sentenced by a regular criminal or disciplinarian court.

SECTION 9—THE COURTS' AUTHORITY.

Art. 109. The courts are independent. In dealing justice they do not stand under any authority, but administer justice by law. Courts and court jurisdictions can be established only by law. Under no circumstances can special courts be established as commissions for investigations.

Art. 110. For the entire kingdom only one Supreme court exists, with sittings at Zagreb. The Supreme court has also authority to decide conflicts of competency between administrative, civil or military authorities and judicial authorities. In the same manner it is competent to decide conflicts of jurisdiction between administrative and regular courts.

Art. 111. The appointment of Supreme and Appellate court judges and the presidents of lower courts is done by the king's decree on the motion of the minister of justice, from the number of candidates which are chosen by the nominating body, whose composition will be closely defined by law.

Art. 112. Judges of all courts are permament. A judge cannot be deprived of his position nor for any reason be removed from his duty against his will, without a sentence by the regular courts or the Supreme court. A judge cannot be accused in respect to his judicial duty without the permission of the competent Appellate court. For members of the higher courts this permission is given by the Supreme court. A judge cannot be placed even temporarily to perform any other paid or unpaid public service, without his consent and the approval of the Supreme court. A judge can be transferred only by his own consent. A judge can be in service to the end of his 65th year and presidents of the Supreme and Appellate courts to the end of their 70th year. Before that time a judge can be placed on pension only by written application or when he is physically disabled or mentally unable to perform his duties. Decision as to pensioning in this last instance is given by the Supreme court.

SECTION 10—THE GOVERNMENT FINANCES.

Art. 113. Every year the national assembly approves the state budget, which is good for one year. The budget must be submitted to the national assembly at the latest one month from the date it convenes. At the same time with the budget must be submitted to the national assembly for examination and approval the final report for the last past fiscal year. The national assembly cannot increase the submitted items, but it can lower or omit them. The budget is approved by sections. The form of making and executing of the budget is prescribed by law. Saving from one item of the budget or of the budget year cannot be used for payment of other items or for another year, without the consent of the national assembly.

Art. 114. Until it has approved the submitted budget the national assembly can approve one-twelfth of the budget for one or more months. If the national assembly is adjourned before the budget is decided, the budget of the expiring fiscal year is prolonged by decree, at the longest for four months.

Art. 115. Government taxes and general government incomes are regulated by law. State loans are decided by national assembly. The government is obliged to submit to the national assembly a true certified report approved by the supreme controller if the agreement for the loan is made and executed according to law.

Art. 116. Tax obligations are general and all the government taxes are equal for the entire country. Taxes are paid according to taxable capacity and progressively. The king and the heir to the throne pay government tax on private property. No aid, permanent or temporary, nor gifts or compensation, can be given out of the government's treasury if they are not based on the law.

Art. 117. The minister of finance directs the state property in so far as the law does not provide otherwise. Special laws will be enacted for the disposal of government property. The right of monopoly appertains to the state. Minerals and natural water powers are property of the state. Special laws will be enacted for the giving of mining, industrial or any other concessions.

Art. 118. For auditing state accounts and supervising the execution of state and provincial budgets there exists a chief controller as supreme accounting court. The president and members of the supreme control are chosen by the national assembly from the nominating list, which is arranged by the state council and on which there are nominated twice as many candidates as there are vacant places. The president and one-half of the members of the supreme control must be jurists. Other members must have been ministers of finance or they must have ten years of executive financial service. The president and members of the supreme control enjoy the same right of being irremovable as the members of state council. Detailed regulations as to construction and competent procedure of the supreme control will be enacted by separate law. In what cases, against the decision of the supreme control, a complaint to the Supreme court will have a place will be decided by law. The supreme control inspects, corrects and liquidates accounts of general administration and all those obliged to render accounts to the state treasury. It sees that no expenditures are made in excess of the budget and that no part of the budget is transferred from one section of the budget to the other. It closes the accounts of all state administrations and is obliged to collect all necessary evidence and information. Final state accounts are submitted to the national assembly for approval with remarks of the supreme controller, and that, at the latest, within one year, counting from the end of each fiscal year.

SECTION 11—THE ARMY.

Art. 119. Military service is general as prescribed by law. The organization and strength of the army and navy are also prescribed by law. The formation of units is ordered by the king at the suggestion of the ministers of war and the navy. The size of the standing army shall be determined each year at the time of making the budget.

Art. 120. Military courts are independent. In the execution of justice they are under no other authority, but their judgments shall be according to law. Judges of the military court of appeals are appointed for life. The tenure of office of judges of the first instance of military courts will be prescribed by law. Judges of the first instance of military courts cannot be impeached for their judicial acts without the sanction of the military court of appeals, nor judges of the Appellate court without the consent of the Supreme court. Judges of the military court of appeals may be transferred only at their own request or if elevated to a higher office and judges of the first instance of the military court according to law. The findings of the military courts are to be reviewed by the Supreme court as the court of last resort.

Art. 121. Law violations committed by citizens and soldiers together will be tried before civil tribunals, except in time of war, when they will be tried by military courts.

Art. 122. No one over 20 years of age shall be eligible to appointment under the government or remain in the same unless he has complied with the rules of the military authorities as to military service performed or has been exempted from such service by the same authorities.

Art. 123. The army can be employed for the preserving of law and order in local affairs only upon the request of local authorities.

Art. 124. Aliens shall not be recruited as soldiers of the nation, nor can the army of the nation be placed in the service of any other nation without having previously obtained the sanction of the national assembly.

SECTION 12—AMENDMENTS TO THE CONSTITUTION.

Art. 125. Amendments to the constitution shall be made by the national assembly with the consent of the king.

Art. 126. Motions to amend or alter the constitution shall be made by the king and the national assembly. When such a motion to amend or alter the constitution is made all such amendments or changes must be presented in writing. If the motion to amend is made by the king it will be communicated to the national assembly and the national assembly will then adjourn and a new one will be called at the latest within four months. If such a motion is introduced by the national assembly it shall be debated in the manner contemplated for the solution of statutory laws by a three-fifths majority vote of the entire membership. When such a motion is passed the national assembly will be dissolved and a new one shall be called within four months of the passage of such motion. In either event the national assembly can only discuss the amendments or changes in the constitution as per original call. The vote of the national assembly shall be based on a majority of one-half, plus one, of the total number of its membership.

Art. 127. In the event of war or general mobilization the national assembly may for the whole of the national territory, or in the case of armed insurrection for the insurgent district, enact temporary emergency laws abrogating the following rights of citizens: The right of assembly, free speech, liberty of movement, immunity of domicile, correspondence and telegraphic communication. In the same manner the freedom of the press may be abridged in case of armed insurrection in the district so affected.

SECTION 13—GENERAL INSTRUCTIONS.

Art. 128. At the first meeting of the national assembly after the proclamation of the constitution the heir to the throne, Alexander, as the representative of King Peter I., as per paragraph 58 of the constitution, will take the following oath:

"In the name of his majesty King Peter I. I swear before the Almighty God that I will uphold the constitution without any mental reservations, that I will rule by it and by the laws, that I will safeguard the liberties of the people, the independence of the state and the entity of the national authorities and that in all my actions and deeds will have before me the welfare of the people. So help me God. Amen."

Art. 129. After this each of the national representatives in meeting assembled and before the speaker of the house will take the following oath:

"I (name) swear before the Almighty God and all that is under the law most sacred to me and in this world the most precious that I will in the discharge of my legislative duties have the welfare of the nation before me as the paramount issue and will fulfill my duties that the welfare of the king and people and the sovereignty of the nation may be executed to the best of my knowledge and belief."

Art. 130. Temporary laws, rules, regulations and findings of the council of ministers and all other acts and decisions of a definite duration which are of a statuory nature are in

force from Dec. 1, 1918, until the day of the proclamation of this constitution; said laws will be in force until they are amended or repealed. Within thirty days from the promulgation of the constitution it will be the duty of the government to give to the legislative body for examination all such provisional laws, rules, regulations, statutes and decisions. The committee, divided into sections according to the branch of the national administration, after passing upon them, will pass in committee of the whole on which of said laws shall remain in force without change, which are to be amended and which repealed. The unreported temporary laws, rules, regulations and decisions of the council of ministers and all other acts and laws of a temporary legal nature are hereby repealed. The findings of the committee will be proclaimed as law. Those upon which the committee does not report will remain in full force until such time as they are changed in the regular legislative manner. All temporary laws, rules, statutes and decisions which are of a legal nature of the ministerial council with reference to the agrarian problem of the nation, the national banks of the Serbs, Croats and Slovenes, and the liquidation of the moratorium, liquidation of the legal status created by the war, and the reparation for damages caused by the war, rules pertaining to the loan and the simplifying of the judiciary can only be changed in a legislative manner.

Art. 131. Until such time as the constitution goes into effect the administration of the ministry, of the national council, of the supreme control, of the rules of order in the national council and of the ministerial responsibilities, the laws now existing in the kingdom of Serbia are hereby extended to the rest of the country with such amendments and additions as will be enacted in the manner as prescribed in article 133.

Art. 132. In accordance with article 57 of this constitution until the new statutes are in force the ones enacted by order of the king on Aug. 30, 1909, and published in the "Serbian Press" Feb. 26, 1911, will be in effect.

Art. 133. For the equalization and administration of the laws in the land a shorter method is the following: All legal motions which have as their basis the co-ordination of laws and administration will be introduced either by the government or by individual representatives to the legislative committee through its chairman. The report of the legislative committee relative to the motion which the committee has adopted is sent to the national assembly for final action. Of these legal motions the assembly votes the bill in its entirety with a roll-call vote and first reading before the full house, whether they are passed or rejected. Before voting is in order, one representative from each parliamentary group may address the house upon the motion with a limited speech. Such a shorter method for the uniformity of legislation and administration in the nation may be for five years from the time that this constitution goes into effect, but such time may be extended legally. During the sitting of the constitutional assembly as a legislative body the constitutional committee will fulfill the duties of the legislative committee.

Art. 134. After the constitution goes into effect the present provisional authorities will remain as such temporarily, each with a provisional governor named by the king on the recommendation of the minister of the interior. The provisional governor will administer the province through and with the chiefs of the department and under the immediate supervision of the minister of the interior and as the agents of competent ministers, and the basis of the existing laws and regulations. Laws enacted after this constitution goes into effect shall not give to the provisional administration new duties. In the gradual transfer of the affairs of the administration of the provinces to the several ministries and authorities as per rules issued in article 135, the council of ministers after due representation from the provisional governor will decide. As long as the provisional administration is in force the bureaus of the several ministries in the provinces are bound to confer and learn the views of the province's representatives as to their bills which are of a general character or that have any bearing on civil service employes before the ministerial decision. The parties have the right to be heard before the national council relative to administrative contentions, which are decided by the temporary provisional administration as the first and last. For this duty the national council will prepare whatever is necessary. Administrative contention may only exist between a private individual or a person of the legal calling on the one side and the administrative authorities on the other; and it exists then where through an order or decision of the administrative authorities the rights of the private individual or of the individual of the legal calling are interfered with in contravention of law.

Art. 135. The government law relating to the division of the land to provinces and the regulation of provinces as per articles 95 and 96, as well as the transfer of the present provincial sovereignty to the ministry and provincial administrations as per article 134, shall be brought by the government before the national assembly for passage. If the national assembly does not pass these laws within three months they will be brought up according to article 133 for the uniformity of the code and administration of the land, and if even after this shorter method these laws are not enacted within two months then the crown will issue an order whereby the land shall be divided within one month, together with the apportionments of the provincial administration as per articles 95 and 96 of the constitution. This order may be changed only by legislative action. If the division of the land cannot be accomplished either by the first or second part of this article, but it is so passed by the third, then it shall be established in Croatia and Slavonia for administrative authorities. With the law of the division of authority Bosnia and Herzegovina will be divided in authority in their present border. Until the passage of such a law the counties in Bosnia and Herzegovina will be considered as the de facto authority. The amalgamation of these authorities will be accomplished by the decision of the provincial assembles of the said provinces and carried by a majority of two-thirds votes, according to the provision in the third section of article 95 of the constitution. Each municipality or district may secede from its present allegiance and join a different municipal authority in the present borders of Bosnia and Herzegovina or outside of them if that is accepted by their self-governing representatives by a vote of three-fifths and if such a decision is authorized by the national assembly. The counties will remain as units of the national administration until such time as they are abolished by law; their authority will be regulated by law.

Art. 136. Until the new law affecting the employes (government officials), as per article 106 of the constitution, the laws now in effect shall be the law governing their duties and rights. The new law shall embody the temporary orders with the object of revision and co-ordination of the personnel of the administrative officials and must be brought up for action not later than two years after the

passage of the constitution, by which time the revision and co-ordination of the government officials must be completed.

Art. 137. The president of tribunals (chief justices) and all other judges whose appointment under the constitution or the statutes is of a permanent nature shall not be removed, but they will retain their positions and fulfill their duties in the judiciary as heretofore. In the other parts of the nation, except what was originally Serbia proper, the tenure of office of individual judges may be terminated within one year from the enactment of this constitution. In that time the minister of justice will inform the commissions of the higher tribunals of these districts and together they will decide which of the judges are to be considered as not coming under the provision of the law excluding them from the permanent tenure of office. The necessary filling of the places thus made vacant by chief justices and other judges will be done according to the statutes now existing. Judges who were or will be appointed under the provision of the statutes for temporary appointment to official positions during the war, or under any other law or ordinance, are directed within one and one-half years from the enactment of this constitution to take the examination for judges. Those who fail to do so in the prescribed time will by such failure forfeit their positions. The Supreme court of Beograd, the court of one hundred and seven in Zagreb, the high court of Sarajevo, the high court of Podgoriza and the branch of the Supreme court of Novi Sad will function as heretofore until the formation of the Supreme court for the whole nation. In the interim they will be considered as branches of the Supreme court.

Art. 138. The publication and distribution of newspapers and printed matter may be prohibited which advocate hatred toward the government as a whole, religious or class hatred, and also when they appeal to the citizenry to resort to violence having for its object the overthrow of the constitution or the laws of the land by force, if from the contents it is plainly implied that the intent is to bring about such overthrow by citizenry. Section 13, article 3, of the law as to the enforcement of the prohibition is valid in this instance. When the necessity for these measures ceases to exist these laws may be repealed in the legal way.

Art. 139. Until such time as a law is enacted relative to privileges (grants or concessions) as to article 117 of the constitution all such privileges (grants or concessions) until the time of the enactment of the constitution shall be revised in the manner as provided in article 133 of the constitution. The privilege for the clearing of the national forests shall be revised in so far as the price (or tax) shall have retroactive value from Dec. 1, 1918.

Art. 140. When this constitution becomes effective the constitutional assembly, elected on the 28th day of November, 1920, automatically (ipso facto) becomes the regular legislative assembly, with a definite time for its sittings as provided in the election laws for the constitutional assembly.

Art. 141. Until such time as a new code is enacted relative to the election of national representatives the law under which the election of November, 1920, was held shall be held valid, with the changes which shall be brought in harmony with the constitution. These changes will be brought in the manner as contemplated in article 133 of this constitution and will become valid when they receive the king's sanction. The committee may make the necessary changes in terms which the law contemplates, and besides that it is empowered to prescribe the manner in which the division of the mandats shall be made on each list of candidates according to the number of voters.

SECTION 14—FINAL RULES.

Art. 142. This constitution with the orders becomes a law when it is countersigned by the king, and it gets its binding strength when it is published in the "official organs." From that day all other laws or regulations which are contrary to it are hereby revoked. For the execution of this constitution the president and all the ministers of the ministerial council shall be responsible. We recommend to the ministers that this constitution be given publicity and to see that it is carried out. To the authorities, then, we command that they shall govern according to it and to all and everybody to obey it.

(Signed) ALEXANDER.

FEDERAL REVENUE LAW OF 1921.

Following is a synopsis of the federal revenue law passed by congress and approved by President Harding Nov. 23, 1921:

INCOME TAX—INDIVIDUALS.

Normal Tax.

Sec. 210. That in lieu of the tax imposed by section 210 of the revenue act of 1918 there shall be levied, collected and paid for each taxable year upon the net income of every individual a normal tax of 8 per centum of the amount of the net income in excess of the credits provided in section 216: Provided, That in the case of a citizen or resident of the United States the rate upon the first $4,000 of such excess amount shall be 4 per centum.

Surtax.

Sec. 211. (a) That in lieu of the tax imposed by section 211 of the revenue act of 1918, but in addition to the normal tax imposed by section 210 of this act, there shall be levied, collected and paid for each taxable year upon the net income of every individual:

(1) For the calendar year 1921 a surtax equal to the sum of the following:

1 per centum of the amount by which the net income exceeds $5,000 and does not exceed $6,000;

2 per centum of the amount by which the net income exceeds $6,000 and does not exceed $8,000;

3 per centum of the amount by which the net income exceeds $8,000 and does not exceed $10,000;

4 per centum of the amount by which the net income exceeds $10,000 and does not exceed $12,000;

5 per centum of the amount by which the net income exceeds $12,000 and does not exceed $14,000;

6 per centum of the amount by which the net income exceeds $14,000 and does not exceed $16,000;

7 per centum of the amount by which the net income exceeds $16,000 and does not exceed $18,000;

8 per centum of the amount by which the net income exceeds $18,000 and does not exceed $20,000;

9 per centum of the amount by which the net income exceeds $20,000 and does not exceed $22,000;

10 per centum of the amount by which the net income exceeds $22,000 and does not exceed $24,000;

11 per centum of the amount by which the net income exceeds $24,000 and does not exceed $26,000;

12 per centum of the amount by which the net income exceeds $26,000 and does not exceed $28,000;

13 per centum of the amount by which the net income exceeds $28,000 and does not exceed $30,000;

14 per centum of the amount by which the net income exceeds $30,000 and does not exceed $32,000;

15 per centum of the amount by which the net income exceeds $32,000 and does not exceed $34,000;

16 per centum of the amount by which the net income exceeds $34,000 and does not exceed $36,000;

17 per centum of the amount by which the net income exceeds $36,000 and does not exceed $38,000;

18 per centum of the amount by which the net income exceeds $38,000 and does not exceed $40,000;

19 per centum of the amount by which the net income exceeds $40,000 and does not exceed $42,000;

20 per centum of the amount by which the net income exceeds $42,000 and does not exceed $44,000;

21 per centum of the amount by which the net income exceeds $44,000 and does not exceed $46,000;

22 per centum of the amount by which the net income exceeds $46,000 and does not exceed $48,000;

23 per centum of the amount by which the net income exceeds $48,000 and does not exceed $50,000;

49 per centum of the amount by which the net income exceeds $150,000 and does not exceed $200,000;
50 per centum of the amount by which the net income exceeds $200,000.

(b) In the case of a bona fide sale of mines, oil or gas wells, or any interest therein, where the principal value of the property has

been demonstrated by prospecting or exploration and discovery work done by the taxpayer, the portion of the tax imposed by this section attributable to such sale shall not exceed, for the calendar year 1921, 20 per centum, and for each calendar year thereafter 16 per centum, of the selling price of such property or interest.

Net Income of Individuals Defined.

Sec. 212. (a) That in the case of an individual the term "net income" means the gross income as defined in section 213, less the deductions allowed by section 214.

(b) The net income shall be computed upon the basis of the taxpayer's annual accounting period (fiscal year or calendar year, as the case may be) in accordance with the method of accounting regularly employed in keeping the books of such taxpayer; but if no such method of accounting has been so employed, or if the method employed does not clearly reflect the income, the computation shall be made upon such basis and in such manner as in the opinion of the commissioner does clearly reflect the income. If the taxpayer's annual accounting period is other than a fiscal year as defined in section 200, or if the taxpayer has no annual accounting period or does not keep books, the net income shall be computed on the basis of the calendar year.

(c) If a taxpayer changes his accounting period from fiscal year to calendar year, from calendar year to fiscal year, or from one fiscal year to another, the net income shall, with the approval of the commissioner, be computed on the basis of such new accounting period, subject to the provisions of section 226.

Gross Income Defined.

Sec. 213. That for the purposes of this title (except as otherwise provided in section 233) the term "gross income"—

(a) Includes gains, profits and income derived from salaries, wages or compensation for personal service (including in the case of the president of the United States, the judges of the Supreme and inferior courts of the United States and all other officers and employes, whether elected or appointed, of the United States, Alaska, Hawaii or any political subdivision thereof, or the District of Columbia, the compensation received as such), of whatever kind and in whatever form paid, or from professions, vocations, trades, businesses, commerce or sales, or dealings in property, whether real or personal, growing out of the ownership or use of or interest in such property; also from interest, rent, dividends, securities or the transaction of any business carried on for gain or profit, or gains or profits and income derived from any source whatever. The amount of all such items (except as provided in subdivision (e) of section 201) shall be included in the gross income for the taxable year in which received by the taxpayer, unless, under methods of accounting permitted under subdivision (b) of section 212, any such amounts are to be properly accounted for as of a different period;

(b) Does not include the following items, which shall be exempt from taxation under this title:

(1) The proceeds of life insurance policies paid upon the death of the insured;

(2) The amount received by the insured as a return of premium or premiums paid by him under life insurance, endowment or annuity contracts, either during the term or at the maturity of the term mentioned in the contract or upon surrender of the contract;

(3) The value of property acquired by gift, bequest, devise or descent (but the income from such property shall be included in gross income);

(4) Interest upon (a) the obligations of a state, territory or any political subdivision thereof, or the District of Columbia, or (b) securities issued under the provisions of the federal farm loan act of July 17, 1916, or (c) the obligations of the United States or its possessions, or (d) bonds issued by the War Finance corporation. In the case of obligations of the United States issued after Sept. 1, 1917 (other than postal savings certificates of deposit); and in the case of bonds issued by the War Finance corporation, the interest shall be exempt only if and to the extent provided in the respective acts authorizing the issue thereof as amended and supplemented, and shall be excluded from gross income only if and to the extent it is wholly exempt to the taxpayer from income, war-profits and excess-profits taxes;

(5) The income of foreign governments received from investments in the United States in stocks, bonds or other domestic securities owned by such foreign governments, or from interest on deposits in banks in the United States of moneys belonging to such foreign governments, or from any other source within the United States.

(6) Amounts received through accident or health insurance or under workmen's compensation acts as compensation for personal injuries or sickness, plus the amount of any damages received whether by suit or agreement on account of such injuries or sickness;

(7) Income derived from any public utility or the exercise of any essential governmental function and accruing to any state, territory or the District of Columbia, or any political subdivision of a state or territory, or income accruing to the government of any possession of the United States, or any political subdivision thereof.

(8) The income of a nonresident alien or foreign corporation which consists exclusively of earnings derived from the operation of a ship or ships documented under the laws of a foreign country which grants an equivalent exemption to citizens of the United States and to corporations organized in the United States;

(9) Amounts received as compensation, family allotments and allowances under the provisions of the war risk insurance and the vocational rehabilitation acts, or as pensions from the United States for service of the beneficiary or another in the military or naval forces of the United States in time of war;

(10) So much of the amount received by an individual, after Dec. 31, 1921, and before Jan. 1, 1927, as dividends or interest from domestic building and loan associations, operated exclusively for the purpose of making loans to members, as does not exceed $300;

(11) The rental value of a dwelling house and appurtenances thereof furnished to a minister of the gospel as part of his compensation;

(12) The receipts of shipowners' mutual protection and indemnity associations, not organized for profit, and no part of the net earnings of which inures to the benefit of any private stockholder or member, but such corporations shall be subject as other persons to the tax upon their net income from interest, dividends and rents.

(c) In the case of a nonresident alien individual, gross income means only the gross income from sources within the United States, determined under the provisions of section 217.

Deductions Allowed Individuals.

Sec. 214 (a) That in computing net income there shall be allowed as deductions:

(1) All the ordinary and necessary expenses paid or incurred during the taxable year in

carrying on any trade or business, including a reasonable allowance for salaries or other compensation for personal services actually rendered; traveling expenses (including the entire amount expended for meals and lodging) while away from home in the pursuit of a trade or business; and rentals or other payments required to be made as a condition to the continued use or possession, for purposes of the trade or business, of property to which the taxpayer has not taken or is not taking title or in which he has no equity;

(2) All interest paid or accrued within the taxable year on indebtedness, except on indebtedness incurred or continued to purchase or carry obligations or securities (other than obligations of the United States issued after Sept. 24, 1917, and originally subscribed for by the taxpayer) the interest upon which is wholly exempt from taxation under this title;

(3) Taxes paid or accrued within the taxable year except (a) income, war profits and excess-profits taxes imposed by the authority of the United States, (b) so much of the income, war-profits and excess-profits taxes, imposed by the authority of any foreign country or possession of the United States, as is allowed as a credit under section 222; (c) taxes assessed against local benefits of a kind tending to increase the value of the property assessed, and (d) taxes imposed upon the taxpayer upon his interest as shareholder or member of a corporation, which are paid by the corporation without reimbursement from the taxpayer. For the purpose of this paragraph estate, inheritance, legacy and succession taxes accrue on the due date thereof except as otherwise provided by the law of the jurisdiction imposing such taxes;

(4) Losses sustained during the taxable year and not compensated for by insurance or otherwise, if incurred in trade or business;

(5) Losses sustained during the taxable year and not compensated for by insurance or otherwise, if incurred in any transaction entered into for profit, though not connected with the trade or business; but in the case of a nonresident alien individual only if and to the extent that the profit, if such transaction had resulted in a profit, would be taxable under this title. No deduction shall be allowed under this paragraph for any loss claimed to have been sustained in any sale or other disposition of shares of stock or securities made after the passage of this act where it appears that within thirty days before or after the date of such sale or other disposition the taxpayer has acquired (otherwise than by bequest or inheritance) substantially identical property, and the property so acquired is held by the taxpayer for any period after such sale or other disposition. If such acquisition is to the extent of part only of substantially identical property, then only a proportionate part of the loss shall be disallowed;

(6) Losses sustained during the taxable year of property not connected with the trade or business (but in the case of a nonresident alien individual only property within the United States) if arising from fires, storms, shipwreck or other casualty, or from theft, and if not compensated for by insurance or otherwise. In case of losses arising from destruction of or damage to property, where the property so destroyed or damaged was acquired before March 1, 1913, the deduction shall be computed upon the basis of its fair market price or value as of March 1, 1913;

(7) Debts ascertained to be worthless and charged off within the taxable year (or, in the discretion of the commissioner, a reasonable addition to a reserve for bad debts); and when satisfied that a debt is recoverable only in part, the commissioner may allow such debt to be charged off in part;

(8) A reasonable allowance for the exhaustion, wear and tear of property used in the trade or business, including a reasonable allowance for obsolescence. In the case of such property acquired before March 1, 1913, this deduction shall be computed upon the basis of its fair market price or value as of March 1, 1913;

(9) In the case of buildings, machinery, equipment or other facilities erected, installed or acquired on or after April 6, 1917, for the production of articles contributing to the prosecution of the war against the German government, and in the case of vessels constructed or acquired on or after such date for the transportation of articles or men contributing to the prosecution of such war, there shall be allowed, for any taxable year ending before March 3, 1924 (if claim therefor was made at the time of filing return for the taxable year 1918, 1919, 1920 or 1921) a reasonable deduction for the amortization of such part of the cost of such facilities or vessels as has been borne by the taxpayer, but not again including any amount otherwise allowed under this title or previous acts of congress as a deduction in computing net income. At any time before March 3, 1924, the commissioner may re-examine the return, and if he then finds that the deduction originally allowed was incorrect, the income, war-profits and excess-profits taxes for the year or years affected shall be redetermined.

(10) In the case of mines, oil and gas wells, other natural deposits and timber, a reasonable allowance for depletion and for depreciation of improvements, according to the peculiar conditions in each case, based upon cost including cost of development not otherwise deducted.

(11) Contributions or gifts made within the taxable year to or for the use of: (a) The United States, any state, territory or any political subdivision thereof, or the District of Columbia, for exclusively public purposes; (b) any corporation or community chest, fund or foundation, organized and operated exclusively for religious, charitable, scientific, literary or educational purposes, including posts of the American Legion or the women's auxiliary units thereof, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private stockholder or individual; or (c) the special fund for vocational rehabilitation authorized by section 7 of the vocational rehabilitation act, to an amount which in all the above cases combined does not exceed 15 per centum of the taxpayer's net income as computed without the benefit of this paragraph.

(12) If property is compulsorily or involuntarily converted into cash or its equivalent as a result of (a) its destruction in whole or in part, (b) theft or seizure, or (c) an exercise of the power of requisition or condemnation or the threat or imminence thereof, and if the taxpayer proceeds forthwith in good faith, under regulations prescribed by the commissioner with the approval of the secretary, to expend the proceeds of such conversion in the acquisition of other property of a character similar or related in service or use to the property so converted, or in the acquisition of 80 per centum or more of the stock or shares of a corporation owning such other property, or in the establishment of a replacement fund, then there shall be allowed as a deduction such portion of the gain derived as the portion of the proceeds so expended bears to the entire proceeds. The provisions of this paragraph shall apply so far as may be practicable to the exemption or exclusion of such pro-

ceeds or gains from gross income under prior income, war-profits and excess-profits tax acts.

Items Not Deductible.

Sec. 215. (a) That in computing net income no deduction shall in any case be allowed in respect of:

(1) Personal, living or family expenses;

(2) Any amount paid out for new buildings or for permanent improvements or betterments made to increase the value of any property or estate;

(3) Any amount expended in restoring property or in making good the exhaustion thereof for which an allowance is or has been made; or

(4) Premiums paid on any life insurance policy covering the life of any officer or employe, or of any person financially interested in any trade or business carried on by the taxpayer, when the taxpayer is directly or indirectly a beneficiary under such policy.

(b) Amounts paid under the laws of any state or foreign country as income to the holder of a life or terminable interest acquired by gift, bequest or inheritance shall not be reduced or diminished by any deduction for shrinkage in the value of such interest due to the lapse of time, nor by any deduction allowed by this act for the purpose of computing the net income of an estate or trust but not allowed under the laws of such state or foreign country for the purpose of computing the income to which such holder is entitled.

Credits Allowed Individuals.

Sec. 216. That for the purpose of the normal tax only there shall be allowed the following credits:

(a) The amount received as dividends (1) from a domestic corporation other than a corporation entitled to the benefits of section 262, or (2) from a foreign corporation when it is shown to the satisfaction of the commissioner that more than 50 per centum of the gross income of such foreign corporation for the three-year period ending with the close of its taxable year preceding the declaration of such dividends (or for such part of such period as the corporation has been in existence) was derived from sources within the United States as determined under the provisions of section 217;

(b) The amount received as interest upon obligations of the United States and bonds issued by the War Finance corporation, which is included in gross income under section 213;

(c) In the case of a single person a personal exemption of $1,000; or in the case of the head of a family or a married person living with husband or wife, a personal exemption of $2,500, unless the net income is in excess of $5,000, in which case the personal exemption shall be $2,000. A husband and wife living together shall receive but one personal exemption. The amount of such personal exemption shall be $2,500, unless the aggregate net income of such husband and wife is in excess of $5,000, in which case the amount of such personal exemption shall be $2,000. If such husband and wife make separate returns, the personal exemption may be taken by either or divided between them. In no case shall the reduction of the personal exemption from $2,500 to $2,000 operate to increase the tax which would be payable if the exemption were $2,500 by more than the amount of the net income in excess of $5,000;

(d) $400 for each person (other than husband or wife) dependent upon and receiving his chief support from the taxpayer if such dependent person is under 18 years of age or is incapable of self-support because mentally or physically defective.

(e) In the case of a nonresident alien individual or of a citizen entitled to the benefits of section 262 the personal exemption shall be only $1,000, and he shall not be entitled to the credit provided in subdivision (d).

(f) The credits allowed by subdivisions (c), (d) and (e) of this section shall be determined by the status of the taxpayer on the last day of the period for which the return of income is made; but in the case of an individual who dies during the taxable year such credits shall be determined by his status at the time of his death, and in such case full credits shall be allowed to the surviving spouse, if any, according to his or her status at the close of the period for which such survivor makes return of income.

PARTNERSHIPS AND PERSONAL SERVICE CORPORATIONS.

Sec. 218. (a) That individuals carrying on business in partnership shall be liable for income tax only in their individual capacity. There shall be included in computing the net income of each partner his distributive share, whether distributed or not, of the net income of the partnership for the taxable year, or if his net income for such taxable year is computed upon the basis of a period different from that upon the basis of which the net income of the partnership is computed, then his distributive share of the net income of the partnership for any accounting period of the partnership ending within the fiscal or calendar year upon the basis of which the partner's net income is computed.

(b) The partner shall, for the purpose of the normal tax, be allowed as credits, in addition to the credits allowed to him under section 216, his proportionate share of such amounts specified in subdivisions (a) and (b) of section 216 as are received by the partnership.

(c) The net income of the partnership shall be computed in the same manner and on the same basis as provided in section 212, except that the deduction provided in paragraph 11 of subdivision (a) of section 214 shall not be allowed.

(d) Personal service corporations shall not be subject to taxation under this title, but the individual stockholders thereof shall be taxed in the same manner as the members of partnerships.

This subdivision shall not be in effect after Dec. 31, 1921.

ESTATES AND TRUSTS.

Sec. 219. (a) That the tax imposed by sections 210 and 211 shall apply to the income of estates or of any kind of property held in trust, including—

(1) Income received by estates of deceased persons during the period of administration or settlement of the estate;

(2) Income accumulated in trust for the benefit of unborn or unascertained persons or persons with contingent interests;

(3) Income held for future distribution under the terms of the will or trust, and

(4) Income which is to be distributed to the beneficiaries periodically, whether or not at regular intervals, and the income collected by a guardian of an infant to be held or distributed as the court may direct.

(b) The fiduciary shall be responsible for making the return of income for the estate or trust for which he acts.

(f) A trust created by an employer as a part of a stock bonus or profit-sharing plan for the exclusive benefit of some or all of his employes, to which contributions are made by such employer, or employes, or both, for the purpose of distributing to such employes the earnings and principal of the fund accumulated by the trust in accordance with such plan, shall not be taxable under this section,

but the amount actually distributed or made available to any distributee shall be taxable to him in the year in which so distributed or made available to the extent that it exceeds the amounts paid in by him.

INDIVIDUAL RETURNS.

Sec. 223. (a) That the following individuals shall each make under oath a return stating specifically the items of his gross income and the deductions and credits allowed under this title—

(1) Every individual having a net income for the taxable year of $1,000 or over, if single, or if married and not living with husband or wife;

(2) Every individual having a net income for the taxable year of $2,000 or over, if married and living with husband or wife; and

(3) Every individual having a gross income for the taxable year of $5,000 or over, regardless of the amount of his net income.

(b) If a husband and wife living together have an aggregate net income for the taxable year of $2,000 or over, or an aggregate gross income for such year of $5,000 or over—

(1) Each shall make such a return, or

(2) The income of each shall be included in a single joint return, in which case the tax shall be computed on the aggregate income.

(c) If the taxpayer is unable to make his own return, the return shall be made by a duly authorized agent or by the guardian or other person charged with the care of the person or property of such taxpayer.

PARTNERSHIP RETURNS.

Sec. 224. That every partnership shall make a return for each taxable year, stating specifically the items of its gross income and the deductions allowed by this title, and shall include in the return the names and addresses of the individuals who would be entitled to share in the net income if distributed and the amount of the distributive share of each individual. The return shall be sworn to by any one of the partners.

FIDUCIARY RETURNS.

Sec. 225. (a) That every fiduciary (except a receiver appointed by authority of law in possession of part only of the property of an individual) shall make under oath a return for any of the following individuals, estates or trusts for which he acts, stating specifically the items of gross income thereof and the deductions and credits allowed under this title—

(1) Every individual having a net income for the taxable year of $1,000 or over, if single, or if married and not living with husband or wife;

(2) Every individual having a net income for the taxable year of $2,000 or over, if married and living with husband or wife;

(3) Every individual having a gross income for the taxable year of $5,000 or over, regardless of the amount of his net income;

(4) Every estate or trust the net income of which for the taxable year is $1,000 or over, and

(5) Every estate or trust of which any beneficiary is a nonresident alien.

TIME AND PLACE FOR FILING RETURNS.

Sec. 227. (a) That returns shall be made on or before the 15th day of the third month following the close of the fiscal year, or, if the return is made on the basis of the calendar year, then the return shall be made on or before the 15th day of March. The commissioner may grant a reasonable extension of time for filing returns whenever in his judgment good cause exists.

(b) Returns shall be made to the collector for the district in which is located the legal residence or principal place of business of the person making the return.

CORPORATIONS.

Tax on Corporations.

Sec. 230. That, in lieu of the tax imposed by section 230 of the revenue act of 1918, there shall be levied, collected and paid for each taxable year upon the net income of every corporation a tax at the following rates:

(a) For the calendar year 1921, 10 per centum of the amount of the net income in excess of the credits provided in section 236, and

(b) For each calendar year thereafter 12½ per centum of such excess amount.

Conditional and Other Exemptions.

Sec. 231. That the following organizations shall be exempt from taxation under this title:

(1) Labor, agricultural or horticultural organizations;

(2) Mutual savings banks not having a capital stock represented by shares;

(3) Fraternal beneficiary societies, orders or associations, (a) operating under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system, and (b) providing for the payment of life, sick, accident or other benefits to the members of such society, order or association or their dependents;

(4) Domestic building and loan associations, substantially all the business of which is confined to making loans to members, and cooperative banks without capital stock, organized and operated for mutual purposes and without profit;

(5) Cemetery companies owned and operated exclusively for the benefit of their members.

(6) Corporations and any community chest, fund or foundation organized and operated exclusively for religious, charitable, scientific, literary or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private stockholder or individual;

(7) Business leagues, chambers of commerce or boards of trade not organized for profit;

(8) Civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare;

(9) Clubs organized and operated exclusively for pleasure, recreation and other nonprofitable purposes;

(10) Farmers' or other mutual hail, cyclone or fire insurance companies, mutual ditch or irrigation companies, mutual or co-operative telephone companies or like organizations of a purely local character, the income of which consists solely of assessments, dues and fees collected from members for the sole purpose of meeting expenses;

(11) Farmers', fruit growers or like associations, organized and operated as sales agents.

(12) Corporations organized for the exclusive purpose of holding title to property, collecting income therefrom and turning over the entire amount thereof, less expenses, to an organization which itself is exempt from the tax imposed by this title;

(13) Federal land banks and national farm-loan associations.

Net Incomes of Corporations Defined.

Sec. 232. That in the case of a corporation subject to the tax imposed by section 230 the term "net income" means the gross income as defined in section 233 less the deductions allowed by section 234.

Gross Incomes of Corporations Defined.

Sec 233. (a) That in the case of a corporation subject to the tax imposed by section 230 the term "gross income" means the gross income as defined in sections 213 and 217, except that mutual marine insurance com-

panies shall include in gross income the gross premiums collected and received by them less amounts paid for reinsurance.

Deductions Allowed Corporations.

Sec. 234. (a) That in computing the net income of a corporation subject to the tax imposed by section 230 there shall be allowed as deductions:

(1) All the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business, including a reasonable allowance for salaries or other compensation for personal services actually rendered, and including rentals or other payments required to be made as a condition to the continued use or possession of property to which the corporation has not taken or is not taking title, or in which it has no equity;

(2) All interest paid or accrued within the taxable year on its indebtedness, except on indebtedness incurred or continued to purchase or carry obligations or securities (other than obligations of the United States issued after Sept. 24, 1917, and originally subscribed for by the taxpayer) the interest upon which is wholly exempt from taxation under this title;

(3) Taxes paid or accrued within the taxable year except (a) income, war-profits and excess-profits taxes imposed by the authority of the United States, (b) so much of the income, war-profits and excess-profits taxes imposed by the authority of any foreign country or possession of the United States as is allowed as a credit under section 238, and (c) taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

(4) Losses sustained during the taxable year and not compensated for by insurance or otherwise;

(5) Debts ascertained to be worthless and charged off within the taxable year;

(6) The amount received as dividends (a) from a domestic corporation other than a corporation entitled to the benefits of section 262, or (b) from any foreign corporation when it is shown that more than 50 per centum of the gross income of such foreign corporation was derived from sources within the United States.

(7) A reasonable allowance for the exhaustion, wear and tear of property used in the trade or business, including a reasonable allowance for obsolescence.

(8) In the case of buildings, machinery, equipment or other facilities, erected or acquired on or after April 6, 1917, for the production of articles contributing to the prosecution of the war against the German government, and in the case of vessels constructed or acquired on or after such date for the transportation of articles or men contributing to the prosecution of such war, there shall be allowed, for any taxable year ending before March 3, 1924 (year 1918, 1919, 1920 or 1921), a reasonable deduction for the amortization of such part of the cost of such facilities or vessels as has been borne by the taxpayer.

(9) In the case of mines, oil and gas wells, other natural deposits, and timber a reasonable allowance for depletion and for depreciation of improvements, according to the peculiar conditions in each case.

Items Not Deductible by Corporations.

Sec. 235. That in computing net income no deduction shall in any case be allowed in respect of any of the items specified in section 215.

Credits Allowed Corporations.

Sec. 236. That for the purpose only of the tax imposed by section 230 there shall be allowed the following credits:

(a) The amount received as interest upon obligations of the United States and bonds issued by the War Finance corporation, which is included in gross income under section 233;

(b) In the case of a domestic corporation the net income of which is $25,000 or less, a specific credit of $2,000; but if the net income is more than $25,000 the tax imposed by section 230 shall not exceed the tax which would be payable if the $2,000 credit were allowed, plus the amount of the net income in excess of $25,000; and

(c) The amount of any war-profits and excess-profits taxes imposed by act of congress for the same taxable year.

Corporation Returns.

Sec. 239. (a) That every corporation subject to taxation under this title and every personal service corporation shall make a return, stating specifically the items of its gross income and the deductions and credits allowed by this title. The return shall be sworn to by the president, vice-president or other principal officer and by the treasurer or assistant treasurer.

RECEIPTS FOR TAXES.

Sec. 251. That every collector to whom any payment of any tax is made under the provisions of this title shall upon request give to the person making such payment a full written or printed receipt, stating the amount paid and the particular account for which such payment was made.

WAR-PROFITS AND EXCESS-PROFITS TAX FOR 1921.

Sec. 301. (a) That in lieu of the tax imposed by title III. of the revenue act of 1918, but in addition to the other taxes imposed by this act, there shall be levied, collected and paid for the calendar year 1921 upon the net income of every corporation (except corporations taxable under subdivision (b) of this section) a tax equal to the sum of the following:

First Bracket.

20 per centum of the amount of the net income in excess of the excess-profits credit (determined under section 312) and not in excess of 20 per centum of the invested capital.

Second Bracket.

40 per centum of the amount of the net income in excess of 20 per centum of the invested capital.

(b) For the calendar year 1921 there shall be levied, collected and paid upon the net income of every corporation which derives in such year a net income of more than $10,000 from any government contract or contracts made between April 6, 1917, and Nov. 11, 1918, both dates inclusive, a tax equal to the sum of the following:

(1) Such a portion of a tax computed at the rates specified in subdivision (a) of section 301 of the revenue act of 1918 as the part of the net income attributable to such government contract or contracts bears to the entire net income.

(2) Such a portion of a tax computed at the rates specified in subdivision (a) of this section as the part of the net income not attributable to such government contract or contracts bears to the entire net income.

Sec. 302. That the tax imposed by subdivision (a) of section 301 shall in no case be more than 20 per centum of the amount of the net income in excess of $3,000 and not in excess of $20,000, plus 40 per centum of the amount of the net income in excess of $20,000.

Excess-Profits Credit.

Sec. 312. That the excess-profits credit shall consist of a specific exemption of $3,000, plus an amount equal to 8 per centum of the in-

vested capital for the taxable year. A foreign corporation or a corporation entitled to the benefits of section 262 shall not be entitled to the specific exemption of $3,000.

Estate Tax.

Sec. 401. That, in lieu of the tax imposed by title IV. of the revenue act of 1918, a tax equal to the sum of the following percentages of the value of the net estate (determined as provided in section 403) is hereby imposed upon the transfer of the net estate of every decedent dying after the passage of this act, whether a resident or nonresident of the United States:

1 per centum of the amount of the net estate not in excess of $50,000;

2 per centum of the amount by which the net estate exceeds $50,000 and does not exceed $150,000;

3 per centum of the amount by which the net estate exceeds $150,000 and does not exceed $250,000;

4 per centum of the amount by which the net estate exceeds $250,000 and does not exceed $450,000;

6 per centum of the amount by which the net estate exceeds $450,000 and does not exceed $750,000;

8 per centum of the amount by which the net estate exceeds $750,000 and does not exceed $1,000,000;

10 per centum of the amount by which the net estate exceeds $1,000,000 and does not exceed $1,500,000;

12 per centum of the amount by which the net estate exceeds $1,500,000 and does not exceed $2,000,000;

14 per centum of the amount by which the net estate exceeds $2,000,000 and does not exceed $3,000,000;

16 per centum of the amount by which the net estate exceeds $3,000,000 and does not exceed $4,000,000;

18 per centum of the amount by which the net estate exceeds $4,000,000 and does not exceed $5,000,000;

20 per centum of the amount by which the net estate exceeds $5,000,000 and does not exceed $8,000,000;

22 per centum of the amount by which the net estate exceeds $8,000,000 and does not exceed $10,000,000, and

25 per centum of the amount by which the net estate exceeds $10,000,000.

TAX ON TELEGRAPH AND TELEPHONE MESSAGES.

Sec. 500. That from and after Jan. 1, 1922, there shall be levied, assessed, collected and paid, in lieu of the taxes imposed by section 500 of the revenue act of 1918:

(a) In the case of each telegraph, telephone, cable or radio, dispatch, message or conversation which originates on or after such date within the United States, and for the transmission of which the charge is more than 14 cents and not more than 50 cents, a tax of 5 cents; and if the charge is more than 50 cents, a tax of 10 cents: Provided, That only one payment of such tax shall be required, notwithstanding the lines or stations of one or more persons are used for the transmission of such dispatch, message or conversation; and

(b) A tax equivalent to 10 per centum of the amount paid after such date to any telegraph or telephone company for any leased wire or talking circuit special service furnished after such date. This subdivision shall not apply to the amount paid for so much of such service as is utilized (1) in the collection and dissemination of news through the public press or (2) in the conduct by a common carrier or telegraph or telephone company of its business as such.

TAX ON BEVERAGES.

Sec. 600. That subdivision (a) of section 600 of the revenue act of 1918 is amended by striking out the period at the end thereof and inserting a colon and the following: "Provided, That on all distilled spirits on which tax is paid at the nonbeverage rate of $2.20 per proof gallon and which are diverted to beverage purposes or for use in the manufacture or production of any article used or intended for use as a beverage there shall be levied and collected an additional tax of $4.20 on each proof gallon and a proportionate tax at a like rate on all fractional parts of such proof gallon, to be paid by the person responsible for such diversion."

Sec. 602. That from and after Jan. 1, 1922, there shall be levied, assessed, collected and paid, in lieu of the taxes imposd by sections 628 and 630 of the revenue act of 1918:

(a) Upon all beverages derived wholly or in part from cereals or substitutes therefor, containing less than one-half of 1 per centum of alcohol by volume, sold by the manufacturer, producer or importer, a tax of 2 cents per gallon.

(b) Upon all unfermented fruit juices, in natural or slightly concentrated form, or such fruit juices to which sugar has been added (as distinguished from finished or fountain sirups), intended for consumption as beverages with the addition of water or water and sugar, and upon all imitations of any such fruit juices, and upon all carbonated beverages, commonly known as soft drinks, manufactured, compounded or mixed by the use of concentrate, essence or extract instead of a fountain sirup, sold by the manufacturer, producer or importer, a tax of 2 cents per gallon.

(c) Upon all still drinks containing less than one-half of 1 per centum of alcohol by volume, intended for consumption as beverages in the form in which sold (except natural or artificial mineral and table waters and imitations thereof and pure apple cider), sold by the manufacturer, producer or importer, a tax of 2 cents per gallon.

(d) Upon all natural or artificial mineral waters or table waters, whether carbonated or not, and all imitations thereof, sold by the producer, bottler or importer thereof, in bottles or other closed containers, at over 12½ cents per gallon, a tax of 2 cents per gallon.

(e) Upon all finished or fountain sirups of the kinds used in manufacturing, compounding or mixing drinks commonly known as soft drinks, sold by the manufacturer, producer or importer, a tax of 9 cents per gallon; except that in the case of any such sirups intended to be used in the manufacture of carbonated beverages sold in bottles or other closed containers the rate shall be 5 cents per gallon. Where any person conducting a soda fountain, ice cream parlor or other similar place of business manufactures any sirups of the kinds described in this subdivision there shall be levied and paid on each gallon manufactured and used in the preparation of soft drinks a tax of 9 cents per gallon.

(f) Upon all carbonic acid gas sold by the manufacturer, producer or importer to a manufacturer of any carbonated beverages, or to any person conducting a soda fountain, ice cream parlor or other similar place of business, and upon all carbonic acid gas used by the manufacturer, producer or importer thereof in the preparation of soft drinks, a tax of 4 cents per pound.

TAX ON CIGARS, TOBACCO AND MANUFACTURES THEREOF.

Sec. 700. That upon cigars and cigarettes manufactured in or imported into the United States, and hereafter sold by the manufacturer or importer, or removed for consumption or

sale, there shall be levied, collected, and paid under the provisions of existing law, in lieu of the internal revenue taxes now imposed thereon by law, the following taxes, to be paid by the manufacturer or importer thereof—

On cigars of all descriptions made of tobacco, or any substitute therefor, and weighing not more than three pounds per thousand, $1.50 per thousand;

On cigars made of tobacco, or any substitute therefor, and weighing more than three pounds per thousand, if manufactured or imported to retail at not more than 5 cents each, $4 per thousand;

If manufactured or imported to retail at more than 5 cents each and not more than 8 cents each, $6 per thousand;

If manufactured or imported to retail at more than 8 cents each and not more than 15 cents each, $9 per thousand;

If manufactured or imported to retail at more than 15 cents each and not more than 20 cents each, $12 per thousand;

If manufactured or imported to retail at more than 20 cents each, $15 per thousand;

On cigarettes made of tobacco, or any substitute therefor, and weighing not more than three pounds per thousand, $3 per thousand;

Weighing more than three pounds per thousand, $7.20 per thousand.

Sec. 701. That upon all tobacco and snuff manufactured in or imported into the United States, and hereafter sold by the manufacturer or importer, or removed for consumption or sale, there shall be levied, collected, and paid, in lieu of the internal revenue taxes now imposed thereon by law, a tax of 18 cents p pound, to be paid by the manufacturer importer thereof.

TAX ON ADMISSIONS AND DUES.

Sec. 800. (a) That from and after Jan. 1, 1922, there shall be levied, assessed, collected and paid, in lieu of the taxes imposed by section 800 of the revenue act of 1918—

(1) A tax of 1 cent for each 10 cents or fraction thereof of the amount paid for admission to any place on or after such date, including admission by season ticket or subscription, to be paid by the person paying for such admission; but where the admission is 10 cents or less no tax shall be imposed.

(2) Upon tickets or cards of admission to theaters, operas and other places of amusement, sold at news stands, hotels, and places other than the ticket offices of such theaters, operas or other places of amusement, at not to exceed 50 cents in excess of the sum of the established price therefor at such ticket offices plus the amount of any tax imposed under paragraph (1), a tax equivalent to 5 per centum of the amount of such excess; and if sold for more than 50 cents in excess of the sum of such established price plus the amount of any tax imposed under paragraph (1), a tax equivalent to 50 per centum of the whole amount of such excess, such taxes to be returned and paid, in the manner and subject to the penalties and interest provided in section 903, by the person selling such tickets;

(3) A tax equivalent to 50 per centum of the amount for which the proprietors, managers or employes of any opera house, theater or other place of amusement sell or dispose of tickets or cards of admission in excess of the regular or established price or charge therefor, such tax to be returned and paid, in the manner provided in section 903, by the person selling such tickets;

(4) In the case of persons having the permanent use of boxes or seats in an opera house or any place of amusement or a lease for the use of such box or seat in such opera house or place of amusement, in lieu of the tax imposed by paragraph (1), a tax equivalent to 10 per centum of the amount for which a similar box or seat is sold for each performance or exhibition at which the box or seat is used or reserved by or for the lessee or holder, such tax to be paid by the lessee or holder; and

(5) A tax of 1½ cents for each 10 cents or fraction thereof of the amount paid for admission to any public performance for profit at any roof garden, cabaret or other similar entertainment, to which the charge for admission is wholly or in part included in the price paid for refreshment, service or merchandise; the amount paid for such admission to be deemed to be 20 per centum of the amount paid for refreshment, service and merchandise; such tax to be paid by the person paying for such refreshment, service or merchandise.

(b) No tax shall be levied under this title in respect to any admissions all the proceeds of which inure exclusively to the benefit of religious, educational or charitable institutions, societies or organizations, any post of the American Legion or the women's auxiliary units thereof, societies for the prevention of cruelty to children or animals or exclusively to the benefit of organizations conducted for the sole purpose of maintaining symphony orchestras and receiving substantial support from voluntary contributions or of maintaining a community center moving picture theater, none of the profits of which are distributed to members of such organizations, or exclusively to the benefit of persons in the military or naval forces of the United States, or admissions to agricultural fairs none of the profits of which are distributed to stockholders or members of the association conducting the same.

Sec. 801. Manufacturers of cigarettes, including small cigars, weighing not more than three pounds per thousand shall each pay at the rate of 6 cents for every 10,000 cigarettes, or fraction thereof.

Sec. 1003. That sixty days after the passage of this act, and thereafter on July 1 in each year, and also at the time of the original purchase of a new boat by a user, if on any other date than July 1, there shall be levied, assessed, collected and paid, in lieu of the tax imposed by section 603 of the revenue act of 1917, upon the use of yachts, pleasure boats, power boats and sailing boats of over five net tons, and motor boats with fixed engines not used exclusively for trade, fishing or national defense, or not built according to plans and specifications approved by the navy department, a special excise tax to be based on each yacht or boat, at rates as follows: Yachts, pleasure boats, power boats, motor boats with fixed engines, and sailing boats, of over 5 net tons, length not over 50 feet, $1 for each foot; length over 50 feet and not over 100 feet, $2 for each foot; length over 100 feet, $4 for each foot; motor boats of not over five net tons with fixed engines, $10.

Tax on Narcotics.

Sec. 1005. That section 1 of the act entitled "An act to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute or give away opium or coca leaves, their salts, derivatives or preparations and for other purposes," approved Dec. 17, 1914, as amended by section 1006 of the revenue act of 1918, is re-enacted without change.

STAMP TAXES.

1. Bonds of indebtedness: On all bonds, debentures or certificates of indebtedness issued by any person, and all instruments, however termed, issued by any corporation with interest coupons or in registered form, known generally as corporate securities, on each $100 of face value or fraction thereof, 5 cents: Provided, That every renewal of the foregoing shall be taxed as a new issue: Provided further, That when a bond conditioned for the repayment or payment of money is given in a penal sum greater than the debt secured, the tax shall be based upon the amount secured.

2. Capital stock issued: On each original issue, whether on organization or reorganization, of certificates of stock, or of profits, or of interest in property or accumulations, by any corporation, on each $100 of face value or fraction thereof, 5 cents: Provided, That where a certificate is issued without face value, the tax shall be 5 cents per share, unless the actual value is in excess of $100 per share, in which case the tax shall be 5 cents on each $100 of actual value or fraction thereof; or unless the actual value is less than $100 per share, in which case the tax shall be 1 cent on each $20 of actual value or fraction thereof.

3. Capital stock, sales or transfers: On all sales, or agreements to sell, or memoranda of sales or deliveries of, or transfers of legal title to shares or certificates of stock or of profits or of interest in property or accumulations in any corporation, or to rights to subscribe for or to receive such shares or

certificates, whether made upon or shown by the books of the corporation, or by any assignment in blank, or by any delivery, or by any paper or agreement or memorandum or other evidence of transfer or sale, whether entitling the holder in any manner to the benefit of such stock, interest, or rights, or not, on each $100 of face value or fraction thereof, 2 cents, and where such shares are without par or face value, the tax shall be 2 cents on the transfer or sale or agreement to sell on each share.

4. Produce, sales of, on exchange: Upon each sale, agreement of sale, or agreement to sell (not including so called transferred or scratch sales), any products or merchandise at, or under the rules or usage of, any exchange, or board of trade, or other similar place, for future delivery, for each $100 in value of the merchandise covered by said sale or agreement of sale or agreement to sell, 2 cents, and for each additional $100 or fractional part thereof in excess of $100, 2 cents.

5. Drafts or checks (payable otherwise than at sight or on demand) upon their acceptance or delivery within the United States whichever is prior, promissory notes, except bank notes issued for circulation, and for each renewal of the same, for a sum not exceeding $100, 2 cents; and for each additional $100 or fractional part thereof, 2 cents.

6. Conveyances: Deed, instrument, or writing, whereby any lands, tenements, or other realty sold shall be granted, assigned, transferred, or otherwise conveyed to, or vested in, the purchaser or purchasers, or any other person or persons, by his, her, or their direction, when the consideration or value of the interest or property conveyed, exclusive of the value of any lien or incumbrance remaining thereon at the time of sale, exceeds $100 and does not exceed $500, 50 cents; and for each additional $500 or fractional part thereof, 50 cents. This subdivision shall not apply to any instrument or writing given to secure a debt.

7. Entry of any goods, wares or merchandise at any custom house, either for consumption or warehousing, not exceeding $100 in value, 25 cents; exceeding $100 and not exceeding $500 in value, 50 cents; exceeding $500 in value, $1.

8. Entry for the withdrawal of any goods or merchandise from customs bonded warehouse, 50 cents.

9. Passage ticket, one way or round trip, for each passenger, sold or issued in the United States for passage by any vessel to a port or place not in the United States, Canada or Mexico, if costing not exceeding $30, $1; costing more than $30 and not exceeding $60, $3; costing more than $60, $5. This subdivision shall not apply to passage tickets costing $10 or less.

10. Proxy for voting at any election for officers or meeting for the transaction of business, of any corporation, except religious, educational, charitable, fraternal, or literary societies, or public cemeteries, 10 cents.

11. Power of attorney granting authority to do or perform some act for or in behalf of the grantor, which authority is not otherwise vested in the grantee, 25 cents.

12. Playing cards: Upon every pack of playing cards containing not more than fifty-four cards, manufactured or imported, and sold, or removed for consumption or sale, a tax of 8 cents per pack.

13. On each policy of insurance, or certificate, binder, covering note, memorandum, cablegram, letter, or other instrument by whatever name called whereby insurance is made or renewed upon property within the United States issued to or for or in the name of a domestic corporation or partnership or an individual resident of the United States by any foreign corporation or partnership or any individual not a resident of the United States, when such policy or other instrument is not signed or countersigned by an officer or agent of the insurer in a state, territory or district of the United States within which such insurer is authorized to do business, a tax of 3 cents on each dollar, or fractional part thereof, of the premium charged: Provided, That policies of reinsurance shall be exempt from the tax imposed by this subdivision.

CHILD LABOR TAX.

Sec. 1200. That every person (other than a bona fide boys' or girls' canning club recognized by the agricultural department of a state and of the United States) operating (a) any mine or quarry situated in the United States in which children under the age of sixteen years have been employed or permitted to work during any portion of the taxable year; or (b) any mill, cannery, workshop, factory, or manufacturing establishment situated in the United States in which children under the age of fourteen years have been employed or permitted to work, or children between the ages of fourteen and sixteen have been employed or permitted to work more than eight hours in any day or more than six days in any week, or after the hour of seven o'clock post meridian, or before the hour of six o'clock ante meridian, during any portion of the taxable year, shall pay for each taxable year, in addition to all other taxes imposed by law, an excise tax equivalent to 10 per centum of the entire net profits received or accrued for such year from the sale or disposition of the product of such mine, quarry, mill, cannery, workshop, factory, or manufacturing establishment.

MINERS' STRIKE IN GREAT BRITAIN.

The coal miners of Great Britain to the number of nearly 1,000,000 went on a strike on April 1, 1921, and remained out until June 28, when a settlement was arrived at between them, the mine owners and representatives of the government. The miners agreed to receive 20 per cent above the prewar scale of wages, with an additional share of profits to be determined by the creation of a national board and district boards. The government agreed to a subvention of about $50,000,000 to avert the hardships caused by the necessary wage reductions. The strike was one of the most injurious ever suffered by Britain. It would have been a great deal more serious had the railway and transport workers also gone out as they threatened to do at one time, but they voted against a sympathetic strike.

JUDGE LANDIS' LABOR WAGE AWARD.

On June 9, 1921, Judge Kenesaw M. Landis of the United States District court was chosen to act as arbitrator in the wage controversy between the building trades in Chicago and the contractors. On May 1 the contractors had instituted a lockout on account of the refusal of the unions to accept a reduction of wages and building operations had come practically to a standstill. Judge Landis consented to serve, and after extended hearings, investigation and study announced on Sept. 7 that wages should be reduced in all branches of the building industry except that of stone carving. The new scale per hour as fixed by the judge and the old scale are shown in the following table:

Trade.	New.	Old.
Plumbers	$ .95	$1.25
Bricklayers	1.10	1.25
Boilermakers	1.00	1.25
Steamfitters	.95	1.25
Hoisting engineers (for operation of high-pressure boilers and engines, cable ways, derricks, pile drivers, cranes and cable hoists)	1.10	1.25
Hoisting engineers (all others)	.85	1.25
Tilelayers (fire proofers)	1.12½	1.25
Cement finishers	.85	1.25
Composition floor finishers	.97½	1.25
Cement workers, laborers	.72½	1.00

Sprinkler fitters	.92½	1.25
Sprinkler fitters' helpers	.70	1.00

Seven trades—the carpenters, elevator constructors, plasterers, sheet metal workers, painters, glaziers and fixture hangers—were not signatories to the arbitration agreement. The following tentative awards were made by Judge Landis if at any time before Nov. 1, 1922, these unions wished to enter the agreement under certain specifications:

Carpenters	$1.00	$1.25
Plasterers	1.10	1.25
Elevator constructors	.95	1.25
Sheet metal workers	.95	1.25
Painters	.95	1.25
Glaziers	.95	1.25
Fixture hangers	1.00	1.25

The building trades council voted on Sept. 30 to reaffirm the Landis decision, but some of the unions were dissatisfied and demanded a rehearing, which was promised on condition that in the meantime they resumed work at the reduced scale of wages. Most of them did so, but those who remained out prevented a complete resumption of building operations. Conditions in the building industry in Chicago had not become entirely normal up to Dec. 1, 1921.

LABOR WAR IN WEST VIRGINIA.

Efforts on the part of the United Mine Workers of America to unionize the mine fields in Mingo county, West Virginia, resulted in a miniature war in August and September, 1921, in which numerous lives were lost. The mining operators, determined to maintain their open-shop policy, discharged the leaders of the union men and evicted them from the company houses. They also employed a detective agency to guard their property. There were many clashes and the situation became so serious that on Aug. 30 President Harding issued a proclamation announcing that the army would be used to put down the insurrection unless the lawless elements dispersed by Sept. 8. Two thousand regulars, armed with machine guns and accompanied by airplanes, moved into the disturbed area Sept. 3, and within the next two or three days the miners and others to the number of several thousand, who had been fighting each other, laid down their arms and dispersed peacefully. The West Virginia war thus came to a sudden end.

CENTRAL STATES FORESTRY LEAGUE.

The Central States Forestry league, representing Illinois, Indiana, Michigan, Minnesota, Missouri, Ohio and Wisconsin, seeks to draw together groups of men and women interested in the forestry problem and willing to help in solving it along wise and constructive lines. William L. Hall is secretary and John Fletcher is treasurer. D. L. Goodwillie is president and E. E. Parsonage vice-president of the executive committee. The office is in room 1449 Otis building, Chicago.

ARCTIC AND ANTARCTIC EXPLORATION.

SHACKLETON EXPEDITION.

Sir Ernest Shackleton started on another expedition to the antarctic regions Sept. 17, 1921, when he sailed from London on the Quest, a small ship built especially for navigation in waters where ice presents many obstacles to ordinary vessels. It was built in Norway according to ideas gained by Shackleton on previous voyages in the far south. It is 111 feet long and made of oak and spruce. The sides are two feet thick and sheathed with steel.

An interesting feature of the vessel is the covered-in bridge, the windows of which are of triplex glass. Two of the latest clear-vision screens, with special heating apparatus, have been provided. Two sets of wireless apparatus are carried, one with a range of 150 miles and the other much more powerful, thus insuring that the expedition will remain in touch with civilization throughout its voyage. The wireless telephone will also be used, and it is expected that this will prove of great value in allowing the landing parties to be in constant communication with the ship. For landing on the various islands a surf boat is carried and there are in addition two collapsible boats and a special boat made by Saunders of Cowes, which, owing to its lightness, can be transported by a couple of men. In the aft of the ship accommodation has been provided for ten members of the expedition, and this will also serve as the messroom. Forward there are a dark room and stores for the various specimens which the scientific members of the party collect.

A departure in antarctic exploration was made, for Sir Ernest Shackleton decided to use Cape Town as his base. On the way out stores were to be deposited there and coal taken in for the antarctic cruise. After coming from the ice fields and exploring the antarctic continent the Quest will go to South Georgia, and thence, by way of Bouvet island, back to Cape Town. Here stores will be taken aboard and the Crozet islands, McDonald island and Heard island will be visited on the way to New Zealand. Soundings will be made on the way to discover the limits of the continental shelf.

Maj. C. R. Carr, the aviator of the expedition, plans to fly above the antarctic fogs to scout out passages between the floes through which the Quest may pass. He is also the photographer and naturalist of the expedition.

Other members of the Shackleton party include Frank Etild, second in command; Frank Worsley, commander; Maj. A. H. Macklin, biologist; R. Stenhouse, lieutenant-commander; Capt. L. Hussey, meteorologist; J. S. W. Marr and N. E. Mooney, cabin boys. The last two are Scotch Boy Scouts, who were selected by Sir Ernest from ten competitors. The voyage, it was expected, would last two years.

COPE EXPEDITION.

Another British expedition is already in the south polar regions. It is led by Commander John L. Cope, who left Norfolk, Va., on Oct. 27, 1920, for a six years' sojourn in the ice fields. The party is aboard a 7,000-ton whaler, the Thor I., and three auxiliary ships and numbers more than 100 men. One of its purposes is the commercial development of the mineral wealth of Antarctica.

MAC MILLAN EXPEDITION.

The schooner Bowdoin, carrying Dr. Donald B. MacMillan and six companions on a two-year exploration trip in the arctic regions, left Wiscasset, Me., July 16 and Halifax, N. S., July 22, 1921. The little ship of only 115 tons was built at East Boothbay, Me., and was named for MacMillan's alma mater. The mapping of Baffin Land is the main purpose of the expedition. An attempt will be made to circumnavigate it, and also to explore the interior. Dr. MacMillan was Robert Peary's chief lieutenant on the latter's successful dash to the north pole in 1909.

CAPT. AMUNDSEN'S PLANS.

Capt. Roald Amundsen, whose ship, the Maud, wintered off Cape Serge, Siberia, returned to the United States in June, 1921, and spent the remainder of the year in planning for another expedition to the far north in 1922. The Maud had been damaged by ice and had to be repaired. It was also to be fitted with wireless apparatus.

AIR MAIL SERVICE CHRONOLOGY.

The New York-Washington mail route was inaugurated May 15, 1918; 218 miles.

The Cleveland-Chicago route was inaugurated May 15, 1919; 325 miles.

The New York-Cleveland service was inaugurated July 1, 1919; 430 miles.

The Chicago-Twin Cities service was inaugurated Aug. 10, 1920; 400 miles.

The Chicago-St. Louis service was inaugurated Aug. 16, 1920; 300 miles.

The New York-San Francisco service was inaugurated Sept. 8, 1920; 2,651 miles.

BUILDERS INDICTED BY FEDERAL GRAND JURY.

On April 30 the federal grand jury in Chicago returned indictments against 110 individuals and firms in the sheet metal, plumbing and steam fitting lines. They were charged with conspiring to restrain trade in violation of the Sherman antitrust act. The bills set up that the result was the stifling of competition and the doubling of the prices in certain building materials. The men indicted included manufacturers, wholesalers, agents and union officials.

RE-ELECTION OF MAYOR JOHN F. HYLAN.

John F. Hylan, Tammany candidate for re-election as mayor of New York city, defeated Maj. Henry H. Curran, fusion candidate, Nov. 8, 1921, by a plurality of 417,986. It was a figure unprecedented in any mayoralty contest in the metropolis and was comparable only with the vote of 438,471 received by Warren G. Harding, republican candidate for president, in 1920.

DEATHS FROM AUTOMOBILE ACCIDENTS.

[From census bureau report.]

In the course of the year 1920 9,103 deaths resulting from accidents caused by automobiles and other motor vehicles, excluding motorcycles, were recorded within the death-registration area of the United States, which area contains 82 per cent of the total population. This number represents a death rate of 10.4 per 100,000 population, as against 9.4 in 1919, 9.1 in 1918, 8.9 in 1917, 7.3 in 1916 and 5.8 in 1915. Between 1915 and 1920, therefore, the death rate per 100,000 population from motor-vehicle accidents and injuries increased by about four-fifths. There was, however, an increase of 244.4 per cent in the number of automobiles used and the death rate per 1,000 motor vehicles in use decreased from 2 in 1915 to 1.2 in 1920.

LAKES TO OCEAN DEEP WATERWAY PROJECT.

In a report made public Oct. 14, 1921, Col. W. P. Wooten, United States army engineer, and W. A. Bowden, chief engineer of the Canadian department of railways, estimated that the cost of making the St. Lawrence river between Lake Ontario and Montreal navigable to deep-sea vessels would be $252,728,200. This result was arrived at after an eighteen months' survey of the proposed lakes to ocean waterway route. This cost, they reported, would provide for a channel depth of twenty-five feet, with provision for increasing it to thirty feet at an additional cost of $17,986,180. Maintenance was estimated at $2,562,000.

Their recommendation contemplated also development of a power plant that would produce 1,464,000 horse power. This plant, built on a great dam at Long Sault rapids, near Ogdensburg, N. Y., could be expected to produce about 40 per cent of the potential power in the St. Lawrence river.

The improvement program recommended by the engineers contemplated a series of nine locks, 33 miles of canals, 40.5 miles of lake channel and 108 miles of river channel. These improvements were conceived to take care of the 220-foot drop from Lake Ontario to Montreal. Locks 824 feet long by 80 feet wide

were recommended. Canals with a bottom width of 200 feet and a surface width of 320 feet were suggested, and it was recommended that all open channels have a botton width of at least 450 feet.

The improvements recommended by the United States and Canadian engineers called for three locks between Montreal and Lake St. Louis; three between Lake St. Louis and Lake St. Francis and three between Lake St. Francis and Chimney Point, near Ogdensburg, N. Y. The main dam of the proposed hyro-electric plant at Long Sault rapids would develop a head of seventy-four feet, the engineers reported. An emergency dam at Ogden island to be used for regulation and additional safety also was recommended.

The new Welland ship canal being constructed by the Canadian government is being built to accommodate vessels 800 feet long, with a draft of twenty-five feet. Provision is made, however, for deepening the usable depth later to thirty feet. The canal is twenty-five miles long and steps down a drop of 326½ feet between Lake Erie and Lake Ontario. It is to have seven lift locks, three of them twin locks in flight, similar to the Gatun locks of the Panama canal. It is estimated that one of the locks can be filled in eight minutes and that passage through the canal can be made in eight hours.

The new Welland is the fourth canal to be constructed by the Canadian government between Lake Erie and Lake Ontario. The third, or present, canal is restricted to vessels of not more than fourteen feet draft, with locks 270 feet long and 45 feet wide.

The first Welland canal was built as a private enterprise in 1829. It had forty wooden locks, each 110 feet long, 27 feet wide and 8 feet depth of water on the sills.

CHICAGO'S PAGEANT OF PROGRESS.

There was held on the municipal pier, Chicago, from July 30 to Aug. 13, 1921, an exhibition known as the "Pageant of Progress." It was a success both in the quality and quantity of the exhibits and in attendance, the number of paid admissions averaging 55,000 a day. According to a report made by D. F. Kelly, the treasurer, the total revenue was $795,000, of which approximately $345,000 came from sales of exhibit space and the remainder from tickets and miscellaneous sources. The expenses amounted to $440,000, of which $40,000 was for war tax, $50,000 for rent of the pier and $350,000 for fitting up the pier, advertising and operating. This left a net profit of about $355,000. It was proposed to put $100,000 of the profits in the treasury of the Pageant of Progress company and to divide the remainder between a health and sanitation exhibit and the Chicago Boosters' Publicity club.

On Aug. 13 Samuel Grossman, a taxpayer, filed a bill for an accounting against Mayor Thompson, Health Commissioner Robertson and others, alleging that the lease of the pier was void because the city officials who permitted it were financially interested in the exposition corporation. A receiver was asked for by Mr. Grossman. It was decided by Judge George F. Rush, Nov. 15, that the pier lease to the exposition company was void, but no final decision as to the other points raised by the suit had been announced up to Nov. 24, 1921.

NEW LAKE FRONT BOULEVARD ON SOUTH SIDE.

All legal formalities preliminary to the construction of a new drive linking Grand boulevard with the loop and the north side were carried out in 1921 and it is expected that by the fall of 1923 the work will be completed. On March 9 the south park commissioners voted to construct a south side shore drive from Grant park along the lake as filled in to 23d street, where a viaduct will carry it over the Illinois Central railroad tracks to South Park avenue, which will be widened to 198 feet. A parkway forty-five feet wide will run down the center of the boulevard, which will merge into Grand boulevard. For widening South Park avenue from 35th street to 23d street the commissioners on June 22 voted to expend $2,000,000. On the same date the commissioners forwarded a petition to the secretary of war for permission to fill in a 300-foot strip of the lake between the Field museum and Randolph street. This permission was granted by Secretary Weeks in August.

CHICAGO COMMERCIAL ARBITRATION BUREAU.

The Chicago Association of Commerce.

Manager, J. Kent Greene, attorney at law.
Office, Room 548, 10 South LaSalle street.

The commercial arbitration bureau is a trade court in which business disputes are adjudicated. It handles all civil controversies except divorce cases and those that are quasi-criminal in their nature. It excludes labor disputes. It is organized under the Illinois arbitrations and awards act of 1917 and the procedure is a follows: The parties interested sign an arbitration agreement and appoint the manager of the arbitration bureau to act as the sole arbitrator or jointly with two or more others, or make their selections from a list of attorneys, or from experts in their particular trade, or select anybody else they wish. The proceedings then are under the direction of the arbitrator. After hearing the testimony and arguments the arbitrator makes his award, which is his decision covering the whole controversy. The award may decide all questions of law and fact arising in the proceedings.

Conclusions of fact are final, but questions of law may be revised by the court selected by the parties, and an appeal made to the Appellate or Supreme court to review the conclusions of the arbitrator and of the lower court on questions of law the same as in any other case. If the arbitrator has committed an error of law, the courts will direct him how to proceed or revise his award in accordance with the law.

The filing in court of the submission and final award or report of the arbitrator stating the questions of law gives the court jurisdiction of the subject matter and of the parties. If the final award has not been made, the arbitrator proceeds under the direction of the court. He may make successive awards from time to time covering different portions of the controversy. The bureau being thus officially under the direction of a court becomes quasi-judicial and quasi-public in character. But the hearings may be in private if desired.

The manager of the bureau receives a salary, but no part of the fees charged. Fees for arbitration payable to the Association of Commerce are as follows:

Where the matter in contest does not exceed $200, the sum of $5.

Where the matter in contest exceeds $200, but does not exceed $1,000, the sum of $7.50.

Where the matter in contest exceeds $1,000, the sum of $10.

Where more than $1,000 is in contest, there shall be charged, in addition to the above, 2 per cent on the first $1,000 and 1 per cent on all over $1,000 up to $5,000, and one-half of 1 per cent on all over $5,000, or such other fee as may be arranged for.

In special cases arrangements will be made for special compensation.

The fees are paid by the unsuccessful party unless there is an agreement to the contrary.

The valuation since 1875 is the equalized valuation fixed by the state board of equalization. From 1867 to 1875 the valuation was made by the city for the city tax. From 1898 to 1908, inclusive, the assessed value was one-fifth of the actual value. In 1909 the rate was fixed at one-third and in 1919 at one-half. The total valuation includes capital stock and railroads.

ILLINOIS CONSTITUTIONAL CONVENTION.

In accordance with an act passed by the 51st general assembly and approved June 21, 1919, delegates were elected on Nov. 4 of that year to a convention for the revision of the Illinois state constitution. This convention was organized on Jan. 6, 1920, with Charles E. Woodward of Ottawa as president and B. H. McCann as secretary. Committees were named and an order of procedure was established. Much work was done in 1920, sixteen proposals being reported by the committee of the whole. However, no proposal reached the final stage before the convention adjourned in midsummer. No working session of the convention was held subsequently either in 1920 or in 1921, though it was still the expectation that it would reassemble and complete its labors.

Following is a list of the members elected in 1919:

Baldwin, P. G., Chicago.
Barr, George A., Joliet.
Beckman, Wm. H., Chicago.
Brandon, R. H., Mooseheart.
Brenholt, John J., Jr., Alton.
Brewster, Edward H., Dixon.
Carey, Archibald J., Chicago.
Carlstrom, Oscar E., Aledo.

ROSENWALD RURAL SCHOOLS.

Julius Rosenwald of Chicago on Aug. 12, 1912, as one of several notable gifts in commemoration of his 50th birthday anniversary, contributed $25,000 to Tuskegee institute, to be distributed among such offshoots of Tuskegee as Principal Booker T. Washington should designate. Of this amount Mr. Washington asked permission to use $2,100 for an experiment in building in Alabama six rural schools for negroes. The conditions of the experiment required that the negroes, by their own contributions of cash, land or labor, by gifts from white friends, or by grants from public funds, should raise in each community an amount equal to or larger than the $300 assigned as Rosenwald aid. The interest aroused by the campaigns for constructing these buildings was so great and so many other communities sought similar offers of aid that between 1912 and 1920, under the same co-operative plan, Mr. Rosenwald contributed to the erection in the south of 600 such schoolhouses.

Up to Nov. 1, 1921, 1,005 schoolhouses, utilizing the services of 2,313 teachers, were built at a total cost of $3,179,803. Of this amount the negroes contributed $915,078, the whites $241,954, the public funds $1,459,421 and Mr. Rosenwald $563,350. Classified by types, the buildings include 313 one-teacher schools, 382 two-teacher schools, 153 three-teacher schools, 90 four-teacher schools, 32 five-teacher schools and 35 six-teacher schools or larger, with nine teachers' homes.

By states the number of schools erected and the amounts contributed from the Rosenwald fund follow:

State.	Schools.	Contribut'n.
Alabama	204	$78,600
Arkansas	41	25,400
Georgia	41	18,850
Kentucky	44	27,200
Louisiana	111	68,300
Maryland	12	6,100
Mississippi	116	88,700
North Carolina	144	68,265
Oklahoma	5	3,800
South Carolina	66	56,100
Tennessee	101	60,600
Texas	32	25,233
Virginia	88	$36,200
Total	1,005	563,350

ROSENWALD AID TO NEGRO Y. M. C. A.

Julius Rosenwald in 1910 offered through the Chicago Y. M. C. A. to give $25,000 toward the cost of a negro Y. M. C. A. building for men and boys in any city of the United States which by popular subscriptions would raise $75,000 additional, thus assuring a building to cost complete a minimum of $100,000. He recognized the great need in each community with a large negro population of a place where recreational and educational facilities could be had, along with restaurant and dormitory service. Thirteen cities complied with his conditions and were paid his share, as follows: Atlanta, Baltimore, Brooklyn, Chicago, Cincinnati, Columbus, Indianapolis, Kansas City, New York, Philadelphia, Pittsburgh, St. Louis and Washington. Pittsburgh has not yet completed its building.

The final payment in the $325,000 contributed by Mr. Rosenwald was made to Pittsburgh in 1920. This closed the 1910 offer, which resulted in an expenditure (Pittsburgh estimated) of $2,150,000 for buildings, serving a negro population of nearly 1,000,000. The percentages of cost contributed were: By whites, 49 per cent, colored 15 per cent, Mr. Rosenwald 16 per cent and other sources 20 per cent. A survey was made in 1920 of the condition and service of the twelve buildings. The encouraging results shown, the war-time migration of southern negroes into industrial centers and the increase in race friction induced Mr. Rosenwald to make a second offer. It was reported to him that possibly eleven additional cities might undertake campaigns for negro "Y's." Therefore, July 6, 1920, he offered through the Chicago Y. M. C. A. to contribute $25,000 to any city raising not less than $125,000. Owing to excessive building cost and adverse business conditions no city had qualified up to Nov. 15, 1921, but the Chicago Y. M. C. A. reported it likely that Detroit, Jersey City and Dayton would do so within the time limit.

STRIKE OF PACKING HOUSE EMPLOYES AVERTED.

Representatives of 100,000 packing house employes met in Omaha, Neb., March 9, 1921, and appealed to President Warren G. Harding to intervene in a controversy with the packers over wages, working conditions and arbitration. The Alschuler arbitration agreement was abrogated by the packers early in the year. On March 8 it was announced that the wages of laborers would be cut 15 per cent and piece workers 12½ per cent, and that the working conditions would be based on a fifty-four-hour week instead of an eight-hour day. The packers claimed that the refusal of the public to pay war-time prices for their products had resulted in the packing business being conducted at a loss for two years. They also pointed out that the standards of the hours of labor in plants handling nonperishable products could not be applied to concerns handling perishable products. By direction of President Harding a conference was held in Washington, D. C., March 23, at which the government was represented by Secretary of Labor Davis, the employes by the heads of the packing house unions concerned and the packers by their attorneys. The meeting resulted in a compromise by which the employes accepted the wage reductions and the packers agreed to the restoration of the basic eight-hour day and overtime rates. No strike occurred.

JAKE SCHAEFER DEFEATS WILLIE HOPPE.

In a tournament held in Chicago and ending Nov. 21, 1921, for the world's championship at 18-2 balkline billiards Jake Schaefer and Willie Hoppe were tied for first place, each having won 5 games and lost 1. In the playoff on Nov. 24 Schaefer won by a score of 500 to 346. Cochran, Conti, Horemans, Morningstar and Sutton finished in the order named.

CHICAGO'S MUNICIPAL FLAG.

The official flag of Chicago, adopted by the city council April 4, 1917, has three broad horizontal white stripes and two narrow light blue ones. There are two red stars near the staff, symbolizing the World's Fair in 1893 and the fire of 1871.

ILLINOIS LEGISLATION IN 1921.

Following were some of the more important laws enacted by the 52d general assembly of Illinois at the regular biennial session beginning Jan. 5 and ending June 30, 1921:

LANDLORD AND TENANT.

Termination of Tenancy.

Sections 2 and 6 of "An act to revise the law in relation to landlord and tenant," approved May 1, 1873, in force July 1, 1873, are amended to read as follows:

Sec. 2. If any tenant or tenants for life, lives, or for a year, or any longer or shorter time, or any person or persons who are or shall come into possession of any lands, tenements or hereditaments, by, from or under, or by collusion with such tenant or tenants, shall willfully hold over any lands, tenements or hereditaments after the expiration of such term or terms, and after demand made, in writing, for the possession thereof, by his or their landlord or lessor, or the person to whom the remainder or reversion of such lands, tenements or hereditaments shall belong, such person or persons so holding over shall, for the time such landlord or rightful owner be so kept out of possession, pay to the person so kept out of possession or his legal representatives at the rate of double the yearly value of the lands, tenements or hereditaments so detained, to be recovered by action of debt or otherwise in any court having cognizance of the same: Provided, That until July 1, 1923, no person shall recover for the detention of property used for residence purposes within the corporate limits of any city, town or village more than the rate of the yearly value of the lands, tenements or hereditaments so detained, together with any damages accruing to such landlord or rightful owner; and no condition or provision of any lease or contract shall operate to increase damages recoverable for so holding over.

Sec. 6. In all cases of tenancy by the month, or for any other term less than one year, where the tenant holds over without special agreement, the landlord shall have the right to terminate the tenancy by sixty days' notice, in writing, until July 1, 1923, and thereafter by thirty days' notice, in writing, and to maintain an action for forcible detainer or ejectment.

Sec. 2. Whereas an emergency exists, this act shall take effect and be in full force from and after its passage and approval. (Approved April 29, 1921.)

Stay of Ejectment.

Sections 10 and 11 of "An act in regard to forcible entry and detainer," approved and in force Feb. 16, 1874, are amended, and section 17a is added thereto, the amended and additional sections to read as follows:

Sec. 10. In trials under this act before justices of the peace either party may have the case tried by a jury if he shall so determine before the trial is entered upon, and will first advance the fees of the jurors. The number of the jurors shall be six, or any greater number not exceeding twelve, as either party may desire. In any case relating to premises used for residence purposes, either party may demand trial by a jury, notwithstanding any waiver of jury trial contained in any lease or contract.

Sec. 11. Trials under this act in courts of record shall be the same as in other cases at law in such courts; Provided, No special pleading shall be required, but the defendant may, under the plea of "not guilty," give in evidence any matter in defense of the action. In any case relating to premises used for residence purposes either party may demand trial by a jury, notwithstanding any waiver of jury trial contained in any lease or contract.

Sec. 17a. In any case under paragraph 4 of section 2 of this act, in which the plaintiff is entitled to judgment and execution for possession of property used for residence purposes, within the corporate limits of cities, towns or villages, a stay of execution not exceeding six months from the expiration of the term or tenancy may upon application of the defendant be granted in the discretion of the court, upon the giving of such bond as may be approved by the court, the condition of the bond being that the defendant will pay all rents that shall become due during the period ot the stay. No stay shall be granted unless the applicant therefor shall pay all rent then due and shall also pay all rent which may accrue until the end of the calendar month in which the stay is granted. The rent accruing thereafter shall be paid in such installmens as shall be directed by the court at the time the stay is granted, each such installment to be payable on the first day of the period which it covers, so that all such rents shall be payable in advance. In case of ten days' default in the payment of any such installment the court on application of the plaintiff shall set aside the order staying the execution. The defendant shall be obligated to pay rent for the entire period of the stay granted unless the court shall on application of the plaintiff have set aside any such stay, in which case the defendant shall be liable only for the period up to the time when the defendant shall have given up possession of the premises in question.

If prior to the expiration or termination of a tenancy the lessor or his assignee shall have made demand in writing upon the lessee or his assignee to give notice of his intention, if it be his intention, to apply for a stay of execution in case of judgment for possession, no stay shall be granted to such lessee or assignee unless he shall have given notice in writing to such lessor or assignee of his intention to apply for such a stay in the event of a judgment for possession against him, within ten days after the receipt of such demand, or, at lessee's option, thirty or more days prior to the termination or expiration of the term or tenancy. Said demand shall expressly refer to section 17a of "An act in regard to forcible entry and detainer," approved and in force Feb. 16, 1874, as amended.

The payment herein required shall be made to the plaintiff or his duly authorized agent, unless the court shall direct that they be paid into court, in which event the amounts so paid into court shall be paid to the plaintiff or his duly authorized agent in such manner as the court may order. No bond shall be required in case the applicant for the stay shall pay the rent then due and shall also pay the entire amount which may be determined by the court as reasonable rent for the whole period of such stay. The term rent, for the purposes of this section, shall be deemed to include all compensation for use and occupation, and the amount of such compensation shall be fixed at the rate for which the defendant was liable as rent for the month immediately prior to the expiration of his term or tenancy plus such additional amount, if any, as the court may determine to be reasonable. The court shall have authority upon application of the plaintiff after hearing to set aside any such stay of execution. This section shall cease to be in effect July 1, 1923.

Sec. 2. Whereas an emergency exists, this act shall take effect and be in full force from and after its passage and approval. (Approved May 3, 1921.)

Actions of Ejectment.

Section 42a is added to "An act in regard to the practice in actions of ejectment," approved March 20, 1872, in force July 1, 1872, such additional section to read as follows:

Sec. 42a. In any case in which the plaintiff is entitled to judgment and writ of possession, for possession of property used for residence purposes, within the corporate limits of cities, towns or villages, a stay of such writ and of execution thereof not exceeding six months from the expiration of the term or tenancy may upon application of the defendant be granted in the descretion of the court, upon the giving of such bond as may be approved by the court, the condition of the bond being that the defendant will pay all rents that shall become due during the period of the stay. No stay shall be granted unless the applicant therefor shall pay all rent then due and shall also pay all rent which may accrue until the end of the calendar month in which the stay is granted. The rent accruing thereafter shall be paid in such installments as shall be directed by the court at the time the stay is granted, each such installment to be payable on the first day of the period which it covers, so that all such rents shall be payable in advance. In case of ten days' default in the payment of any such installment the court on application of the plaintiff shall set aside the order staying the writ and execution thereof. The defendant shall be obligated to pay rent for the entire period of the stay granted unless the court shall on application of the plaintiff have set aside any such stay, in which case the defendant shall be liable only for the period up to the time when the defendant shall have given up possession of the premises in question. If, prior to the expiration or termination of a tenancy, the lessor or his assignee shall have made demand in writing upon the lessee or his assignee to give notice of his intention, if it be his intention, to apply for a stay of execution in case of judgment and writ of possession, no stay shall be granted to such lessee or assignee unless he shall have given notice in writing to such lessor or assignee of his intention to apply for such a stay in the event of a judgment and writ of possession against him, within ten days after the receipt of such demand, or, at lessee's option, thirty or more days prior to the termination or expiration of the term of tenancy. Said demand shall expressly refer to section 42a of "An act in regard to the practice in actions of ejectment," approved March 20, 1872, in force July 1, 1872.

The payments herein required shall be made to the plaintiff or his duly authorized agent, unless the court shall direct that they be paid into court, in which event the amounts so paid into court shall be paid to the plaintiff or his duly authorized agent in such manner as the court may order. No bond shall be required in case the applicant for the stay shall pay the rent then due and shall also pay the entire amount which may be determined by the court as reasonable rent for the whole period of such stay. The term rent, for the purposes of this section, shall be deemed to include all compensation for use and occupation, and the amount of such compensation shall be fixed at the rate for which the defendant was liable as rent for the month immediately prior to the expiration of his term or tenancy plus such additional amount, if any, as the court may determine to be reasonable. The court shall have authority upon application of the plaintiff after hearing to set aside any such stay of the writ and execution thereof. This section shall cease to be in effect July 1, 1923.

Sec. 2. Because of an emergency, this act shall take effect upon its passage. (Approved May 3, 1921.)

Trial by Jury.

Section 60 of "An act in relation to practice and procedure in courts of record," approved June 3, 1907, in force July 1, 1907, is amended to read:

Sec. 60. In all cases in any court of record in this state, if both parties shall agree, both matters of law and fact may be tried by the court. However, the court shall not proceed to trial without a jury by reason of a waiver of jury trial contained in any lease or contract with respect to the possession of any premises used for residence purposes. (Approved April 27, 1921.)

SOLDIERS' BONUS ACT.

Every person who was enlisted, inducted, warranted or commissioned, and who served honorably in active duty in the military or naval service of the United States at any time between the sixth day of April, 1917, and the eleventh day of November, 1918, and who at the time of entering such service was a resident of the state of Illinois, and who is honorably separated or discharged from such service, or who is still in active service, or has been retired, or has been furloughed to a reserve, and who was in such service for a period longer than two months, shall be entitled to receive from the soldiers' compensation fund of the state treasury compensation of 50 cents for each day that such person was in active service after April 6, 1917, but not exceeding a total of three hundred dollars ($300.00).

Sec. 2. The husband or wife (if not remarried), child or children, mother, father, brother or sister, in the order named, of any deceased person who served honorably in active duty in the military or naval forces of the United States, as provided in section 1, shall be paid the sum or allowance that such deceased person would be entitled to, under the provisions of this act, if living. In case such deceased person died while in the service, the sum to be paid under this section shall be three hundred dollars ($300.00).

Sec. 3. No payment shall be made under the provisions of this act to any person—

(1) Who was dishonorably discharged or discharged without honor; or

(2) Who, being in the military or naval service, refused on conscientious, political or other grounds to subject himself to military discipline or to render unqualified service; or

(3) Who, though in the service, did civilian work at civilian pay; or

(4) Who has received from another state a bonus or compensation of a like nature as is provided by this act; or

(5) For time spent while taking training in any students' army or navy training corps.

Sec. 4. No assignment of any right or claim to compensation, under the provisions of this act, shall be valid.

Sec. 5. The service recognition board is created, to consist of the governor, the state treasurer and the adjutant-general. This board shall have complete charge and control of the general scheme of payments authorized in this act and may adopt general rules for the making of such payments, the ascertainment and selection of proper beneficiaries and the amount to which such beneficiaries are entitled, and for procedure. The service recognition board shall adopt general rules for determining the question of whether an applicant was a resident of this state at the time he entered the service; and shall prescribe by

rule the nature of the proof to be submitted to establish the fact of residence.

Sec. 6. The service recognition board may select and appoint such employes as it may deem necessary, always giving preference in making such appointments to persons entitled to compensation under this act. The employes of the service recognition board shall not be subject to the provisions of "An act to regulate the civil service of the state of Illinois," approved May 11, 1905, in force July 1, 1905, as amended.

Sec. 7. All applications for compensation under this act must be made to the service recognition board before Jan. 1, 1925; and no payments shall be made under this act except on applications received by the service recognition board before that date.

Sec. 8. The state of Illinois through its officers is hereby authorized to issue and sell and provide for the retirement of bonds of the state of Illinois to the amount of fifty-five million dollars ($55,000,000) for the purpose of providing funds for making the payments provided for in this act. The issuance, sale and retirement of these bonds shall be under the general supervision and control of the service recognition board.

These bonds shall bear interest, payable annually, from the date of their issue, at the rate of 3½ per centum per annum, unless financial conditions make a different rate advisable, in which case the service recognition board may issue part or all of said bonds at any other rate of interest not exceeding 6 per centum per annum; they shall be serial bonds and be dated, issued and sold from time to time in such amounts as may be necessary to provide sufficient money to make payments provided for in this act. Each one of these bonds shall be in the denomination of $100.00, or some multiple thereof, and shall be made payable within twenty years from the date of its issue. These bonds shall be signed by the governor and attested by the secretary of state under the seal of the state and countersigned by the state treasurer and by the auditor of public accounts. Interest coupons with lithographed facsimile signatures of such officers may be attached to said bonds. Said bonds may, at the request of owners, be registered with the auditor of public accounts. These bonds, until sold, shall be deposited with the state treasurer; and when sold the proceeds of the bonds shall be paid into the state treasury and kept in a separate fund, which shall be known as the soldiers' compensation fund.

Sec. 9. For the purpose of making the payments provided for in this act the sum of fifty-five million dollars ($55,000,000), to be derived from the sale of such bonds, is hereby appropriated to the service recognition board, such money to be payable out of the soldiers' compensation fund, in accordance with the provisions of "An act in relation to state finance," approved June 10, 1919, in force July 1, 1919. If any person entitled to compensation shall so desire, he may receive payment in whole or part in bonds which are authorized to be issued by this act.

Sec. 10. After all payments provided for in this act have been made any money remaining in the soldiers' compensation fund in the state treasury may be expended by the service recognition board for any form of relief for veterans of the late war with Germany or their families that the general assembly may specify and as it shall direct, and not otherwise.

Sec. 11. Each year, after this act becomes fully operative, and until all of the bonds herein provided for have been retired, there shall be included in and added to the tax levied for state purposes a direct annual tax for such amount as shall be necessary and sufficient to pay the interest annually, as it shall accrue, on all bonds issued under the provisions of this act, and also to pay and discharge the principal of such bonds at par value as such bonds fall due; and the amounts of such direct annual tax shall be appropriated for that specific purpose. But no such direct annual tax shall be levied for any year in which a sufficient amount of money from other sources of revenue has been appropriated and set apart to pay the interest, as it shall accrue, on said bonds for that year, and also to discharge the principal of any of such bonds falling due during such year. There is hereby created a special fund in the state treasury, to be known as "soldiers' compensation bond interest and retirement fund," into which fund shall be paid such direct annual tax as it may be collected.

Sec. 12. The proposition of contracting the debt of $55,000,000 and issuing bonds to that amount and of levying annually a direct tax sufficient to pay the interest on such bonds as it accrues and to pay off and discharge the principal of such bonds within twenty years from issuance, in accordance with the provisions of this act, shall be submitted to the people of the state at the general election to be held on Tuesday next after the first Monday of November, A. D. 1922, on a separate ballot to be in substantially the following form:

Soldiers' Compensation Ballot.

Shall the state of Illinois contract a debt of $55,000,000.00 and issue bonds to that amount and levy annually a direct tax sufficient to pay the interest on such bonds as it shall accrue and to pay off and discharge the principal of such bonds within twenty years from issuance, in accordance with the provisions of an act of the general assembly of Illinois entitled "An act to provide payment of compensation to certain persons who served with the military or naval forces of the United States in the recent war with Germany"?	Yes	
	No.	

Notice of the submission of the proposition shall be given, the ballots canvassed and returned, abstracts of the vote made and submitted, the votes canvassed and a declaration of the result made in the same manner as is provided in case of the submission of a proposed constitutional amendment.

Sec. 13. The secretary of state is authorized and directed to cause publication of this act to be made, once each week, for three months at least before the vote of the people shall be taken upon such act, and said publication shall be made in at least two daily newspapers, one of which shall be published in the city of Springfield and one in the city of Chicago.

Sec. 14. The provisions of this act for the payment of the principal of said bonds at maturity and of the interest thereon annually, as it shall accrue, by a direct annual tax, shall be irrepealable until such debt and interest is paid in full, and for the making of such payment the faith of the state of Illinois is hereby pledged.

Sec. 15. The provisions of this act for contracting the debt of $55,000,000 and issuing bonds to that amount and for levying annually a tax to pay the interest and principal of these bonds as herein provided shall go into full force and effect upon receiving at the

general election at which it is submitted the majority of votes required by section 18, article IV., of the constitution. (Approved May 3, 1921.)

SYSTEM OF STATE HIGHWAYS.

This act establishes a system of state highways.

Sec. 2. The system of state highways shall comprise the following roads: (1) All highways heretofore selected and designated as "state aid roads" under "An act to revise the law in relation to roads and bridges," approved June 27, 1913, in force July 1, 1913, and amendments thereto:

(2) All highways heretofore constructed or authorized to be constructed under section 15d of "An act to revise the law in relation to roads and bridges," approved June 27, 1913, in force July 1, 1913, and amendments thereto;

(3) All highways authorized to be constructed under "An act in relation to the construction by the state of Illinois of a statewide system of durable hard-surfaced roads upon public highways of the state and the provision of means for the payment of the cost thereof by an issue of bonds of the state of Illinois," approved June 22, 1917, adopted by vote of the people Nov. 5, 1918;

(4) All highways constructed or authorized to be constructed by the state and federal governments and known as "federal aid roads"; and

(5) All highways hereafter added to and included within such system pursuant to this act.

Such highways shall be known as "state highways."

Sec. 3. Additional mileage may be added to the state highway system in the manner provided by article IV. of "An act to revise the law in relation to roads and bridges," approved June 27, 1913, in force July 1, 1913, and amendments thereto heretofore or hereafter made.

Sec. 4. Whenever any road in the system is taken over the department of public works and buildings shall file in the department a map of the state highways herein described and defined. Where the description of any route herein given states the beginning or termination points or intermediate points of the route to be at an indefinite or unidentified point, such point or place shall be definitely identified and determined by the department. Such map shall have outlined thereon the exact location of the state highways composing such system, including crossroads, cities, villages, towns and other important points or places, and, when filed, shall fully and legally establish such system. All changes and additions to the state highway system shall also be noted on such map. A copy of such map, together with a copy of such changes, if any, shall be filed in the office of the county clerk of each county.

Sec. 5. The department of public works and buildings is charged with the administration of this act.

Sec. 6. The department of public works and buildings, in addition to, and not in limitation of, its general powers, shall have power:

(1) To determine and adopt rules, regulations and specifications and to enter into contract covering all matters and things incident to the location, relocation, construction, repair, reconstruction, improvement and maintenance of state highways;

(2) To divide the state highway system into sections or districts for the purpose of repair and maintenance and to repair and maintain such sections or districts either by patrol repair system or by gang repair system;

(3) To employ and discharge, without reference to state civil service act, all engineers, draftsmen, surveyors, agents, superintendents or expert help, foremen, repair men and laborers necessary in construction, maintenance and repair of state highways;

(4) To purchase, rent and acquire all machinery, implements, tools and material incident to or necessary in the location, relocation, construction, reconstruction, repair, improvement and maintenance of state highways.

(5) To purchase, acquire and maintain tractors, trucks, wagons and other vehicles, as well as horses, mules and harness, which shall be used in connection with work on state highways;

(6) To purchase and acquire quarries, gravel pits, sand pits, cement rock or other natural deposits of road material to be used in the construction and maintenance of state highways, and to quarry, dig, manufacture, prepare and use such material or deposits in such construction and maintenance or to sell, furnish and supply the same to contractors engaged in constructing, improving or maintaining highways within the state;

(7) To erect such buildings and to purchase such machinery, utensils, tools and equipment as may be necessary or essential for the proper prosecution of the work of quarrying, digging, preparing or manufacturing stone, gravel, cement and other natural deposits, pursuant to the foregoing provision, for use in the construction and maintenance of state highways, and to employ all labor required for the operation thereof;

(8) To enforce the provisions of the motor vehicle law, and,

(9) To do and perform whatever may be necessary or desirable to effectuate the provisions of this act.

Sec. 7. The highways designated in this act as state highways shall be taken over from the several towns and road districts by the department of public works and buildings in its discretion as rapidly as the appropriation made for repair, improvement and maintenance thereof permit, provided the department shall first take over the state bond issue roads. Before any highway or part thereof forming a portion of the state highway system is taken over the department of public works and buildings shall notify in writing the commissioner of highways of the town or road district of its intention so to do and of the date when it will assume the maintenance and care thereof.

Sec. 8. When a part or portion of the highway shall have been taken over it shall thereafter be constructed, reconstructed, repaired, improved and maintained by the state in accordance with the provisions of this act.

Sec. 9. The department of public works and buildings is vested with the right to acquire any land, rights or other property necessary for the construction, repair or maintenance of state highways, or necessary for relocating, widening or straightening any state highway, or necessary for any other purpose or use contemplated by this act by the exercise of the right of eminent domain under the eminent domain laws of this state.

Sec. 10. The department of public works and buildings may close temporarily to traffic any portion of a state highway for the purpose of constructing, repairing or making improvements thereon. When a portion of a state highway is so closed the department of public works and buildings shall arrange with local authorities or otherwise to maintain efficient detours around the portion of the state highway which is closed. Such detour shall be plainly and conspicuously marked with signs by which traffic may be guided around that part of the highway so closed.

Sec. 11. Any part or portion of the state highway system not taken over by the department of public works and buildings shall re-

main under the jurisdiction and control of the proper local authorities.

Sec. 12. All state aid roads, until such time as the said roads are taken over, excepting therefrom such portion of the state aid system in each county for the repair, maintenance and marking of which the state is responsible, shall be under the direct control and supervision of the county board of its county in which said roads are located, and the county board shall improve, mainain, repair by patrol system or otherwise said roads from county funds as provided herein.

Sec. 13. That, whenever the county board in its discretion shall deem it necessary to widen, relocate or alter any of said state aid roads or to build, widen, relocate or alter any ditch, drain or watercourse in order to drain or protect said state aid roads and to procure land therefor, or shall deem it necessary to acquire quarries, gravel pits, sand pits or other deposits of road material in order to carry this act into effect, it shall have the right to lease or purchase the same, and if compensation therefor cannot be agreed upon with the owner thereof, the county shall have the power of condemnation, in its name, in the same manner as near as may be as provided in "An act to provide for the exercise of the right of eminent domain," provided that the county shall not be required, in any case, to furnish bond.

Sec. 14. For the purpose of improving, maintaining and repairing the state aid roads required to be improved, maintained and repaired by the county and for the payment of lands, quarries, pits or other deposits of road material required by the county for such purpose, the county board shall have power to levy an annual tax to be known as "county highway tax." Said tax shall be in addition to the maximum of all other county taxes which the county is now or may hereafter be authorized by statute to levy upon the aggregate valuation of all taxable property within the county, and the county clerk in reducing tax levied as and when required so to do by virtue of the provisions of an act entitled "An act concerning the levy and extension of taxes," approved May 9, 1901, in force July 1, 1901, as subsequently amended, shall not consider said "county highway tax" as a part of the tax levy of the county required to be included in the aggregate of all taxes to be reduced, and no reduction of any tax levy made under the provisions of said last mentioned act and amendments thereto shall diminish any amount appropriated or levied for said "county highway tax." Said "county highway tax," together with all other county taxes, shall not exceed the present constitutional limitation unless otherwise authorized by a vote of the people of the county. All moneys derived from the "county highway tax" shall be placed in a separate fund to be known as the "county highway fund" and shall be used for no other purpose.

Sec. 15. Except under such conditions, restrictions and regulations as shall be prescribed by the department of public works and buildings no railroad or street or interurban railway or tram-railway shall be constructed upon and no gas pipe, water pipe, electric conduits or other piping be laid upon or in, and no telegraph, telephone, electric light or power poles or other poles or wires be erected upon or in any state highway.

Sec. 16. The department of public works and buildings after taking over roads shall erect and maintain standard guide and warning signs and distance boards of uniform design, throughout the state highway system.

Sec. 17. Nothing contained in this act shall be construed to modify, amend or repeal existing laws relative to the construction or improvement of state aid roads, state bond issue roads, federal aid roads or roads constructed under section 15d of the road and bridge act. (Approved June 24, 1921.)

HARBOR IN LAKE CALUMET.

A harbor, having a basin and slips, a depth of not less than minus twenty-one and thirty-four one-hundredths (—21.34) feet Chicago datum and a total area of not less than five hundred (500) acres, of which not less than three hundred (300) acres shall be in the basin, may be constructed in and near Lake Calumet in the city of Chicago.

Sec. 2. Certain terms used in this act shall be construed as follows:

(a) The term "harbor" shall refer only to water area and not to lands adjacent thereto.

(b) The term "harbor act of 1913" shall refer to that certain act entitled, "An act to enlarge the power of cities and villages in relation to harbors, canals, slips, wharves, docks, levees, piers, quay walls, breakwaters and all harbor structures, facilities, connections, improvements and utilities constructed or operated in connection therewith and for the purpose of carrying out such power to authorize the acquisition and condemnation of property and to authorize the use, occupation, recovery and acquisition of artificially made or reclaimed lands of the state and the reclamation and acquisition of the submerged lands of the state, and to repeal an act entitled, 'An act to enlarge the power of cities in relation to harbors, canals, wharves, docks, piers, slips and other harbor structures, facilities, improvements and utilities constructed or operated in connection therewith, to authorize the acquisition and condemnation of property and the use, occupation, reclamation and acquisition of the submerged lands of the state in carrying out such power, and to repeal all acts or parts of acts in conflict therewith,' approved June 10, 1911, and to repeal all other acts or parts of acts in conflict therewith," approved June 23, 1913, in force July 1, 1913, and all amendments thereof.

Sec. 3. A plan showing the form and location of such harbor may be prepared by the city of Chicago and submitted to the department of public works of the state of Illinois for approval, and the approval of such plan by said department shall be conclusive evidence, for all purposes, that such plan in every respect conforms to the provisions of this act specifying the minimum areas of the harbor and its basin, respectively; such plan, after being so approved, shall not be changed except with the approval of said department. The harbor shall be constructed in strict accordance with such approved plan.

Sec. 4. There is hereby granted to the city of Chicago all the rights, title and interest of the state of Illinois in and to the lands constituting the bed of Lake Calumet and in and to the lands, formerly part of the bed of said lake, which have been artificially made or reclaimed; excepting, however, (a) so much of said lands as shall fall within the limits of the harbor as determined by the plan thereof when approved by said department of public works, and (b) so much of said lands as may be granted to any owner of lands on the shores of the said lake by decree of the Circuit court of Cook county confirming a boundary line established by agreement, whether heretofore or hereafter entered into between said city and such shore owner under authority conferred by said harbor act of 1913.

Sec. 5. The acceptance of the foregoing grant of lands by the city council of the city of Chicago shall obligate said city to construct such harbor according to the plan as approved under the provisions of section 3, and to maintain it to the depth hereinbefore stated.

Sec. 6. The city of Chicago may use for any of the purposes authorized by the harbor act of 1913, may sell and convey and may lease for any term of years any part or parts or all of the lands granted to said city by this act. Before any such sale or lease shall become effective such sale or lease shall be approved in writing by the director of public works and buildings of the state of Illinois, and, in case of approval, there shall be affixed to the instrument by which such sale or lease is effective the seal of the department of public works and buildings of the state of Illinois.

Sec. 7. All moneys received by the city of Chicago from the sale or lease of lands granted to said city by this act shall be credited to a fund which shall be called the Lake Calumet harbor fund, and all moneys expended by said city for any purpose in relation to the lands granted to said city by this act or in relation to the construction and maintenance of the harbor may be charged to said fund, and said fund shall be used for no other purpose.

Sec. 8. The sanitary district of Chicago, hereinafter called the sanitary district, is hereby authorized and empowered to construct and maintain such harbor, provided the city of Chicago, under authority conferred by said harbor act of 1913, shall by ordinance permit or authorize the sanitary district to construct such harbor; and the sanitary district is hereby authorized and empowered to accept such ordinance.

Sec. 9. In the event of the passage of such ordinance by the city of Chicago, the acceptance thereof by the sanitary district and the filing of a certified copy of such ordinance and acceptance in the office of the recorder of deeds of the county of Cook, the following provisions of this section shall apply and become operative:

(a) The sanitary district shall automatically become seized and possessed of and shall own and enjoy all the then right, title and interest of the city of Chicago and of the state of Illinois in and to the lands granted to said city by this act and in and to any and all unpaid indebtedness for the purchase money on sales made by said city of any of the lands granted to said city by this act.

(b) The sanitary district may sell and convey and may lease for any term of years any part or parts or all of the lands which may be acquired by the sanitary district under the provisions of this act. Before any such sale or lease shall become effective it shall be approved in writing by the director of public works and buildings of the state of Illinois and, in case of approval, there shall be affixed to the instrument by which such sale or lease is effected the seal of the department of public works and buildings of the state of Illinois.

(c) The sanitary district shall pay to the city of Chicago the then debit balance of the Lake Calumet harbor fund or said city shall pay to the sanitary district the then credit balance of such fund, as the case may be, and the sanitary district shall charge or credit such balance to a fund of the same name.

(d) All moneys received by the sanitary district from the sale or lease of the lands or on the indebtedness for part purchase moneys acquired by the sanitary district under the provisions of this act shall be credited to said Lake Calumet harbor fund, and all moneys expended by the sanitary district for any purpose in relation to the lands acquired by the sanitary district under the provision of this act or in relation to the construction and maintenance of the harbor may be charged to said fund, and said fund shall be used for no other purpose.

(e) The obligation to construct and maintain such harbor, according to the plan as approved under the provisions of section 3 and to the depth stated, shall rest on the sanitary district, and the city of Chicago shall be released therefrom.

(f) In addition to all other taxes authorized by law, the sanitary district is hereby authorized and empowered to levy and collect, in each of four (4) consecutive years, a tax of one-half (½) of one (1) mill on each dollar of taxable property embraced in said sanitary district according to the valuation of the same as made for the purpose of state and county taxation by the general assessment last preceding the time when such additional tax shall be levied; and the proceeds of such additional tax shall be credited to such Lake Calumet harbor fund: Provided, That the county clerk, in extending said additional tax upon the taxable property within the sanitary district, shall not in any event reduce the same and that said additional tax shall not be included in the two (2) per cent limitation nor subject to the provisions of an act entitled, "An act concerning the levy and extension of taxes," approved May 9, 1901, in force July 1, 1901, as subsequently amended. (Approved June 24, 1921.)

INTERSTATE HARBOR COMMISSION.

Whereas, the state of Indiana passed an act for the establishment of the interstate harbor commission of Illinois and Indiana to investigate and report upon the feasibility of a public interstate harbor at or near Wolf lake and Lake Michigan, lying partly in the cities of Hammond and Whiting, Ind., and partly in the city of Chicago, Ill., being chapter 187 of the acts of Indiana, approved March 10, 1921; and,

Whereas, it was enacted in such acts of Indiana that a commission composed of five commissioners be appointed, two commissioners by the governor of the state of Indiana, two commissioners by the governor of the state of Illinois and one commissioner by the chief of engineers of the United States of America and the secretary of war; and,

Whereas, under the said act of the state of Indiana such interstate harbor commission is not to become effective until similar legislation is enacted by the general assembly of the state of Illinois, and it was further enacted in the said act of Indiana that the general assembly of the state of Illinois be requested to take similar action for the purpose of carrying out the provisions of said act and co-operating with the state of Indiana for such purposes; and,

Whereas, it appeared that in the Calumet region in the Chicago district of Illinois and Indiana there is much advancement and progress in lake, river and rail commerce which is not only local but also interstate; and,

Whereas, the location is at the end of the deep water navigation of the great lakes and the Illinois and Mississippi rivers and other waterways; and,

Whereas, with the opening of the St. Lawrence waterway, the proposed harbor will become available to vessels from ocean ports of the world; and,

Whereas, said location is approximately situated in the center of population of the United States and at the greatest railroad center of the world, and the site is ideally adapted for the development and operation of a public interstate transfer harbor; and,

Whereas, the United States engineers, recognizing the necessity and feasibility of the proposed public interstate harbor, have prepared plans for the same, contemplating the construction by the United States of an outward protecting breakwater in Lake Michigan, approximately three and one-half miles in length, at a cost of approximately six million dollars ($6,000,000), and dredging operations by the United States shoreward of said breakwater in and to the proposed inner basin in Wolf lake,

at an additional cost, providing that suitable co-operative harbor construction in and near said Wolf lake be undertaken and performed by another proper public body, said plans having been approved by the chief of engineers and the secretary of war; and,

Whereas, it is desirable that additional information and data be secured by the general assembly of the state of Illinois before proceeding upon the appointment of a harbor board or arranging otherwise for the development and construction of such proposed public interstate harbor; therefore, the following is proposed:

An Act to Create the Interstate Harbor Commission of Illinois and Indiana and Making an Appropriation Therefor.

Sec. 1. Be it enacted, etc., That there is hereby created a commission, to be known as the interstate harbor commission of Illinois and Indiana, comprising five members, two members to be named by the governor of Indiana, one by the chief of engineers, U. S. A., and secretary of war, and the director of the department of public works and buildings of Illinois and superintendent of the division of waterways of said department as members of said commission representing the state of Illinois, for the purpose of investigating and reporting upon the feasibility of a proposed public interstate harbor, a proposed plan therefor, the estimated cost of, the proposed method of development and management, its estimated receipts and operating expenses and all other data pertaining to said project.

Sec. 2. The director of public works and buildings and the superintendent of the division of waterways as the Illinois members of said interstate harbor commission of Illinois and Indiana may co-operate with the commissioners appointed by the governor of the state of Indiana, pursuant to chapter 187 of the acts of Indiana, approved by that state March 10, 1921, and with the commissioner who may be appointed and designated by the chief engineer of the United States and the secretary of war. Illinois members of said commission shall serve without additional compensation, but shall be reimbursed for their actual traveling and other expenses incurred in the performance of their duties.

Sec. 3. The said commissioners shall co-operate with the commissioners appointed by the governor of the state of Indiana and with the commissioner appointed by the chief of engineers of the United States and the secretary of war in the election of such officers of said joint commission, and also in the establishment of such headquarters as shall be considered necessary by said Illinois members.

Sec. 4. The said commission hereby created shall employ such engineering, clerical and other assistants, or the two members of said commission representing the state of Illinois may assign such engineers, experts or other assistants now employed in the work of the department of public works and buildings, as may be necessary to conduct such investigation, and shall prepare and present to the general assembly of the state of Illinois, the general assembly of the state of Indiana and to the chief of engineers of the United States and the secretary of war a full and detailed report of the result of its investigation and recommendations.

Sec. 5. There is hereby appropriated to the said interstate harbor commission of Illinois and Indiana the sum of twenty-five thousand dollars ($25,000) out of any moneys in the state treasury not otherwise appropriated for the purposes of such investigation as herein defined.

Sec. 6. This appropriation is subject to the provisions of "An act in relation to state finance," approved June 10, 1919, in force July 1, 1919: Provided further, Before any obligation is incurred to be paid from the appropriation herein made the approval in writing of the director of the department of public works and buildings of Illinois shall be obtained. (Approved June 28, 1921.)

FULL SUFFRAGE FOR WOMEN.

All women, citizens of the United States, being of the age of 21 years and upward, having resided in the state one year, in the county ninety days and in the election district thirty days next preceding any election therein, shall be entitled to vote at such election, and shall not be denied the right to vote at any and all elections by reason of sex: Provided, At any such election for which registration is required by any provision of law women shall register in the same manner as male voters. Provided, further, That it shall not be necessary at any election to provide separate ballots or ballot boxes for women.

Sec. 2. That an act entitled "An act granting women the right to vote for presidential electors and certain other officers, and to participate and vote in certain matters and elections" (approved June 26, 1913, in force July 1, 1913) be and the same is hereby repealed.

Sec. 3. Because of an emergency, this act shall take effect upon its passage. (Approved April 29, 1921.)

ARMISTICE DAY A HOLIDAY.

The eleventh day of November of each year shall be a holiday, to be known as Armistice day, which shall be observed throughout the state as a day on which to hold appropriate exercises in commemoration of the victory of the United States armies in the great world war.

Sec. 2. Armistice day shall, for all purposes whatever, as regards the presenting for payment or acceptance and of protesting and giving notice of the dishonor of bills of exchange, bank checks and promissory notes, and as regards days of grace upon commercial paper, be treated and considered as is the first day of the week, commonly called Sunday. (Approved June 24, 1921.)

ILLINOIS PROHIBITION ACT.

Sec. 1. Be it enacted, etc., That this act shall be known and cited as the "Illinois prohibition act."

Sec. 2. When used in this act, the word "liquor" or the phrase "intoxicating liquor" shall be construed to include alcohol, brandy, whisky, rum, gin, beer, ale, porter and wine, and in addition thereto any spirituous, vinous, malt or fermented liquor, liquids and compounds, whether medicated, proprietary, patented or not, and by whatever name called, containing one-half of 1 per centum or more of alcohol by volume, which are fit for use for beverage purposes: Provided, That the foregoing definition shall not extend to dealcoholized wine nor to any beverage or liquid produced by the process by which beer, ale, porter or wine is produced, if it contains less than one-half of 1 per centum of alcohol by volume, and is made as prescribed in section 45 of this act, and is otherwise denominated than as beer, ale or porter, and is contained and sold in or from such sealed and labeled bottles, casks or containers as the attorney-general, but in case the office of commissioner of prohibition shall be created, then said commissioner, may by regulation prescribe.

(2) The word "person" shall mean and include natural persons, associations, copartnerships and corporations.

(3) The term "application" shall mean a formal written request supported by a verified statement of facts showing that the attorney-general or officer authorized to do so may grant the request.

(4) The term "permit" shall mean a formal written authorization by the attorney-general, or in case the office of commissioner of prohibition shall be created, then by such commissioner, setting forth specifically therein the things that are authorized.

(5) The term "bond" shall mean an obligation authorized or required by or under this act or any regulation, executed in such form and for such a penal sum as may be required by a court or other competent authority, or prescribed by regulation.

(6) The term "still" wherever used in this act shall be construed to include any mechanism, apparatus or device kept or maintained for the purpose of distilling, making or manufacturing intoxicating liquors which by any process of evaporation separates alcoholic liquor from grain, molasses, fruit or any other fermented substance, or that is capable of any such use.

(7) The phrase "industrial alcohol" shall be construed to mean that substance known as ethyl alcohol, hydrated oxide of ethyl or spirits of wine, from whatever source or whatever process produced.

(8) The term "judge" shall include justice of the peace or police magistrate, except in section 22.

Sec. 3. No person shall on or after the date when this act goes into effect manufacture, sell, barter, transport, deliver, furnish or possess any intoxicating liquor except as authorized in this act, and all the provisions of this act shall be liberally construed to the end that the use of intoxicating liquor as a beverage may be prevented.

Liquor for nonbeverage purposes and wine for sacramental purposes may be manufactured, purchased, sold, bartered, transported, delivered, furnished and possessed, but only as herein provided, and the attorney-general may, upon application, issue permits therefor, but in case the office of commissioner of prohibition shall be created, then such commissioner shall issue said permits: Provided, That nothing in this act shall prohibit the purchase and sale of warehouse receipts covering distilled spirits on deposit in government bonded warehouses.

Sec. 4. The articles enumerated in this section shall not, after having been manufactured and prepared for the market, be subject to the provisions of this act if they correspond with the following descriptions and limitations, namely:

(a) Denatured alcohol or denatured rum produced and used as provided by laws and regulations now or hereafter in force.

(b) Medicinal preparations manufactured in accordance with formulas prescribed by the United States Pharmacopœia, National Formulary of the American Institute of Homeopathy, that are unfit for use for beverage purposes.

(c) Patented, patent and proprietary medicines that are unfit for use for beverage purposes.

(d) Toilet, medicinal and antiseptic preparations and solutions that are unfit for beverage purposes.

(e) Flavoring extracts and sirups that are unfit for use as a beverage or for intoxicating beverage purposes.

(f) Vinegar and preserved sweet cider.

A person who manufactures any of the articles mentioned in this section may purchase and possess alcohol for that purpose, but he shall secure permits from the attorney-general, or in case the office of commissioner of prohibitions shall be created, then from such commissioner, to manufacture such articles and to purchase such alcohol, keep the records and make the reports specified in this act. No such manufacturer shall sell, use or dispose of any alcohol otherwise than as an ingredient of the article authorized to be manufactured therefrom. No more alcohol shall be used in the manufacture of any extract, sirup or the articles named in paragraphs b, c and d of this section which may be used for beverage purposes than the quantity necessary for extraction or solution of the elements contained therein and for the preservation of the article.

Any person who shall knowingly sell any of the articles mentioned in paragraphs a, b, c and d of this section for beverage purposes, or any extract or sirup for intoxicating beverage purposes, or who shall sell any of the same under circumstances from which the seller might reasonably deduce the intention of the purchaser to use them for such purposes, or shall sell any beverage containing ½ of 1 per centum or more of alcohol by volume in which any extract, sirup or other article is used as an ingredient, shall be subject to the penalties provided in paragraph (a) of section 33 of this act. If the attorney-general, but in case the office of commissioner of prohibition shall be created then such commissioner, shall find, after notice and hearing as provided for in section 6 of this act, that any person has sold flavoring extract, sirup or beverage in violation of this paragraph, he shall notify such person, and any known principal for whom the sale was made, to desist from selling such article, and it shall thereupon be unlawful for a period of one year thereafter for any person so notified to sell any such extract, sirup or beverage without making an application for, giving a bond and obtaining a permit so to do, which permit may be issued upon such condition as the said official may deem necessary to prevent such illegal sales, and in addition said official shall require a record and report of sales: Provided, Nothing contained in this paragraph shall be construed to apply to the persons absolutely prohibited from selling, as contained in section 5 hereof.

Sec. 5. No person shall sell, barter, furnish, give away or possess any of the articles enumerated in paragraphs b, c and d of section 4 which contain ½ of 1 per centum or more of alcohol by volume, whether fit or unfit for beverage use, in any restaurant, poolroom, shoe-shining parlor, bowling alley, ice-cream parlor, soft-drink establishment or public place where liquid refreshments of any kind are served: Provided, That nothing in this section shall be construed to prohibit the sale of any of the articles enumerated in paragraphs b, c and d of section 4, which are unfit for beverage purposes, in a bona fide drug store, bona fide general store or bona fide grocery store. Any person violating this section shall be punished as provided for in paragraph (a) of section 33 of this act.

Sec. 6. Whenever the attorney-general, but in case the office of commissioner of prohibition shall be created, then such commissioner, has reason to believe that any article mentioned in section 4 does not correspond with the descriptions and limitations therein provided, he shall cause an analysis of said article to be made, and if, upon such analysis, said officer shall find that said article does not so correspond he shall give not less than fifteen days' notice in writing to the person who is the manufacturer thereof to show cause why said article should not be dealt with as an intoxicating liquor, such notice to be served personally or by registered mail, as such officer may determine, and shall specify the time when, the place where and the name of the agent or official before whom such person is required to appear. If the manufacturer of said article fails to show to the satisfaction of the attorney-general or commissioner of prohibition, as the case may be, that the article corresponds

to the descriptions and limitations provided in section 4 of this act, his permit to manufacture and sell such article shall be revoked. The manufacturer may by appropriate proceeding in a court of equity have the action of said officer reviewed, and the court may affirm, modify or reverse his finding as the facts and law of the case may warrant, and during the pendency of such proceedings may restrain the manufacture, sale or other disposition of such article.

Sec. 7. No one shall manufacture, sell, purchase, transport or prescribe any liquor unless for some purpose expressly permitted by this act, and in every such case a permit must first be obtained from the attorney-general, but in case the office of commissioner of prohibition shall be created, then from such commissioner, except that a person may without a permit purchase and use liquor for medicinal purposes when prescribed by a physician as herein provided, and except that any person who in the opinion of the attorney-general, but in case the office of commissioner of prohibition shall be created, then in the opinion of such commissioner, is conducting a bona fide hospital or sanitarium engaged in the treatment of persons suffering from alcoholism, may, under such rules, regulations and conditions as said officer shall prescribe, purchase and use in accordance with the methods in use in such institutions liquor, to be administered to the patients of such institution under the direction of a duly qualified physician employed by such institution.

All permits to manufacture, prescribe, sell or transport liquor may be issued for one year, and shall expire on the 31st day of December next succeeding the issuance thereof: Provided, That said officer may, without formal application or new bond, extend any permit granted under this act or laws now in force after Aug. 31 in any year to Dec. 31 of the succeeding year: Provided, further, That permits to purchase liquor for the purpose of manufacturing or selling as provided in this act shall not be in force to exceed ninety days from the day of issuance. A permit to purchase liquor for any other purpose shall not be in force to exceed thirty days. Permits to purchase liquor shall specify the quantity and kind to be purchased and the purpose for which it is to be used. No permit shall be issued to any person who, within one year prior to the application therefor or issuance thereof, shall have violated the terms of any permit issued under this act or any law of the United States regulating traffic in liquor. No permit shall be issued to any one to sell liquor at retail, unless the sale is to be made through a registered pharmacist, local registered pharmacist or registered assistant pharmacist designated in the permit and duly licensed under the laws of this state to compound and dispense medicine prescribed by a duly licensed physician. No one shall be given a permit to prescribe liquor unless he is a physician duly licensed to practice medicine in this state and is actively engaged in the practice of such profession in this state. Every permit shall be in writing, dated when issued and signed by the attorney-general, or in case the office of commissioner of prohibition shall be created, then by such commissioner or his authorized agent. It shall give the name and address of the person to whom it is issued and shall designate and limit the acts that are permitted and the time when and place where such acts may be performed. No permit shall be issued until a verified written application shall have been made therefor, setting forth the qualification of the applicant and the purpose for which the liquor is to be used.

In the event of the refusal of any application for any permit, provided for in this act, the applicant may have a review of his decision before a court of equity in the manner provided in section 6 hereof.

All blanks and forms for applications, returns, permits, prescriptions, etc., which may be required under the provisions of this act, shall, whenever feasible, be similar to the blanks and forms for applications, returns, permits, prescriptions, etc., required by the laws of the United States: Provided, That in every case where any prescription, label or record is required to be written, or written and kept, or canceled and kept, under this act, and a like record or act is required under the laws of the United States, it shall be deemed sufficient for the purpose of this act, if the person so required to write or write and keep, or cancel and keep such prescription, label or record, shall comply with the requirements of the federal government in regard thereto: Provided, further, That nothing contained in this paragraph shall be construed to relieve any such person from the duties imposed by section 41 hereof, but the provisions of said section are hereby made to expressly apply to every such person and to all such prescriptions, labels and records.

Nothing in this act shall be held to apply to the manufacture, sale, transportation, possession or distribution of wine for sacramental purposes, or like religious rites, except section 7 (save as the same requires a permit to purchase) and section 10 hereof, and the provisions of this act prescribing penalties for the violation of either of said sections. No person to whom a permit may be issued to manufacture, transport or sell wines for sacramental purposes or like religious rites shall sell, barter, exchange or furnish any such to any person not a rabbi, minister of the gospel, priest or an officer duly authorized for the purpose by any church or congregation, nor to any such except upon an application duly subscribed by him, which application, authenticated as regulations may prescribe, shall be filed and preserved by the seller. The head of any conference or diocese or other ecclesiastical jurisdiction may designate any rabbi, minister or priest or supervise the manufacture of wine to be used for the purposes and rites in this section mentioned, and the person so designated may, in the discretion of the officer empowered to grant permits, be granted a permit to supervise such manufacture.

Sec. 8. No one except a physician holding a permit shall prescribe liquor. Such permit shall be granted by the attorney-general, unless the office of commissioner of prohibition shall be created, then such commissioner shall grant said permit. It shall be unlawful to prescribe wine, beer or any alcoholic malt liquor. And no physician shall prescribe any liquor unless after careful physical examination of the person for whose use such prescription is sought. Not more than a total quantity of one pint of intoxicating liquor shall be prescribed for use by the same person within any period of ten days and no prescription shall be filled more than once, and no person shall procure or accept or have filled any prescription for more than one pint of liquor within said period of ten days. Any registered pharmacist, local registered pharmacist, or registered assistant pharmacist filling a prescription for liquor shall at the time endorse upon it over his own signature the word "canceled," together with the date when the liquor was delivered, and then make the same a part of the record that he is required to keep as herein provided.

Every physician who issues a prescription for liquor shall keep a record, alphabetically arranged in a book prescribed by the officer empowered to grant permits to physicians, which shall show the date of issue, amount prescribed, to whom issued, the purpose or ailment for which it is to be used and directions for use, stating the amount and frequency of the dose.

Sec. 9. If at any time there shall be filed with the attorney-general, but in case the office of commissioner of prohibition shall be created, then before such commissioner, a complaint under oath setting forth facts showing, or if the said officer has reason to believe, that any person who has a permit is not in good faith conforming to the provisions of this act, or has violated the laws of the state relating to intoxicating liquor, such officer or his agent shall immediately issue an order citing such person to appear before him on a day named not more than thirty and not less than fifteen days from the date of service upon such permittee of a copy of the citation, which citation shall be accompanied by a copy of such complaint, or in the event that the proceedings be initiated by the attorney-general or commissioner of prohibition with statement of the facts constituting the violation charged, at which time a hearing shall be held unless continued for cause. Such hearing shall be held within fifty miles of the place where the offense is alleged to have occurred, unless the parties agree on another place. If it is found that such person has been guilty of willfully violating any such laws, as charged, or has not in good faith conformed to the provisions of this act, such permit shall be revoked, and no permit shall be granted to such persons within one year thereafter. Should the permit be revoked by the officer granting it, the permittee may have a review of his decision before a court of equity in the manner provided in section 6 hereof. During the pendency of such action such permit shall be temporarily revoked.

Sec. 10. No person shall manufacture, purchase for sale, sell or transport any liquor without making at the time a permanent record thereof showing in detail the amount and kind of liquor manufactured, purchased, sold or transported, together with the names and addresses of the persons to whom sold, in case of sale, and the consignor and consignee in case of transportation, and the time and place of such manufacture, sale or transportation. The attorney-general, or in case the office of commissioner of prohibition shall be created, then such commissioner, may prescribe the form of such record, which shall at all times be open to inspection as in this act provided.

Sec. 11. All manufacturers and wholesale or retail druggists shall as a part of the records required of them keep a copy of all permits to purchase on which a sale of any liquor is made, and no manufacturer or wholesale druggist shall sell or otherwise dispose of any liquor except at wholesale and only to persons having permits to purchase in such quantities.

Sec. 12. All persons manufacturing liquor for sale under the provisions of this act shall securely and permanently attach to every container thereof, as the same is manufactured, a label stating name of manufacturer, kind and quantity of liquor contained therein and the date of its manufacture, together with the number of the permit authorizing the manufacture thereof, and all persons possessing such liquor in wholesale quantities shall securely keep and maintain such label thereon, and all persons selling at wholesale shall attach to every package of liquor, when sold, a label setting forth the kind and quantity of liquor contained therein, by whom manufactured, the date of sale and the person to whom sold, which label shall likewise be kept and maintained thereon until the liquor is used for the purpose for which such sale was authorized.

Sec. 13. It shall be the duty of every carrier to make a record at the place of shipment of the receipt of any liquor transported, and he shall deliver liquor only to persons who present to the carrier a verified copy of a permit to purchase which shall be made part of the carrier's permanent record at the office from which delivery is made.

The agent of the common carrier is hereby authorized to administer the oath to the consignee in verification of the copy of the permit persented, who, if not personally known to the agent, shall be identified before the delivery of the liquor to him. The name and address of the person identifying the consignee shall be included in the record.

Sec. 14. It shall be unlawful for a person to use or induce any carrier or any agent or employe thereof to carry or ship any package or receptacle containing liquor without notifying the carrier of the true nature and character of the shipment. No carrier shall transport nor shall any person receive liquor from a carrier unless there appear on the outside of the package containing such liquor the following information:

Name and address of the consignor or seller, name and address of the consignee, kind and quantity of liquor contained therein and number of the permit to purchase or ship the same, together with the name and address of the person using the permit.

Sec. 15. It shall be unlawful for any consignee to accept or receive any package containing any liquor upon which appears a statement known to him to be false, or for any carrier or other person to consign, ship, transport or deliver any such package knowing such statement to be false.

Sec. 16. It shall be unlawful to give to any carrier or any officer, agent, or person acting or assuming to act for such carrier an order requiring the delivery to any person of any liquor or package containing liquor consigned to, or purporting or claimed to be consigned to, a person, when the purpose of the order is to enable any person not an actual bona fide consignee to obtain such liquor.

Sec. 17. It shall be unlawful to advertise anywhere, or by any means or method, liquor, or the manufacture, sale, keeping for sale or furnishing of the same, or where, how, from whom, or at what price the same may be obtained. No one shall permit any sign or billboard containing such advertisement to remain upon one's premises. But nothing herein shall prohibit manufacturers and wholesale druggists holding permits to sell liquor from furnishing price lists, with descriptions of liquor for sale, to persons permitted to purchase liquor, or from advertising alcohol in business publications or trade journals circulating generally among manufacturers of lawful alcoholic perfumes, toilet preparations, flavoring extracts, medicinal preparations and like articles: Provided, however, that nothing in this act shall apply to newspapers published in foreign countries when mailed to this country.

Sec. 18. It shall be unlawful to advertise, manufacture, sell or possess for sale any utensil, contrivance, machine, preparation, compound, designed or intended for use in the unlawful manufacture of intoxicating liquor.

Sec. 19. No person shall solicit or receive, nor knowingly permit his employes to solicit or receive, from any person any order for liquor or give any information of how liquor may be obtained in violation of this act.

Sec. 20. Any person who shall be injured

in person, property, means of support or otherwise by any intoxicated person, or by reason of the intoxication of any person, whether resulting in death or not, shall have a right of action against any person who shall, by unlawfully selling to or unlawfully assisting in procuring liquor for such intoxicated person, have caused or contributed to such intoxication, and in such action such person shall have a right to recover actual and exemplary damages. In case of the death of either party the action or right of action given by this section shall survive to or against his or her executor or administrator. The amount so recovered by either wife or child shall be his or her sole and separate property. Such action may be brought in any court of competent jurisdiction. In any case where parents shall be entitled to such damages, either the father or mother may sue alone therefor, but recovery by one of such parents shall be a bar to suit brought by the other.

Sec. 21. Any room, house, building, boat, vehicle, structure or place where intoxicating liquor is manufactured, sold, kept or bartered in violation of this act, or where any mash, still or other property designed for the illegal manufacture of liquor is kept, and all intoxicating liquor, mash, still or other property kept and used in maintaining the same, is hereby declared to be a common nuisance; a single unlawful sale or barter, or a single act of manufacturing liquor unlawfully shall constitute a nuisance as herein defined. And any person who maintains such a common nuisance shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $500 or be imprisoned not more than one year, or both. If a person has knowledge or reason to believe that his room, house, building, boat, vehicle, structure or place is occupied or used for the manufacture or sale of liquor contrary to the provisions of this act, and suffers the same to be so occupied or used, such room, house, building, boat, vehicle, structure or place shall be subject to a lien for and may be sold to pay all fines and costs assessed against the person guilty of such nuisance for such violation, and any such lien may be enforced by action in any court having jurisdiction.

Sec. 21. (a) No lien, as provided in section 21, shall take effect until action to enforce it is commenced in the county within which the property is located, unless when prosecution shall be commenced against any occupant of any premises under this section there shall be filed in the office of the recorder of deeds of such county an affidavit setting forth that such suit has been instituted, giving the name of the defendant, the name of the owner of the property and a description of said property, such description to be the legal description in case of real estate. Provided further, however, that if the property in question shall be real estate the title to which is registered in the office of the registrar of titles under the provisions of an act entitled, "An act concerning land titles," approved and in force May 1, 1897, as subsequently amended, then such affidavit shall be filed in the office of the registrar of titles of the county in which the real estate is situated, instead of the office of the recorder of deeds. If such an affidavit shall be filed, and it shall subsequently be determined by a court of competent jurisdiction that such a lien exists, the lien shall relate back to the date of such filing, but unless action to enforce such lien shall be commenced within six months after the filing of such affidavit the filing shall be deemed of no effect whatever.

Sec. 22. Any action to enjoin any nuisance defined in this act may be brought in the name of the state of Illinois by the attorney-general of the state or by any state's attorney, city attorney or prosecuting attorney of any city, or by the commissioner of prohibition, if such office be created, or by any citizen of the county where a nuisance as herein defined exists. Such action shall be brought and tried as an action in equity by the court, without a jury. If it is made to appear by affidavits or otherwise, to the satisfaction of the court, or judge in vacation, that such nuisance exists, a temporary writ of injunction shall forthwith issue restraining the defendant from conducting or permitting the continuance of such nuisance until the conclusion of the trial. If a temporary injunction is prayed for the court may issue an order restraining the defendant and all other persons from removing or in any way interfering with the liquor or fixtures or other things used in connection with the violation of this act constituting such nuisance until the conclusion of the trial.

Upon the granting of said temporary injunction and five days' written notice being given to the defendant the court shall set the matter down for a preliminary hearing on the question of whether said temporary injunction shall be dissolved or remain in full force until the final hearing of the cause. At such hearing both parties to the action shall have the right to present evidence in the form of affidavits or oral testimony. If the hearing shall be continued at defendant's instance, the temporary writ as prayed for shall be granted as a matter of course. After said hearing for temporary injunction the court shall dissolve the temporary injunction if it finds that the injunction was improvidently granted. If the court shall find on such hearing that such nuisance exists, it shall order that said temporary order shall stand, and shall further order that the room or place where such violation occurred shall not be occupied or used for any purpose pending the hearing of the case on its merits, and that the property be held in statu [quo].

No bond shall be required in instituting such proceedings.

It shall not be necessary for the court to find the property involved was being unlawfully used, as aforesaid, at the time of the hearing. Upon the trial of the cause, on finding that the material allegations of the petition are true, the court shall order that no liquor shall be manufactured, sold, bartered or stored in such room, house, building, boat, vehicle, structure or place, or any part thereof. And upon judgment of the court ordering such nuisance to be abated the court may order that the room, house, building, structure, boat, vehicle or place shall not be occupied or used for one year thereafter; but the court may, in its discretion, permit it to be occupied or used if the owner, lessee, tenant or occupant thereof shall give bond with sufficient surety, to be approved by the court making the order, in the penal and liquidated sum of not more than ten thousand ($10,000) dollars, payable to the people of the state of Illinois, and conditioned that intoxicating liquor will not thereafter be manufactured, sold, bartered, kept or otherwise disposed of therein or thereon, and that he will pay all fines, costs and damages that may be assessed for any violation of this act on said property.

If the bill as herein provided is filed upon the relation of a citizen, the proceeding shall not be dismissed for want of prosecution, nor upon motion of such relator, unless there is filed with such motion a sworn statement made by such relator and his attorney setting forth the reasons therefor, and unless such dismissal is approved by the state's attorney in writing or in open court. If the court is of the opinion that such proceeding ought not to be dismissed it may overrule such motion and

may enter an order directing the state's attorney to prosecute such cause to final determination. The cause shall be heard immediately upon issue being joined, and if the hearing is continued beyond the next term, the court in term time, or a judge in vacation, may permit any citizen of the county consenting thereto to be substituted for the original relator.

When any injunction, as herein provided, has been granted, it shall be binding upon the defendant and shall act as an injunction in personam against defendant throughout the state.

Sec. 23. Complete equity jurisdiction is hereby conferred upon all County courts, concurrent with Circuit courts, and the Superior court of Cook county, to hear and determine all injunction cases which may be brought under this act.

Sec. 24. Any person who shall, with intent to effect a sale of liquor, by himself, his employe, servant or agent, for himself or any person, company or corporation, keep or carry around on his person or in a vehicle or other conveyance whatever, or leave in a place for another to secure any liquor, or who shall travel to solicit or solicit or take or accept orders for the sale, shipment or delivery of liquor in violation of this act is guilty of a nuisance and may be restrained by injunction, temporary and permanent, for doing or continuing to do any of said acts or things.

In such proceedings it shall not be necessary to show any intention on the part of the accused to continue such violation, if the action is brough' within sixty days following any such violation of the law.

For removing and selling property in enforcing this act, the officer shall be entitled to charge and receive the same fee as the sheriff of the county would receive for levying upon and selling property under execution, and for closing the premises and keeping them closed a reasonable sum shall be allowed by the court.

Any violation of this act upon any leased premises by the lessee or occupant thereof shall, at the option of the lessor, work a forfeiture of the lease.

Sec. 25. In the case of the violation of any injunction, temporary or permanent, granted pursuant to the provisions of this act, the court or in vacation a judge thereof may summarily try and punish the defendant. The proceedings for punishment for contempt shall be commenced by filing with the clerk of the court from which such injunction issued information under oath setting out the alleged facts constituting the violation, whereupon the court or judge shall forthwith cause a warrant to issue under which the defendant shall be arrested. The trial may be had upon affidavits or either party may demand the production and oral examination of the witnesses. Any person found guilty of contempt under the provisions of this section shall be punished by a fine of not less than $500 nor more than $1,000 or by imprisonment of not less than ninety days nor more than ten months or by both fine and imprisonment.

Sec. 26. It shall be the duty of the state's attorney of every county diligently to prosecute any and all persons violating any of the provisions of this act in his county, and he shall be responsible for the proper enforcement of this act, and whenever he shall have any information or knowledge or have any reason to believe that any of the provisions of this act are being violated in his county, he shall use every legitimate means at his command to secure the necessary and proper evidence of such violation, and immediately upon securing such evidence he shall file a complaint or cause a complaint to be filed against any person against whom he shall have any evidence of any such violation, and he shall have said person arrested and shall vigorously prosecute said complaints on said charges to final judgment.

In case the existence of any place where intoxicating liquors are manufactured, sold, kept or bartered in violation of law is disclosed in any criminal proceedings, it shall be the duty of the state's attorney to proceed promptly to enforce the provisions of this act against such place as a nuisance.

The attorney-general, but in case the office of commissioner of prohibition shall be created, then such commissioner, shall through his assistants, agents or investigators obtain evidence of violation, shall make or cause to be made complaints against violators whenever such evidence is secured; and he and his assistants are hereby given authority to sign, verify and file any such complaints, affidavits, petitions and papers required under this act. But nothing in this act shall in any way relieve state, county, municipal or other officers from the responsibility of enforcing the laws relating to the liquor traffic.

It shall be the duty of all county boards and the board of commissioners of Cook county to lend every possible assistance to the state's attorney, sheriff and other officials in the enforcement of this act.

Sec. 27. It shall be unlawful for any person to own, operate or maintain or have in his possession or any interest in a still, unless he shall first secure a permit from the attorney-general, but in case the office of commissioner of prohibition shall be created, then from such commissioner, to own such still, which permit shall be kept conspicuously posted at the place where the still is located.

Thirty days from the date when this act shall have become operative are hereby given to persons owning stills to dispose of same or make application for a permit as provided for in this section.

Any person who violates this section shall, for the first offense, be fined not more than $200 or imprisoned not exceeding six months, or both; and for a second or subsequent offense shall be deemed guilty of a felony and upon conviction therof shall be fined not less than $500 nor more than $2,000 and confined in the penitentiary for one year.

Sec. 28. It shall be unlawful to have or possess any liquor intended for use in violating this act or property designed for the illegal manufacture of liquor, and no property right shall exist in any such liquor or property.

Sec. 29. Whenever complaint is made in writing, verified by affidavit, to any judge having cognizance of criminal offenses, that complainant has just and reasonable grounds to believe and does believe that intoxicating liquor is manufactured, possessed, kept for sale, used, disposed of or transported in violation of any law of this state, or any mash, still or other property designed for the illegal manufacture of liquor is possessed in any house, building, premises, boat, vehicle, receptacle or any other place whatsoever (particularly describing and designating the same), with the facts upon which such belief is based, the judge may issue a search warrant as hereinafter provided: Provided, however, no warrant shall be issued to search a private dwelling occupied as such unless such residence is a place of public resort or intoxicating liquor is s ld or kept for sale or possessed therein in violation of the law, or any mash, still or other property designed for the illegal manufacture of liquor is therein kept. The property seized on any such warrant shall not be taken from the officer seizing the same on any writ of replevin or

other like process. Each complaint may be substantially in the following form:

State of Illinois, County of ....., ss.: Complaint for Search Warrant.

Sec. 30. If the judge before whom any such complaint is made is satisfied that there is reasonable cause for such belief he shall issue a warrant directed to any peace officer having jurisdiction, whom the complainant may designate, commanding him to forthwith enter the house, building, premises, boat, vehicle, receptacle or other place therein described and designated (which shall be particularly described and designated in the warrant as in the complaint) and make diligent and careful search for intoxicating liquor and any mash, still or other property as provided in section 29, and, if any be there found, to seize the same with the vessels containing the same, and all property, implements, furniture and vehicles kept or used for the purpose of violating or with which to violate, any law of this state or of the United States, and bring the same, and any and all persons (if any there be) in whose possession they are found before the judge who issued the warrant, or before some other judge having cognizance of the case. Such warrants may be substantially in the following form:

State of Illinois, County of ....., ss.:

SEARCH WARRANT.

To the People of the State of Illinois:

To ..... (insert name and official title of officer), in and for ..... (county, city or village, as the case may be), of ..... Greeting:

Whereas, a complaint was this day made, in writing, verified by the affidavit of .... (official title of officer), in and for said ..... (county, city or village, as the case may be), stating that said complainant has just and reasonable grounds to believe and does believe that intoxicating liquor is now unlawfully (manufactured, possessed, kept for sale, used, disposed of, transported, or any mash, still or other property designed for the illegal manufacture of liquor is possessed therein, as the case might be), to-wit: At and within a certain ..... (city, village or town), of ....., in the county and state aforesaid, and from the facts upon which such belief is based as set forth in said complaint the undersigned is satisfied that there is reasonable cause for such belief.

We therefore command you, in the name of the people of the state of Illinois, taking with you the necessary and proper assistance in the ..... (day or night time, as the case may be), to forthwith enter the said ..... (house, building, premises, boat, vehicle, receptacle or other place, as the case may be), hereinabove described, and make diligent and careful search for intoxicating liquor and any mash, still or other property hereinabove described and seize and bring any and all intoxicating liquor there found and all vessels containing the same, and all property, implements, furniture and vehicles kept or used for the purpose of violating or with which to violate any law of this state, there found, and any and all persons (if any there be) in whose possession they are found, forthwith before me at my office in ..... (state location), or before some other judge or justice of the peace having cognizance of the case, to be dealt with according to law.

Given under my hand and seal, at my said office, this ..... day of ..... 192..

.....(Seal)

Sec. 31. When any officer of the law shall discover any person in the act of transporting in violation of the law intoxicating liquors in any wagon, buggy, automobile, water or air craft, or other vehicle, it shall be his duty to seize any and all intoxicating liquors found therein being transported contrary to law, with or without a warrant. Whenever intoxicating liquors transported or possessed illegally shall be seized by an officer he shall take possession of the vehicle and team or automobile, boat, air or water craft, or any other conveyance, and shall arrest any person in charge thereof. Such officer shall at once proceed against the person arrested under the provisions of this act in any court having competent jurisdiction, but the said vehicle or conveyance shall be returned to the owner upon execution by him of a good and valid bond, with sufficient sureties, in a sum double the value of the property, which said bond shall be approved by the court having jurisdiction of the case and shall be conditioned to return said property to the custody of said officer on the day of the trial to abide the judgment of the court. The court upon conviction of the person so arrested shall order the liquor destroyed. Summons shall issue against the owner of such vehicle or conveyance and all persons holding liens against said property, if they can be found within the jurisdiction of the court; if not so found, service must be had by publication as provided in section 46 of this act.

Unless good cause to the contrary is shown the court shall order a sale by public auction of the property seized, and the officer making the sale, after deducting the expense of keeping the property, the fee for the seizure and the cost of the sale, shall pay all liens, according to their priorities, which are established by intervention or otherwise at said hearing or in other proceedings brought for said purpose, as being bona fide and as having been created without the lienor having any notice that the carrying vehicle was being used or was to be used for illegal transportation of liquor, and shall pay the balance of the proceeds into the treasury of the county in which the violation

occurred. All liens against property sold under the provisions of this section shall be transferred from the property to the proceeds of the sale of property. If, however, no one shall be found claiming the team, vehicle, water or air craft, or automobile, the taking of the same, with a description thereof, shall be advertised in some newspaper published in the city or county where taken or, if there be no newspaper published in such city or county, in a newspaper having circulation in the county, once a week for two weeks, and by handbills posted in three public places near the place of seizure, giving notice to the owner or lien holder of said property to appear in court and show cause, if any they have, why said property shall not be sold. And if no claimant shall appear within ten days after the last publication of the advertisement, the property shall be sold and the proceeds after deducting the expenses and costs shall be paid into the treasury of the county in which the violation occurred.

Sec. 32. In all cases in which intoxicating liquors may be subject to be destroyed under the provisions of this act the court shall have jurisdiction upon the application of the state's attorney to order them delivered to any department or agency of the state for medicinal, mechanical or scientific uses, or to order the same sold at private sale for such purposes to any person having a permit to purchase liquor, the proceeds to be covered into the treasury of the county in which the violation occurred, and all liquor heretofore seized in any suit or proceeding brought for violation of law may likewise be so disposed of, if not claimed within sixty days from the date this section takes effect.

Sec. 33. (a) Any person who manufactures, transports or sells liquor in violation of this act shall for a first offense be fined not less than $100 nor more than $1,000, or be imprisoned not less than sixty days nor more than six months or both and for a second or subsequent offense shall be fined not less than $500 nor more than $1,500 and be imprisoned in the state penitentiary not less than one year nor more than two years.

(b) Any person violating the provisions of any permit or who makes any false record or report required by this act or violates any of the provisions of this act, for which offense a special penalty is not prescribed, shall be fined for a first offense not less than $100 nor more than $1,000, or be imprisoned not less than sixty days, nor more than six months; for any subsequent offense he shall be punished by a fine of not less than $500 nor more than $1,500 and be imprisoned in the state penitentiary not less than one year nor more than two years. It shall be the duty of the prosecuting officer to ascertain whether the defendant has been previously convicted and to plead the prior conviction in the affidavit, information or indictment. The penalties provided in this act against the manufacture of liquor without a permit shall not apply to a person for manufacturing nonintoxicating cider and fruit juices exclusively for use in his home, but such cider and fruit juices shall not be sold or delivered except to persons having permits to manufacture vinegar.

Sec. 34. No person shall be excused on the ground that it may tend to incriminate him or subject him to a penalty for forfeiture, from attending and testifying, or producing books, papers, documents and other evidence in obedience to a subpœna of any court in any suit or proceeding based upon or growing out of an alleged violation of this act, but no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter or thing as to which, in obedience to a subpœna and under oath, he may so testify, or procure evidence, but no person shall be exempt from prosecution and punishment for perjury in so testifying.

Sec. 35. In case of a sale of liquor where the delivery was made by a common or other carrier the sale and delivery shall be deemed to be made in the county wherein the delivery was made by such carrier to the consignee, his agent or employe, or in the county wherein the sale was made, or from which the shipment was made; the prosecution for such sale or delivery may be had in any such county.

Sec. 36. Investigators authorized by the attorney-general, but in case the office of commissioner of prohibition shall be created, then by such commissioner, shall throughout the entire state of Illinois in enforcing this act or other liquor laws have all the powers and authority vested by law in constables.

Sec. 37. All suits or actions pending under any law in force at the date this act takes effect, whether on behalf of the people of this state or any person or persons, may be prosecuted to final judgment and such judgment shall be enforced in like manner and with the same effect as though this act were not passed, and all rights of action secured to said people or any person or persons under any existing law, are hereby preserved.

Sec. 38. All cities and villages shall have full power to adopt ordinances embracing such provisions of this act as are applicable, and further to prohibit the manufacture, giving away, dispensing, selling, bartering, transporting, delivering, furnishing, possessing, keeping, purchasing, storing, advertising or exposing for sale of intoxicating liquor for any purpose whatsoever.

No permit nor other authority to manufacture, store, sell, prescribe or otherwise deal in the beverages or liquors for which a permit or other authority is required by this act shall be issued to any person or place within the jurisdiction of any city or village which has duly enacted an ordinance prohibiting such act or acts; and any such permit shall become void upon the taking effect of such an ordinance.

Sec. 39. In any affidavit, information or indictment for the violation of this act separate offenses may be united in separate counts and the defendant may be tried on all at one trial and the penalty for all offenses may be imposed. It shall not be necessary in any affidavit, information or indictment to give the name of the purchaser or to include any defensive negative averments, but it shall be sufficient to state that the act complained of was then and there prohibited and unlawful, but this provision shall not be construed to preclude the trial court from directing and furnishing the defendant a bill of particulars when it deems it proper to do so.

Sec. 40. After the going into effect of this act, the possession of liquors by any person not legally permitted under this act to possess liquor shall be prima facie evidence that such liquor is kept for the purpose of being sold, bartered, exchanged, given away, furnished or otherwise disposed of in violation of the provisions of this act. It shall not be unlawful to possess liquors in one's private dwelling while the same is occupied and used by him as his dwelling only, provided such liquors were lawfully acquired and are for use only for the personal consumption of the owner thereof and his family residing in such dwelling and of his bona fide guests when entertained by him therein; and the burden of proof shall be upon the possessor in any action concerning the same to prove that such liquor was lawfully acquired, possessed or used.

Sec. 41. All records and reports kept or filed under the provisions of this act shall be sub-

ject to inspection at any reasonable hour by any public prosecutor or by any person designated by him or by any peace officer in the state, and copies of such records and reports duly certified by the person with whom kept or filed may be introduced in evidence with like effect as the original thereof, and verified copies of such records shall be furnished to the attorney-general or commissioner of prohibition, if such office shall be created, or state's attorney when called for.

Sec. 42. It shall be the duty of all municipal, county and state officials to co-operate in the enforcement of this act.

If any sheriff, deputy sheriff, chief of police, marshal, policeman, constable or other peace officer shall have knowledge, information or suspicion of any violation of any provisions of this act, he shall diligently investigate and secure evidence of the same and shall, before the proper officer, make and sign complaint against the offending person, anything in the ordinance or by-laws of any municipality to the contrary notwithstanding.

Sec. 43. If any provision of this act shall be held invalid, it shall not be construed to invalidate other provisions of the act.

Sec. 44. Nothing herein shall prevent the storage in United States bonded warehouses of liquor manufactured prior to Jan. 17, 1920, or prevent the transportation of such liquor to such warehouses or to any wholesale druggist for sale to such druggist for purposes not prohibited when the tax is paid, and permits may be issued therefor.

Sec. 45. A manufacturer of any beverage containing less than one-half of 1 per centum of alcohol by volume may, on making application and giving such bond as the attorney-general shall prescribe, but in case the office of commissioner of prohibition shall be created, then as shall be prescribed by such commissioner, be given a permit to develop in the manufacture thereof by the usual methods of fermentation and fortification or otherwise a liquid such as beer, ale, porter or wine, containing more than one-half of 1 per centum of alcohol by volume, but before any such liquid is withdrawn from the factory or otherwise disposed of the alcoholic contents thereof shall under such rules and regulations as the said officer may prescribe be reduced below such one-half of 1 per centum of alcohol: Provided, That such liquid may be removed and transported, under bond and under such regulations as the officer granting the permit as aforesaid may prescribe, from one bonded plant or warehouse to another for the purpose of having the alcohol extracted therefrom. And such liquids may be developed under permit by persons other than the manufacturers of beverages containing less than one-half of 1 per centum of alcohol by volume, and sold to such manufacturers for conversion into such beverages.

In any case where the manufacturer is charged with manufacturing or selling for beverage purposes any malt, vinous or fermented liquids containing one-half of one per centum or more of alcohol by volume, or in any case where the manufacturer, having been permitted as aforesaid to develop a liquid such as ale, beer, porter or wine containing more than one-half of 1 per centum of alcohol by volume in the manner and for the purpose herein provided, is charged with failure to reduce the alcoholic content of any such liquid below such one-half of 1 per centum before withdrawing the same from the factory, then in either such case the burden of proof shall be on such manufacturer to show that such liquid so manufactured, sold or withdrawn contains less than one-half of 1 per centum of alcohol by volume. In any suit or proceeding involving the alcoholic content of any beverage, the reasonable expense of analysis of such beverage shall be taxed as costs in the case.

Sec. 46. In all cases wherein the property of any citizen is proceeded against or wherein a judgment affecting it might be rendered, and the citizen is not the one who in person violated the provisions of the law, summons must be issued in due form and served personally, if said person is to be found within the jurisdiction of the court.

Whenever any complainant or his attorney shall file in the office of the clerk of the court in which his suit is pending an affidavit showing that any defendant resides or has gone out of this state, or on due inquiry cannot be found or is concealed within this state, so that process cannot be served upon him, and stating the place of residence of each defendant if known, or that upon diligent inquiry his place of residence cannot be ascertained, the clerk shall cause publication to be made in some newspaper printed in his county, and if there be no newspaper printed in his county, then in the nearest newspaper published in this state, containing notice of the pendency of such suit, the names of the parties thereto, the title of the court, and the time and place of the return of summons in the case; and he shall also, within ten days of the first publication of such notice, send a copy thereof by mail addressed to such defendant whose place of residence is stated in such affidavit. The certificate of the clerk that he has sent such notice in pursuance of this section shall be evidence.

The notice required in the preceding paragraph may be given any time after the commencement of the suit, and shall be published at least once each week for four successive weeks, and no default or proceeding shall be taken against any defendant not served with summons or copy of the bill and not appearing, unless thirty days shall intervene between the first publication as aforesaid, and the first day of the term at which such default or proceeding is proposed to be taken.

Sec. 47. Any person holding a permit from the government of the United States to operate an industrial alcohol plant or warehouse shall, within at least fifteen days after this act becomes effective or within three days after receiving any such permit, file duplicate copies thereof with the attorney-general, but in case the office of commissioner of prohibition shall be created, then with such commissioner, who, within thirty days after receipt of such copies shall cause an inspection to be made of the premises described in such permit, and, if he finds that said premises conform to the laws of this state, he shall countersign such copies and return one copy to the holder named in the permit, which shall be his authority for doing the acts specified in said permit within the state of Illinois, and the officer aforesaid shall retain the other copy on file in his office.

Sec. 48. Whoever operates an industrial alcohol plant or warehouse or a denaturing plant without complying with the provisions of this act, or in violation of the terms of the permit countersigned as provided in section 47, or without complying with all lawful regulations made herein in reference thereto, shall be liable for the first offense to a penalty of not exceeding one thousand ($1,000) dollars or imprisonment of not exceeding thirty days, or both, and for a second or a subsequent offense to a penalty of not less than one hundred ($100) dollars or more than ten thousand ($10,000) dollars and to imprisonment of not less than thirty days nor more than one year, and the officer authorized to grant permits as aforesaid, after a second or subsequent offense, may refuse for a period of one year thereafter

to countersign a permit for the manufacture or use of alcohol upon the premises of any person responsible in any degree for the violation. Any industrial alcohol plant or warehouse operated in this state without the owner or operator thereof holding a permit from the federal government, duly countersigned as herein provided, is hereby declared to be a common nuisance, which nuisance shall be abated by proceedings as provided for in section 22 of this act.

Sec. 49. No permit or other authority to manufacture, store, sell, prescribe or otherwise deal in the articles, liquors or beverages for which a permit or other authority is required by this act shall be issued to, nor countersigned for, any person not a citizen of the United States, or a corporation incorporated under the laws of the United States or the several states.

Provided, That spirituous liquor may be used in any bona fide hospital or sanitarium, for strictly medicinal or scientific purposes, or by any duly licensed physician or dentist for such purposes, or in any laboratory for strictly scientific purposes, on application being made to the attorney-general, but in case the office of commissioner of prohibition shall be created, then to said commissioner. Permits shall be granted by said official to such applicants to purchase, transport and use the amount of such liquors which shall be reasonably necessary for such purposes. Provided, further, That permits to own stills shall only be granted to persons who are authorized under the laws of the United States to own stills or are authorized to manufacture liquor requiring the use of a still under this act, or are legitimate dealers in or users of stills.

All provisions of sections 47 and 48 hereof shall apply to all denatured alcohol plants whether operated on the premises of an industrial alcohol plant or elsewhere, and permits to operate same shall be filed and countersigned, after inspection, as provided in section 47.

The attorney-general, but in case the office of commissioner of prohibition shall be created, then such commissioner, shall have power to make reasonable rules and regulations for the administration of the provisions of this act. (Approved June 27, 1921.)

PRIMARY LAW AMENDMENTS.

Section 6 of "An act to provide for the holding of primary elections by political parties," approved March 9, 1910, in force July 1, 1910, as amended, is amended to read as follows:

Sec. 6. A primary shall be held on the second Tuesday in April in every year in which a president of the United States is to be elected, for the purpose of electing delegates and alternate delegates to national nominating conventions, and for the purpose of securing an expression of the sentiment and will of the party voters with respect to candidates for nomination for the office of president of the United States. A primary shall be held on the second Tuesday in April in every year in which officers are to be voted for on the first Tuesday after the first Monday in November of such year, for the nomination of candidates for such offices as are to be voted for at such November election.

A primary shall be held on the last Tuesday in February in each year for the nomination of such officers as are to be voted for on the first Tuesday in April of such year.

A primary shall be held on the second Tuesday in March in each year for the nomination of such officers as are to be voted for on the third Tuesday in April of such year.

A primary for the nomination of all other officers, nominations for which are required to be made under the provisions of this act, shall be held three weeks preceding the date of the general election for such offices, respectively. The polls shall be open from 6 o'clock a. m. to 5 o'clock p. m. (Approved June 29, 1921).

Sections 4 and 5 of "An act to provide for the holding of primary elections by political parties for the nomination of members of the general assembly and the election of senatorial committeemen," approved March 9, 1910, in force July 1, 1910, as amended, are amended to read as follows:

Sec. 4. A primary shall be held on the second Tuesday in April in the year A. D. 1922 and every two years thereafter for the nomination of candidates for senatorial offices and for the election of senatorial committeemen.

Sec. 5. There shall be constituted a senatorial committee for each senatorial district: Provided, however, That nothing herein contained shall prevent a political party from electing or appointing in accordance with its practice any other committees.

The senatorial committee of each political party shall be elected as follows:

(a) In senatorial districts composed of three or more counties the senatorial committee shall be composed of one member elected from each county of such senatorial district.

At the April primary held in the year A. D. 1922, and at the April primary held every two years thereafter, each primary elector may vote for one candidate of his party residing in his county for member of the senatorial committee of his party.

(b) In senatorial districts composed of two counties the senatorial committee shall be composed of three members, two of whom shall be elected from the county in which such political party at the general election for state and county officers then next preceding a primary polled the larger number of votes in such senatorial district, and one of whom shall be elected from the other county of such senatorial district.

At the April primary held in the year A. D. 1922, and the April primary held every two years thereafter, each primary elector residing in a county in which such political party at the general election for state and county officers then next preceding a primary polled the larger number of votes in such senatorial district may vote for two candidates of his party, residing in his county, for members of the senatorial committee of his party (and at such primary in the other county of such senatorial district each primary elector may vote for one candidate of his party), residing in his county, for member of the senatorial committee of his party.

(c) In senatorial districts composed of one county, and in senatorial districts wholly within the territorial limits of one county or partly within the territorial limits of one county and partly within the territorial limits of another county, the senatorial committee shall be composed of three members elected from such senatorial district.

At the April primary held in the year A. D 1922, and at the April primary held every two years thereafter, each primary elector may vote for three candidates of his party, residing in such senatorial dictrict, for members of the senatorial committee of his party.

Within thirty days after its election the senatorial committee shall meet and proceed to organize by electing from among its own number a chairman and, either from its own number or otherwise, such other officers as said committee may deem necessary or expedient. The outgoing chairman of the senatorial committee of the party shall notify the members elected of the time and place (which shall be in the limits of such senatorial district) of such meeting. (Approved June 21, 1921.)

MOTOR VEHICLE LEGISLATION.

Laws were passed by the legislature in 1921:

Changing the size of the figures on automobile plates from four inches to three inches.

Creating in the office of the secretary of state a bureau for the registration of the theft and recovery of motor vehicles.

Amending section 36 of the motor vehicle law to permit the use of moneys in the road fund in state treasury for the construction of hard roads along the routes designated in the state bond issue road act.

Amending sections 17, 35 and 43 of "An act in relation to motor vehicles and to repeal a certain act therein named," in force Jan. 1, 1920. It increases fee for dealers' license from $12 to $20 a year, and in order to secure such license they must have an established place of business. Persons may get permission from the secretary of state to stamp a new number on the engine of their car if the old number was removed without their knowledge or consent. It empowers the secretary of state to appoint, without reference to any civil service law, such investigators as he may deem necessary, who shall have all the powers of constable, including that of arrest without warrant.

Adding five sections to the motor vehicle law. Requires common carriers of passengers by motor vehicle in cities, towns and villages of 100,000 population or over to file with the secretary of state either a bond in the sum of $10,000 for each vehicle operated, conditioned upon the payment of all loss or damage resulting to any person or property by reason of the negligent operation of any such vehicle or the violation of any law, or a policy of insurance in the sum of $10,000 for each vehicle, insuring the operator of such vehicles against such loss or damage. Such bond or policy is subject to the approval of the secretary of state.

JUUL LAW AMENDED.

The act amends the Juul law by exempting municipal and county library taxes from scaling; provides that the tax rate in cities and villages of over 150,000 population shall not be reduced below a rate of $1.85 (formerly $1.43 1-3) on each $100 assessed value, and the tax rate for library purposes in such cities shall not be reduced below 8 cents (formerly 5 cents); provides that in cities and villages of less than 150,000 population the library tax rate shall not be reduced below 18 cents; exempts taxes for special purposes; provides that levies for park purposes shall not be reduced below 55 cents in districts under the 1869 Chicago parks act, 23 cents in districts under the 1895 park districts act, 30 cents in districts consisting of three towns, and 10 cents in districts under the 1915 township act. The tax rate for sanitary districts shall not be reduced below 18 cents. No levies for school purposes shall be diminished. All minimum rates prescribed in this section are to remain in effect for three years beginning with 1921.

WORKMEN'S COMPENSATION ACT.

The workmen's compensation act is amended by making it apply to all persons in any department of a dangerous enterprise. It raises maximum compensation for injury resulting in death from $3,500 to $3,750, and for temporary or permanent total incapacity to not less than $7.50 nor more than $14 (now $7 to $12) per week. Awards for disability shall cease or diminish in proportion to the recovery of the employe from such incapacity. It also increases the maximum benefits when the injured employe has children; raises the salaries of members of the industrial commission to $6,000 (now $5,000) and the chairman to $7,500. The secretary of the commission is to receive $5,000. The salaries of the arbitrators are raised to $4,200 (now $3,000). Gives the Circuit court power to review questions of fact as well as of law.

TAX COMMISSION.

The law amends sections 5, 9 and 51 of the civil administrative code. It increases membership of tax commission from three to five; adds in the department of trade and commerce seven commerce commissioners in lieu of five public utility commissioners, and a secretary of the commerce commission in lieu of the secretary of the public utilities commission; omits the office of chief highway engineer in the department of public works and buildings; increases the salaries of certain departmental officers; authorizes the director of public works and buildings, with the consent in writing of the governor, to acquire by purchase or eminent domain proceedings all lands, buildings and grounds for which an appropriation is made by the general assembly.

ILLINOIS COMMERCE COMMISSION.

The act repeals the public utilities act and abolishes the former commission. It creates the Illinois commerce commission, consisting of seven members appointed by the governor for four year terms at $7,000 per annum. The governor shall also appoint a secretary and not to exceed eight assistant commissioners. Under the act all cities have the power to regulate their own public utilities if they so vote on referendum called upon petition of 25 per cent of the voters. All cases are subject to appeal to the commission. No contract between a city and a public utility company concerning rates or service can be set aside or abrogated except by a majority vote of the people in such city.

FREE SCHOOL TAXES.

The act amends section 189 of the free school act; changes tax rates to 2 per cent for educational purposes (now 1 per cent), and three-fourths of 1 per cent for building and land purchase purposes (now 1 per cent). Upon favorable referendum vote the tax rate may be increased to 3 per cent for educational purposes and to 1 per cent for building purposes. Cities of over 200,000 are limited to 1.92 per cent, which may be increased to 2.92 per cent upon favorable referendum. This does not include eight-hundredths per cent which may be levied for textbooks.

EXTORTION IN LABOR DISPUTES.

The act prohibits any person by virtue of representing or under color of representing or pretending to represent any organization or group of workmen from demanding or accepting or attempting to obtain money or other property from any employer, property owner or property lessee, or any of their agents, as a consideration for terminating any controversy relating to employment or to materials or supplies, or from inducing or compelling or attempting to induce or compel any such person to pay money or other property as such consideration, or from demanding or collecting any money or other property from such person as a fine.

MOTHERS' PENSION ALLOWANCES.

The act amends sections 2, 10, 11 and 16 and the title of the mothers' pension act and repeals section 18a. In section 10 the maximum allowance in counties of over 300,000 population to a mother with one child is raised from $15 to $25, and permits the maximum of $15 a month for each additional child instead of $10 per month. Section 11 is changed so as to permit relief to mothers who are the owners of real estate or personal property. In section 16 the tax lexy in coun-

ties of over 300,000 may be up to four-tenths of a mill instead of four-fifteenths of a mill.

CITY PLAN COMMISSION.

The act provides that any city, village or incorporated town shall have the power to create a plan commission, consisting of the mayor, or president of the board of trustees, the president of the board of local improvements and such other members as shall be provided by ordinance. Such plan commission shall prepare and present to the council a comprehensive plan of public improvements, and generally promote the realization of such official plan, and shall also exercise such additional powers as may be conferred upon it by the city council.

EDUCATIONAL COMMISSION.

The act provides for an educational commission composed of six persons, consisting of the governor and five persons appointed by him, to make a thorough investigation of the entire educational system of the state and to report its conclusions and recommendations to the next general assembly. The president of the commission is to receive $5,000 and the other members $1,000 each, except the governor and the one senator and one representative, who are to be appointed, who shall serve without compensation. An appropriation of $25,000 is made to defray the expenses of the commission.

BUILDING INVESTIGATION COMMISSION.

The act creates the Illinois building investigation commission, consisting of the fourteen members of the joint legislative committee appointed March 23, 1921, to investigate the cost of construction of buildings. It defines the powers and duties of the commission and provides for a report to be made to the governor not later than Dec. 15, 1922; appropriates $20,000 to carry out the act.

MISCELLANEOUS ACTS.

Among numerous other laws enacted by the legislature in 1921 were the following:

Providing that Chicago aldermen who were elected in 1920 shall hold over until 1923.

Enlarging the sanitary district of Chicago to include certain additional lands in Cook county; provides that the act must be approved by a referendum vote in the territory to be included.

Authorizing the department of public works to take title by donation to the courthouse and courthouse site in the village of Metamora.

Appropriating $1,000 for the purchase in the city of Dixon of the site on which was located the block house in which Abraham Lincoln was quartered as a soldier during the Black Hawk war.

Appropriating $25,000 to the department of public works and buildings for the erection of a statue in memorial hall to the mothers of soldiers from Illinois who sacrificed their lives in the world war.

Enabling cities and villages of 5,000 population or less to adopt the "managerial form of municipal government."

Prohibiting the use of stench bombs and other injurious or offensive smelling substances for the purpose of injuring, molesting or coercing any person, and providing a penalty of imprisonment of not less than sixty days nor more than one year for violation.

Amending the 1907 act to regulate the granting of relief to indigent war veterans and their families; extends the operation of the act to veterans of the world war and their families.

Accepting the provisions of the federal act which provides for rehabilitation of persons injured in industry or otherwise; designates the board of vocational education as the state agency to co-operate with the federal board in carrying out the provisions of the act; appropriates $125,000 for industrial rehabilitation.

Amending the title of the 1872 library act to include villages and amending sections 1 and 10 by raising the maximum library tax from one and one-third mills to one and eight-tenths mills; also provides that county clerks in reducing tax levies shall not include the library tax in the limitation of 2 per cent of the assessed valuation upon which taxes are required to be extended.

Appropriating $5,000,000 from the road fund to the department of public works and buildings to acquire land containing road building materials and to acquire or construct and to maintain and operate plants and factories for the production of such materials and to dispose of such products to the political subdivisions of the state.

FREIGHT TUNNELS UNDER CHICAGO.

Underlying nearly all the streets in the central business section of Chicago are sixty miles of tunnels connecting the freight terminals of the railroads with commercial houses. The tunnels are provided with narrow gauge (2 ft.) electric railroads equipped with electric locomotives and steel cars. These are used chiefly in transporting goods to and from railroad freight yards and in carrying coal to business houses. Excavated and waste material from new buildings is removed through the tunnels and disposed of, permitting the work of construction to go on without interruption. In 1914 the Chicago Utilities company, which now owns the tunnel system, had in operation 117 electric motors and 3,000 coal, freight and other cars. In addition it had charge of some 24,000 telephones.

The original franchise for the tunnel system was granted Feb. 20, 1899, to the Illinois Telephone and Telegraph company, which was organized in 1898 by A. G. Wheeler and associates for the purpose of establishing an independent telephone system. By an amendatory ordinance granted July 15, 1903, the company was given the right to construct and operate a subway system for the transportation of mail matter, newspapers, packages and freight generally. The tunnels are 19 feet below city datum or 33 feet below the surface of the streets, the trunk line tunnels being limited in size to 12 feet 9 inches in width by 14 feet in height, and the smaller ones to 6 feet in width and 7 feet 6 inches in height. Part of the tunnel system was put into operation Aug. 15, 1906, but the whole of it was not in use until Sept. 1, 1907.

The Illinois Telephone and Telegraph company was succeeded in October, 1903, by the Illinois Tunnel company, which was followed in November, 1904, by the Chicago Subway company. The property of the Subway company and underlying concerns was acquired in April, 1912, by the Chicago Utilities company, the authorized capital stock of which is $53,000,000.

TUNNELS UNDER CHICAGO RIVER.

Washington Street—Built 1867-1869; length, 1,605 feet; cost $517,000; rebuilt 1909-1911.

CHANGES IN POPULATION OF ILLINOIS COUNTIES (1910-1920).

[From federal census report, 1921.]

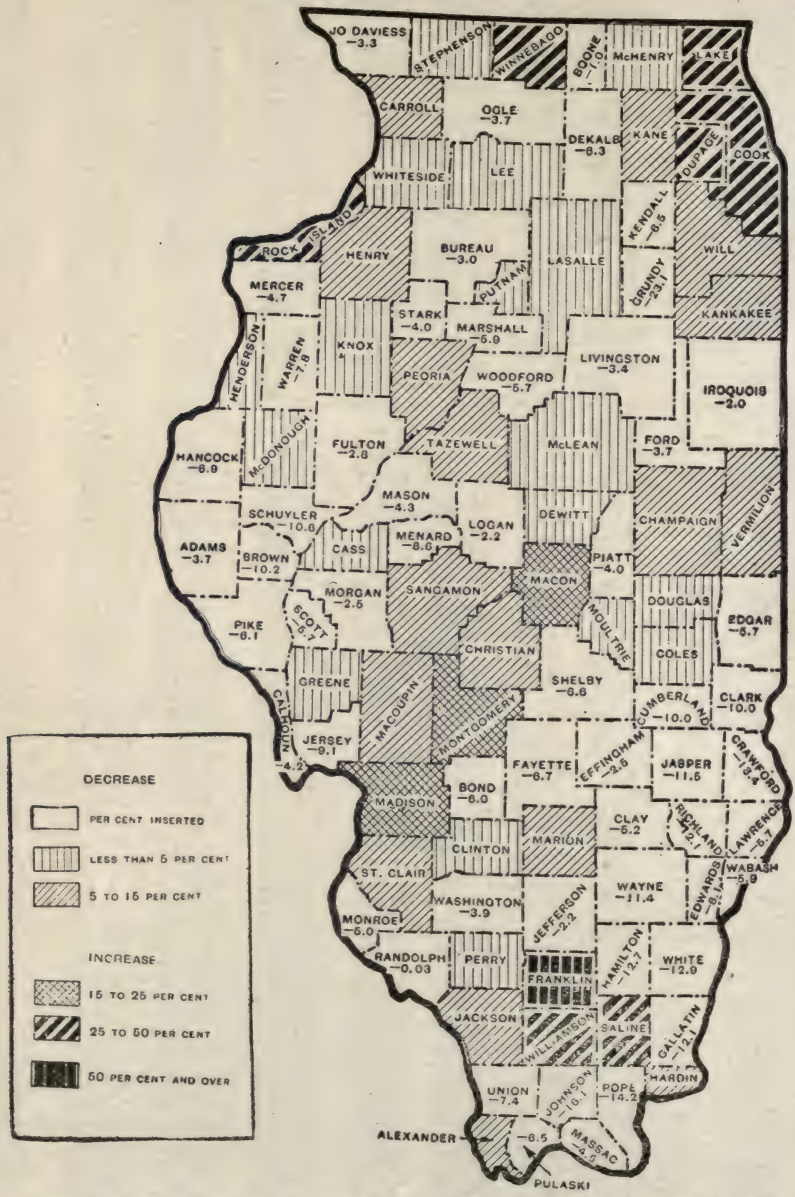

DIAGRAM SHOWING PER CENT OF INCREASE OR DECREASE IN DECADE.

URBAN AND RURAL POPULATION OF ILLINOIS.

By Cities and Villages.

In 1920 there were in Illinois 4,405,678 persons living in cities, towns and villages of from 2,500 to 1,000,000 or more inhabitants, and were therefore classified by the federal census bureau as in urban territory. Those living in cities, towns and villages of less than 2,500 inhabitants or in the country were classified as residing in rural territory. The proportion of the population of Illinois living in places of 2,500 or more increased from 54.3 per cent in 1900 to 61.7 per cent in 1910 and to 67.9 per cent in 1920. The number of cities, towns and villages classified according to population 1920 was as follows:

Inhabitants.	No.	Inhabitants.	No.
Less than 2,500..	939	25,000 to 50,000	12
2,500 to 5,000..	81	50,000 to 100,000	4
5,000 to 10,000..	47	1,000,000 or more	1
10,000 to 25,000	27	Total	1,111

HOMESTEAD LAWS OF THE UNITED STATES.

For full information as to the method of acquiring homesteads on unappropriated public lands of the United States apply at the nearest federal land office or write to the general land office in the department of the interior, Washington, D. C. In general, it may be said that any person who is the head of a family or is 21 years old and a citizen of the United States, or has declared his intention to be such, and who is not the proprietor of more than 160 acres of land, is entitled to enter 160 acres of public land as a homestead. He is obliged to pay certain fees and commissions, ranging from $7 to $18, according to the amount of land entered and its location, to live upon the land for a certain length of time and to cultivate a certain amount of it. Recent laws provide for enlarged homesteads of 320 acres in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, South Dakota, Oregon, Utah, Washington and Wyoming, on nonmineral, nonirrigable and nontimbered land; also for stock raising homesteads of 640 acres on land fit only for grazing or forage growing purposes.

ILLINOIS PERSONAL INCOME TAX RETURNS.

For calendar year 1919.

Federal personal income tax returns filed in Illinois in 1919 reached a total of 422,229, which was 7.92 per cent of the entire number filed in the United States. The total net income reported by these returns was $1,662,796,441, while the tax paid on them was $99,398,236, which was 7.83 per cent of the total personal income tax paid in the entire country.

In the nation at large 5.03 per cent of the people filed personal income tax returns, while in Illinois 6.51 per cent filed them. The average net income per return for the United States was $3,724.05, and in Illinois it was $3,938.14. The personal income tax per capita for the United States amounted to $11.98, and in Illinois it was $15.33. The average amount of the personal income tax per return in the United States was $238.08, and in Illinois it was $235.41.

Illinois' position in the order of magnitude as to all the states and territories in the union in the per cent of population filing returns was 16th, and 7th in the average net income per return. Its position as to per capita income tax was 7th, and 11th in the average amount of tax per return.

The number of personal income tax returns filed for the years 1916, 1917, 1918 and 1919 in Illinois, as well as the amounts of net income and tax, are shown in the following table:

GOVERNMENT OF ILLINOIS.

Legislative power is vested in a general assembly, consisting of a senate and house of representatives, both elected by the people. The state is divided into fifty-one senatorial districts, each of which elects a senator and three representatives. The general assembly makes laws and appropriates money for the government of the state and in general stands in the same relation to the state as congress does to all the states as a whole. The powers and duties of the chief executive officers are as follows:

Governor—The governor is vested with the chief executive power of the state. He is the commander in chief of the military and naval forces and may call out the militia to maintain the peace. He is required to inform the general assembly, by message, of the condition of affairs of the state and to recommend needed legislation. He may, by proclamation, call a special session of the assembly or adjourn it in case of disagreement between the two houses. He has the power to appoint certain officers and during a recess of the senate may fill vacancies or remove certain officers and may call special elections to fill vacancies in certain offices. He may make requisitions upon the governors of other states for the return of fugitives from justice or offer rewards for the arrest of offenders against the laws of the state. He exercises a general supervision over the penitentiaries and may grant reprieves, commutations and pardons and may restore the rights of citizenship to ex-convicts. He may approve acts of the legislature and exercise the veto power.

Lieutenant-Governor—This officer is ex officio president of the senate and has the power to cast the deciding vote in case of a tie. In case of the death, conviction on impeachment, failure to qualify, resignation, absence from the state or other disability on the part of the governor, the lieutenant-governor succeeds to the office to the close of the term.

Secretary of State—The secretary of state is charged with the safekeeping of the original laws and resolutions of the general assembly, with all books, bills and documents deposited with him by either house, and with all bonds, records and papers filed in his office. He keeps a record of the official acts of the governor; furnishes certified copies of the same to the assembly on request and certified copies of any of the records of his office on the payment of the statutory fees. He countersigns and affixes the seal of the state to all proclamations and commissions issued by the governor; issues licenses for incorporations and certificates of organization to cities and villages and incorporated towns. He has charge of most of the buildings and grounds belonging to the state in Springfield, furnishes supplies for the general assembly and supervises the printing and distribution of all the public documents of the state. He calls the house of representatives to order at the beginning of each general assembly and presides over the same until the election of a speaker. He is the keeper of the great seal of the state and is the custodian and sealer of weights and measures.

Auditor—The auditor is required to keep all the accounts of the state; to audit the accounts of all officers or other persons authorized to receive moneys from the state treasury; to personally sign all warrants drawn on the treasury; to institute suits wherein the state is a plaintiff, and to make a biennial report of the business of his office to the governor. With the governor and treasurer he determines the state tax rate. He exercises a general supervision over state banks, building, loan and homestead associations.

State Treasurer—The state treasurer is custodian of the revenues and public moneys of the state. He must make monthly settlements with the auditor and a biennial report to the governor.

Superintendent of Public Instruction.—The superintendent exercises a general supervision over all the public schools of the state. He is the general and legal adviser of the county superintendents and must report biennially to the governor the general condition of all the schools of the state, the amount raised by taxation for school purposes and the manner of its expenditure and the general condition of all the school funds. He may grant state certificates to teachers or cause them to be withheld and must visit charitable institutions which are educational in character.

Attorney-General—It is the duty of the attorney-general to represent the state in the Supreme court in all cases in which the state is interested; to act as counsel for all state officials; to be the legal adviser of the governor and other state officers in matters relating to their official duties, and, on request, to furnish them, as well as either branch of the general assembly, with written opinions upon constitutional or legal questions.

The normal school board, of which the director of registration and education shall be chairman and ex officio member and of which the superintendent of public instruction shall be ex officio a member and shall be secretary, shall have power, independently of the officers of the department of registration and education, to make rules for the management of the state normal schools, to visit them, to regulate the courses of study and to employ officers, teaching staffs and assistants and to fix their salaries.

The department of registration and education shall, whenever the several laws regulating professions, trades and occupations which are devolved upon the department for administration so require, exercise in its name, but subject to the provisions of the act, the following powers:

1. Conduct examinations to ascertain the qualifications of applicants to exercise the profession, trade or occupation for which an examination is held, and pass upon the qualifications of applicants for reciprocal licenses, certificates and authorities.
2. Prescribe rules for a fair and wholly impartial method of examination of candidates to exercise the respective professions, trades and occupations.
3. Prescribe rules defining what shall constitute a school, college or university, or department of a university, or other institutions, and to determine their reputability and good standing by reference to a compliance with such rules.
4. Adopt rules establishing a uniform and reasonable standard of maintenance, instruction and training to be observed by all schools for nurses.
5. Establish a standard of preliminary education deemed requisite to admission to a school, college or university and to require satisfactory proof of the enforcement of such standard.
6. Conduct hearings on proceedings to revoke or refuse renewal of licenses, certificates or authorities of persons exercising the respective professions, trades or occupations, and to revoke or to refuse to renew such licenses, certificates or authorities.
7. Formulate rules when required in any act to be administered.

None of the above enumerated functions and duties shall be exercised by the department of registration and education, except upon the action and report in writing of persons designated by the director of the department to take such action and to make such report for the respective professions, trades and occupations, as follows:

For the veterinary practitioners, three competent veterinary surgeons, not more than two of whom shall be from the same college and neither of whom shall be connected with any veterinary college.

For the horseshoers, three practical horseshoers and two journeymen horseshoers with at least three years' experience in this state.

For the architects, five persons, one of whom shall be member of the faculty of the University of Illinois and the other four of whom shall be architects living in the state and with ten years' experience.

For the structural engineers, five persons, of whom one shall be a professor in the civil engineering department of the University of Illinois and the others of whom shall be structural engineers of recognized standing, with not less than ten years' experience.

For medical practitioners, embalmers and midwives, five reputable physicians licensed to practice medicine and surgery in the state and not connected with any medical college or institution.

For the pharmacists, five registered pharmacists with ten years' practical experience in the dispensing of physicians' prescriptions since registration.

For the dentists, five licensed practitioners of dentistry or dental surgery, with five years' experience and not connected with or interested in any dental school.

For the registered nurses, five registered nurses who have been graduated at least five years from a school for nurses and during the course of training have served two years in a general hospital and three of whom shall have had at least two years' experience in educational work among nurses.

For the optometrists, five practicing optometrists with at least five years' experience and not connected with any optical school or firm.

For the barbers, three practical barbers with five years' experience in the state.

Unless otherwise provided by law the duties formerly exercised by the state entomologist, state laboratory of natural history, state water survey and the state geological survey, vested by this act in the department of registration and education, shall continue to be exercised at the University of Illinois.

The board of natural resources and conservation, acting through five or more subcommittees, each of whom shall be composed of the director of registration and education, the president of the University of Illinois, or his representative, and the expert adviser specially qualified in each of the fields of investigation, shall—

1. Consider and decide all matters pertaining to natural history, geology, water and water resources, forestry and allied research, investigational and scientific work.
2. Select and appoint, without reference to the state civil service law, members of the scientific staff, prosecuting such research, investigational and scientific work.
3. Co-operate with the University of Illinois in the use of scientific staff and equipment.
4. Co-operate with the various departments in research, investigational and scientific work useful in the prosecution of the work in any department.

The board of state museum advisers shall advise the director of education and registration in all matters pertaining to maintenance, extension and usefulness of the state museum.

The immigrants commission shall—

1. Make a survey of the immigrant, alien born and foreign speaking people of the state, and of their distribution, conditions of employment and standards of housing and living.
2. Examine into their economic, financial and legal customs, their provisions for insurance and other prudential arrangements,

their social organization and their educational needs; keeping in friendly and sympathetic touch with alien groups and co-operating with state and local officials, and with immigrant or related authorities of other states and of the United States.

ILLITERACY IN ILLINOIS (1920.)

[From federal census bureau reports.]

IN THE STATE.

According to the census of 1920 there were 173,987 illiterate persons 10 years of age and over in the state of Illinois, "illiterate" meaning unable to write. Of this number 24,437 were native whites of native parentage, 6,470 of foreign or mixed parentage and 131,996 of foreign birth. The number of illiterate negroes was 10,476. In the total population 10 years of age and over the percentage of illiteracy was 3.4, which showed a diminution since 1910, when it was 3.7. In the case of the negroes, the percentage declined from 10.5 to 6.7, and in the case of the native whites of native parentage from 1.7 to 1.1.

There was less illiteracy in the rural districts of the state than in the cities, the percentages being 2.2 for the rural population and 3.9 for the urban. For the native white population of native parentage, however, the urban percentage of illiteracy, 0.6, was less than the rural, 1.5. In the case of the negro population the percentage was 5.9 in the urban population as against 13.1 in the rural. By counties the percentage of illiteracy ranged from 7.8 in Hardin county to 0.4 in Kendall county.

IN CHICAGO.

In the population of Chicago, as enumerated in January, 1920, there were 99,133 persons 10 years of age and over who were illiterate in the sense of being unable to write. Of this total 92,473 were foreign-born whites. The percentage of illiteracy in the total population 10 years of age and over was 4.6, which showed little change since 1910, when it was 4.5. For the native whites the percentage was 0.2; for the foreign-born, 11.6, and for the negroes 3.9.

That the younger generation in Chicago was less illiterate than the older was indicated by the fact that while 5.2 per cent of the males and 6.3 per cent of the females 21 years of age and over were illiterate the percentage of illiteracy in the population 16 to 20 years of age was but 0.6.

FOREST PRESERVE DISTRICT OF COOK COUNTY.

COMMISSIONERS.

The commissioners of Cook county by virtue of their office also serve as commissioners of the forest preserve district of Cook county, authorized by an act of the legislature approved June 27, 1913, and adopted by a referendum vote Nov. 3, 1914. The commissioners Nov. 1, 1921, were: Daniel Ryan, president; Bartley Burg, William Busse, Joseph Carolan, Joseph M. Fitzgerald, Charles N. Goodnow, William H. Maclean, Robert W. McKinlay, George A. Miller, Tom Murray, Albert Nowak, Dudley D. Pierson, Emmett Whealan, Frank J. Wilson.

OFFICERS.

President—Daniel Ryan.
Secretary—William J. Gormley.
Comptroller—Joseph Gill.
Treasurer—Oscar F. Mayer.
Chief Attorney—Adolph D. Weiner.
Real Estate Agent—Henry P. Kransz.
Chief Forester—Ransom E. Kennicott.
Chief Engineer—Emmett J. Flavin.
Civic Members of Plan Committee—Victor F. Lawson, Charles H. Wacker, William A. Peterson, Robert R. McCormick, Dwight H. Perkins, John C. Vaughn.

FOREST PRESERVE PROPERTY.

The forest preserve district of Cook county on Jan. 1, 1921, held title to 18,028.77 acres. Much additional acreage was acquired in 1921. Up to that time $6,974,042.60 had been paid for land in the district. Some details as to the various preserves follow:

Deer Grove Preserve—1,150 acres of hilly wooded land; 850 acres set aside and fenced for deer; twenty-five acres of artificial lake, which has developed into a home for water fowl.

Elk Grove Preserve—1,600 acres of virgin timber land; has lily ponds and bird refuges.

Des Plaines River Valley Preserve—667 acres (Wheeling tract); old grove portage of Indian days and scene of reception given Father Marquette, French explorer, who surprised the Potawatami Indians here—the white man's first visit to Cook county, 1673; Northwestern park tract, extending from the town of Des Plaines to Higgins road, containing tracts of

natural forests and sites of half a dozen Indian villages.

North Branch Chicago River Valley Preserve—Includes Indian reservation, Forest Glen, Turnbull, Badek and Glen View tracts; Indian reservation contains all the forest land awarded to Billy Caldwell, the old Indian chief; Turnbull tract contains old Turnbull homestead, established by one of Cook county's pioneers in Indian days; Badek tract, another favorite Indian haunt.

Thatcher Park Preserve—Contains also Steele tract; preserve consists of hundreds of acres of oak and maple forest.

Salt Creek Valley Preserve—On both banks of Salt creek from the Des Plaines river to the west county line; picturesque river valley with splendid timber land.

Beverly Hills Preserve—Promontory of rock on the south side long used as picnic grounds.

Palos Hills Preserve—Contains more than 7,000 acres of hilly forest land extending along the drainage canal and back into the Sag district.

Chicago Heights Preserve—Forest tract with small bodies of water and streams; located at junction of Lincoln and Dixie highways.

Thornton and Glenwood Preserves—Adjoining tracts; fine forest land; said to have been site of a battle between Americans and British in the revolutionary war.

There are also preserves in Hegewisch, South Chicago, Chicago Heights, Edgebrook, and some of the tracts have been improved with paths, roads, wells, fountains, shelter houses, parking spaces and comfort stations, also dams and artificial lakes.

There is an eighteen-hole golf course at Palos Hills and a nine-hole course at Edgebrook.

During the season in 1920 approximately 1,484 permits were issued for picnic and camping purposes. The records show the following attendance:

April	125,250	September	520,124
May	376,124	October	302,518
June	442,761	November	122,126
July	512,121		
August	714,576	Total	3,115,600

CHICAGO ZOOLOGICAL GARDENS.

In December, 1919, Mrs. Edith Rockefeller McCormick presented to Cook county a tract of 300 acres of land, valued at about $300,000 and lying on the west bank of the Des Plaines river near Riverside, as a site for a large zoological garden. The plan committee of the Cook county forest preserve met on Dec. 31 and voted unanimously to accept the gift, and it was agreed that the zoo, in honor of the donor, should be named the "McCormick Zoological Gardens." However, Mrs. McCormick in her deed of gift stipulated that the name should be "The Chicago Zoological Gardens," and that is the official title.

The Chicago Zoological society, which will operate the gardens, was incorporated in February, 1921, by Peter Reinberg (since deceased), Commissioners Wilson, Maclean and Miller, Charles L. Hutchinson, president of the Art institute of Chicago and vice-president of the Corn Exchange National bank; Charles H. Wacker, capitalist and chairman of the Chicago Plan committee, and Judson F. Stone, manager of the McCormick estates. The work of organization was continued throughout 1921 and steps were taken to secure a representative collection of wild life. The committee having charge of the preliminary arrangements consists of Frank J. Wilson, chairman; William M. Maclean and George A. Miller. The committee secretary is Joseph Dillabaugh.

COOK COUNTY COMMITTEES.

Under a ruling of the Illinois State Supreme court, announced June 16, 1920, the primary law of 1919 was declared unconstitutional. This had the effect of nullifying the election of new county committees at the primary on April 12, 1920, and of reinstating the old committees elected under the primary act of 1910. This opinion was expressed by Attorney-General Brundage as follows:

"The primary act of 1919 being invalid and the repealing clause thereof inoperative, it follows that the primary act of 1910, as subsequently amended, is in force and that all the committeemen and committees elected thereunder, prior to 1920, continue to serve until their successors are chosen."

The court decision caused considerable confusion, especially among the republicans on account of factional differences. The old committees, however, continued to act and they are consequently given here very much the same as in The Almanac and Year-Book for 1920.

The mothers' pension law—effective July 1, 1911, and amended June 29, 1921—provides for the partial support of mothers with children under 14 years of age. Any mother who has resided in Cook county for three years, whose husband is dead or whose husband has become permanently incapacitated for work, is entitled to the benefits of the law for her children upon complying with its requirements. The assistance allowed to such mother cannot exceed $25.00 per month where there is but one child, and shall never exceed the sum of $15.00 per month for each additional child. This applies to counties of 300,000 or more population. In other counties the allowance is $15.00 for one child and $10.00 for each additional child.

The Art Institute of Chicago was incorporated May 24, 1879, for the "founding and maintenance of schools of art and design, the formation and exhibition of collections of objects of art and the cultivation and extension of the arts of design by any appropriate means." The museum building upon the lake front, first occupied in 1893, has never been closed for a day. It is open to the public every weekday from 9 to 5, Sundays from 12:15 to 9 p. m. Admission is free to members (now 13,600) and their families at all times, and free to all upon Wednesdays, Saturdays, Sundays and legal holidays. Upon other days the entrance fee is 25 cents.

All friends of art are invited to become members. Annual members pay a fee of $10 a year. Life members pay $100 and are thenceforth exempt from dues. Sustaining members pay $25 or more a year. Governing members are elected by the trustees and pay $100 upon election and $25 a year thereafter. Upon the payment of $400 governing members become governing life members and are thenceforth exempt from dues. All receipts from life memberships are invested and the income only expended. All members are entitled, with their families and visiting friends, to admission to all exhibitions, receptions, public lectures and entertainments given by the Art Institute and to the use of the Ryerson reference library of art and Burnham library of architecture. Visitors desiring to see the collections under guidance may make appointments with the museum instructors at the office of the director. The invested funds approximate $3,000,000.

MUSEUM.

The Art museum now ranks among the first three in the country. It contains excellent examples of the old masters and of the modern painters. There is also a large and comprehensive collection of sculpture, including reproductions of the work of the greatest sculptors, ancient and modern. There is an extensive collection of architectural casts. Other fields of art are represented by collections of etchings, engravings, textiles, oriental art, Egyptian and classical antiquities, period rooms, etc. There is a constant succession of passing exhibitions, sixty or more a year. All students enjoy the full use of the collections and the libraries. The number of visitors to the museum during the year ended Dec. 31, 1920, was 1,102,597.

SCHOOL.

The school of the Art Institute offers carefully planned courses of training for workers in the several arts, including drawing, printing arts, commercial art, painting, sculpture, designing, illustration and for teachers of the arts.

The school is conducted upon the most modern methods and has grown to be the most comprehensive and probably the largest fine arts school in the United States. Distinguished teachers from a distance are called in from time to time. Students, 4,200. The faculty consists of thirty-five teachers, not counting Saturday classes. CHICAGO BRIDGE SYSTEM.

The first ferry across the river was established in 1829, where the Lake street bridge now is. In 1833 a floating bridge of logs was in operation just north of the present Randolph street bridge. A foot bridge over the north branch was built in 1832 at Kinzie street. The first drawbridge over the main branch of the river was placed at Dearborn street in 1834. In 1854 a pivot bridge was built at Clark street. These and other bridges of that time were built by the persons most directly benefited by them. It was not until 1857 that a bridge was built entirely at the city's expense. This was the structure over the south branch at Madison street. It cost $30,000. Until 1872 the swing bridges were turned by hand, but in the year named steam power was installed on the Dearborn street structure and later most of the other bridges in the downtown section were similarly equipped. In 1895 the Rush, Lake and Van Buren street bridges were operated by electric motors. The last named structure, which was opened for traffic in that year, was the first of the Scherzer rolling type. The Halsted street lift bridge, the first and only one of its kind, was opened in 1894 and was operated by steam. It cost the city $242,880.

In 1921 Chicago had forty-seven bridges with movable spans and thirty with fixed spans. There were also thirty-nine viaducts and eight foot bridges. Most of the movable bridges are operated by electricity. The bridges and viaducts had a value of more than $7,000,000.

The Franklin-Orleans bridge was opened to traffic Oct. 23, 1920. With its approaches it cost nearly $2,000,000. The Wells street bridge was completed in 1921 and the new Madison street bridge was under construction.

HOUSE NUMBER SYSTEM IN CHICAGO.

The present house number system in Chicago was established by an ordinance passed June 22, 1908, and effective Sept. 1, 1909. This applied to all streets except those between the river, 12th street and the lake. Sept. 20, 1910, the city council passed an amendment to the ordinance making it applicable to the entire city. The change in business district went into effect April 1, 1911. The system is laid out on two base lines, State street dividing the east and west streets and Madison street the north and south streets. Numbers are assigned on the basis of 800 to the mile or 100 to the prevailing block of 660 feet or one-eighth of a mile.

RATES OF FARE FOR TAXICABS.

Fixed by Chicago city ordinances. Sightseeing cars and autobuses having a capacity of eight persons or more not included.

I. Rates by Distance.

For first half-mile (or fraction thereof) for one person.....40 cents
For each succeeding quarter-mile (or fraction thereof).....10 cents
For each additional person for the whole journey.....25 cents
For each four minutes of waiting (or fraction thereof).....10 cents

Waiting time shall include (a) the time during which the taxicab is not in motion, beginning ten minutes after call time at the place to which it has been called; (b) the time consumed by unavoidable delay at street crossings or bridges, and (c) the time consumed while standing at the direction of the passenger.

No charge shall be made (a) for time lost for inefficiency of the taxicab or its operator, or (b) for time consumed by the premature arrival in response to a call.

II. Hour Rates.

For trip of two miles or more.

Car seating two persons, $2.50; minimum charge for trip, $1.
Seating three to five persons, $3.50; minimum charge for trip, $1.50.
Seating more than five persons, $4.50; minimum charge for trip, $2.

Where the trip is for two miles or more and the passenger at the time of hiring any such vehicle expressly elects, as such passenger may do, to pay therefor by the hour, the operator in charge of such vehicle shall supply the passenger with a card upon which shall appear the name of the owner, the name and license number of the operator and the exact time of the hiring; and the charge for such service, in the absence of such express agreement, shall not exceed the rates prescribed above as the "hour rate."

The rate of fare to be asked or demanded for such vehicles shall be determined in accordance with the time which the vehicle is in use by the passenger or passengers engaging the same.

In determining the seating capacity of any such vehicle neither the operator's seat nor any portion thereof shall be computed, but the said capacity shall be determined by the number of persons which can be accommodated in the interior or tonneau of such vehicle.

No charge shall be made for the time consumed in responding to a call or in returning to the place from which such vehicle is called.

Baggage—Every passenger upon any public automobile, autocar or other similar vehicle shall be allowed to have conveyed with him upon such vehicle, without extra charge therefor, his ordinary light traveling baggage in an amount not to exceed fifty pounds. A fee of 20 cents may be charged for conveying a trunk.

Lost Baggage—Whenever any package, article of baggage or goods of any kind shall be left in or upon any vehicle licensed under the provisions of this article, the operator of such vehicle shall, upon discovery of such package, baggage or goods, forthwith deliver the same to the vehicle bureau, department of police.

Meetings.

Regular meetings of the city council are held every Wednesday afternoon at 2 o'clock, unless otherwise ordered at a regular meeting. Special meetings may be held at any time, on call of the mayor or any three or more aldermen; such call shall be in writing, duly signed, and shall be presented to the clerk, who shall proceed immediately to prepare notices of the same and shall cause them to be served on members of the council at least twenty-four hours prior to the day and hour set for the special meeting except for special meetings called on account of death of a member of the council or in an extreme emergency; such notices shall describe, in brief, the nature or objects of the call.

Organization of the Council.

For the purpose of facilitating the adoption of rules for the succeeding council, and to effect and recommend a nonpartisan organization thereof, the following shall be the procedure: On the second Tuesday in March of each year the members of the council shall convene as a committee of the whole for the selection of a committee on committees and rules. The committee on committees and rules shall consist of five members, one to be chosen from each of the districts following, by a majority of the aldermen therein present and voting:

District 1 .....Wards 1 to 7, inclusive
District 2 .....Wards 8 to 14, inclusive
District 3 .....Wards 15 to 21, inclusive
District 4 .....Wards 22 to 28, inclusive
District 5 .....Wards 29 to 35, inclusive

The members shall vote by roll call of their respective districts.

In the event that in any district no candidate shall receive a majority after five roll call ballots have been taken, then the selection for such district shall be made by all the members of the council present and voting, and the candidate receiving the highest number of votes shall be chosen to represent such district.

The committee on committees and rules shall prepare the rules and plan of organization, select the chairmen and members of the various committees, and report at the first regular meeting of the succeeding city council.

CITY CLERK'S OFFICE.

John Stone was executed publicly on the prairie on the south side. William Jackson and Albert Staub were also executed publicly, but on the west side. After that executions were private and took place in the courthouse until 1878, since which time they have taken place in the county jail on the north side. Rafferty was hanged in Waukegan for murder in Chicago.

THE MORTON ARBORETUM.

On Nov. 14, 1921, Joy Morton of Chicago announced that he had set aside 400 acres of land owned by him in DuPage county as an arboretum for the benefit of the people of Chicago and vicinity. It is expected that it will be open to the public in two years. The work of preparing the grounds is in charge of O. C. Simons. In a memorandum announcing the project Mr. Morton said:

"The site of the proposed arboretum lies in DuPage county, ten miles due west of the new zoological gardens in Riverside. It consists of a wide valley through which runs the east fork of the DuPage river, bounded by hills wooded with splendid specimens of native trees and shrubs. The Kew gardens in London, the Jardin des Plantes in Paris, the Tervuern in Brussels, the Arnold arboretum at Boston and Shaw's garden in St. Louis have been carefully studied and their desirable features will be incorporated in the new arboretum."

The arboretum is to be endowed by the donor and will be known by his name.

GARNISHMENT LAW OF ILLINOIS.

Section 14 of the act of 1872 as amended in 1897 and 1901 declares: "The wages for services of a wage earner who is the head of a family and residing with the same, to the amount of fifteen ($15) dollars per week, shall be exempt from garnishment. All above the sum of fifteen ($15) dollars per week shall be liable to garnishment."

Employers are obliged to pay wages amounting to $15 or less, notwithstanding the service of a writ of garnishment, providing the person to whom wages are due makes affidavit that he is the head of a family and is living with the same.

General Information.

The Chicago public library is a free public institution, established under the Illinois library law of 1872. It derives its revenue from an annual library tax of eight-tenths of one mill. A board of directors of nine members is appointed by the mayor, three annually for terms of three years. The library occupies the site formerly known as Dearborn park, bounded by Michigan avenue, Washington street, Garland court and Randolph street. The cost of the building was about $2,000,000, including the furniture, book stacks and machinery. There are forty-five branches, seven high school branches, 108 delivery stations and 181 traveling libraries and deposit stations.

The right of drawing books from the public library belongs to all who reside in the city of Chicago, and also to those who make their homes in the suburbs within the limits of Cook county and are regularly employed in the city. In order to become a book borrower it is necessary only to file an application giving the name and residence of the applicant and bearing the signature of a second person, who must be an actual resident of the city, appearing as such in the latest city or telephone directory. This person becomes the guarantor to the library for the proper observance of the library regulations on the part of the applicant. These regulations merely provide that books drawn for home use must be returned within the stated period and must not be defaced or injured.

At the close of 1920 the public library contained 1,149,893 volumes. The aggregate circulation for the year was 7,651,928 volumes, which does not include the use of books kept on the open shelves at the main library or its branches or the periodicals or newspapers used in the reading rooms.

PERCENTAGE OF FOREIGN BORN IN ILLINOIS BY COUNTIES.

[Bureau of the census report.]

The population of Illinois, according to the census of 1920, is 78.5 per cent native white and 18.6 per cent foreign-born white. In 1910 the percentage of foreign-born white was 21.3. The foreign-born white population, which was 1,202,560 in 1910, increased to 1,206,951 in 1920, an increase of 0.4 per cent. The native white population in the same period increased from 4,324,402 to 5,092,382, or 17.8 per cent. Less than one-half (48.7 per cent) of the white people in the state are native American born of native parents, the total native whites of native parentage being 3,066,563, while the foreign element is represented by 1,206,951 foreign-born whites, 1,467,036 native whites who had foreign-born parents and 558,782 who had one parent foreign born, the other being native. The total population includes also 182,274 negroes, 194 Indians, 2,776 Chinese, 472 Japanese, 164 Filipinos, 33 Hindus, 2 Hawaiians and 32 Koreans. In most of the counties of the state the percentage of foreign-born whites has decreased and in ninety of the 102 counties there was also a decrease in the number of foreign-born whites.

Following was the percentage of foreign-born whites in the total population of each county in 1920 and 1910:

The Field Museum of Natural History, established in 1894 at the close of the World's Columbian exposition of 1893, is located in Grant park, near the lake, south of Roosevelt road extended. The building includes four stories and a clerestory. It is treated with a monumental order of Greek Ionic architecture, the principal fronts being about eighty feet in height. The material for the exterior is Georgia white marble and the frame of the structure is steel, being divided into a large pedimented central pavilion and two long wings terminated by a smaller pavilion at each end. This order rests upon a stylobate and is crowned by a clerestory pierced with windows.

One of the principal features of the building is the terrace (incompleted) extending around the structure. This terrace will be forty feet wide and will rise six feet above the surrounding territory. It will have a retaining wall, steps and balustrades of the same marble as the building proper. The entrances will be provided with an ample flight of steps leading up to the central doorways.

The interior of the building is 750 feet by 350 feet in dimensions, but with its exterior outer lines, including entrances and the incompleted terrace, the structure covers about eleven acres of ground.

The great Stanley Field hall, seventy feet wide, 300 feet in length, and extending to the roof, a distance of seventy-five feet, with a grand stairway opposite the main entrance, divides the building east and west. From this hall, east and west, extend at right angles exhibition halls forty feet in width and 200 feet in length, these exhibition halls being again connected by transverse exhibition halls 45 feet in width and 320 feet in length, parallel to and adjoining the central hall and also at the east and west ends of the building. On the two main floors there are thirty of these exhibition halls.

The first story, fourteen feet high, is devoted to the division of taxidermy, to the installation of the Egyptian tomb and the exhibition of primitive land and water transportation. It is used for the workshops of the mechanical force and for storage purposes. The first and second floors contain the exhibition halls and the administrative offices. The third floor is occupied by the curators and their assistants with large, convenient spaces set aside for study collections and the herbarium. On this floor are also the general library and reading room, the departmental libraries, offices, well equipped laboratories, classrooms, illustration studios photograph gallery, the printing shop, etc. The clerestory is intended for scientific and technical work of a more particular character, where light must be controlled and clear atmosphere preserved. It at the present time is used for storage purposes.

The museum is provided with a theater, accommodating 1,000 people, the main entrance to which is on the west side of the building. This theater is known as "James Simpson theater." There are two classrooms or small lecture halls on the third floor, each of which will accommodate eighty persons.

The building has been planned and designed to accomplish three purposes: First, the most perfect exhibition halls that could be arranged for the display of scientific collections; second, the adequate housing and equipment of the scientific working parts which belong with such collections; third, the construction of a building which would measure up to the highest standard of architecture and add to the monumental appearance of the city.

The nucleus of the exhibition material was gathered by gift and purchase at the World's Columbian exposition. Most of this material, however, has since been rearranged, readapted or discarded. Several departments created at the organization have been abandoned, until after a lapse of twenty-five years and the expenditure of approximately $7,000,000 the museum is now divided into five departments —namely, anthropology, botany, geology, zoology and the N. W. Harris public school extension. Many expeditions for the purpose of obtaining study, exhibition and exchange material and data have been dispatched all over the world. The results of these expeditions, investigations and researches have been published by the museum from time to time, which publications have been distributed to kindred societies and institutions both at home and abroad. An important contribution of $250,000 by Norman W. Harris was announced in December, 1911, for the extension of the work of the museum into the public schools of Chicago. The plans for carrying out Mr. Harris' wishes were placed in operation in the spring of 1913. The museum has a working library of about 72,000 titles, an extensive exchange system, fully equipped departmental laboratories, a herbarium of more than 720,000 sheets, study collections in mammals and birds reaching many thousand specimens, a large taxidermy section, a well equipped printing shop, illustration studios and assaying and lapidary rooms. In North American ethnology, in the world's mineralogy, in economic botany, the museum is particularly prominent, while its series of mounted mammals furnishes examples of advanced museum methods. The building is open to the public on all days except Christmas and Thanksgiving. An admission fee of 25 cents will be charged except on Thursdays, Saturdays and Sundays, when admission is free to all. Children, teachers and students are admitted free at all times.

The museum is incorporated under state law and the administrative control rests in a board of trustees with president, secretary, etc. The executive of the museum is the director, under whom there are five head curators with divisional assistant curators, preparators, etc. The entire museum records, the accessions system, the historical files, publications and supplies are in charge of a recorder.

AGE IN ILLINOIS.

According to the census of 1920, 29.2 per cent, or nearly three-tenths, of the people in the state of Illinois are either infants or children under 15 years of age; 8.3 per cent are young people 15 to 19 years old; 40.7 per cent, a little more than two-fifths, are men and women in the prime of life, being from 20 to 44 years old; while 21.6 per cent, being 45 years of age and over, are well along in middle life if they have not reached old age.

A little more than three-fifths of the population, 60.8 per cent, are old enough to vote, being 21 or over, and in this class the men outnumber the women in the ratio of 106 to 100. The males of military age, 18 to 44, constitute 43.9 per cent of the male population and 22.4 per cent of the total population.

CHICAGO PLAN COMMISSION.

The Chicago Plan Commission was created by the city council Nov. 1, 1909. Its membership of 328 consists of the mayor, the heads of the various city departments, chairmen of council committees, chiefs of various governmental bodies and one alderman (ex officio) from each ward, with the remainder of the personnel composed of citizens from every section of Chicago and representing every interest in the city's municipal life. Appointments to the commission are made by the mayor and confirmed by the city council. The commission is permanent, nonpolitical, nonpartisan, nonsectarian and nonsectional. It is truly representative of the entire city and every element in it.

Mayor William Hale Thompson is president ex officio, Charles H. Wacker is chairman, Frank I. Bennett is vice-chairman and its headquarters in the Hotel Sherman (room F, phone Franklin 2120) are in charge of E. S. Taylor, office manager.

The Chicago Plan Commission was appointed for the purpose of studying the plan of Chicago created by Daniel Hudson Burnham and E. H. Bennett under the direction of the Commercial club of Chicago.

In 1909 the Commercial club presented the plan to the city as a gift. The plan of Chicago is an all-Chicago plan. It proposes 200 miles of street widenings, extensions and improvements; a remodeling of the passenger and freight railroad and terminal facilities; the creation of adequate harbors; rehabilitation of the transportation system; the park development along the shore of Lake Michigan; the establishment of an adequate new postoffice on the west side between the Northwestern and Union stations, where 62 per cent of all the mail of Chicago is handled, and the creation of a system of approximately 30,000 acres of forest preserves northwest and south of Chicago.

The ten years' work of the Chicago Plan Commission has resulted in assuring twelve of the major features of the entire plan. These are either constructed or advanced in court or city procedure to the point where their realization is assured, public bonds having been voted where necessary. These twelve projects include:

The Roosevelt road (12th street) widening and extension.

The Michigan avenue widening and extension.

The west side passenger and freight terminal plans, including widening the Polk and Taylor street viaducts; widening Canal street between Roosevelt road and Washington street and extending it via the two-level Kinzie street bridge to Orleans street, connecting with the new Franklin-Orleans street bridge; and the Monroe street bridge.

The south shore lake front plans, including the completion of Grant park, the extension of the Roosevelt road (12th street) viaduct to the Field Museum of Natural History, construction of the parkways to the southward and the South Park avenue widening and extension northward to Randolph street, making possible an outer drive connection between Grant park and the Lake Shore drive at the foot of the municipal pier, which project has already been considered favorably by the Lincoln and south park boards.

The Illinois Central railroad terminal rehabilitation.

The widening of Western avenue.

The widening and opening of Ashland avenue.

The widening and opening of Robey street.

The extension of Ogden avenue from Union park to Lincoln park.

The South Water street widening and two-level connection with Michigan avenue.

The acquisition of 14,254 acres of forest preserves by the forest preserve commission.

The improvement of the outer highway system.

Early in 1921 the plan commission issued a list of eighty-seven street improvements that had been suggested for early realization. Principal among these are the Pershing road (39th street) improvement from Lake Michigan to the forest preserves at Riverside; the creation of an outer circuit of streets from Lake Michigan on the north via Peterson and Rogers avenues and the line of the old Indian boundary, southwest to the forest preserves along the Des Plaines river and returning again to Lake Michigan by a variety of roads from 95th to 134th street; the widening, opening, extending or improvement of section, half section and diagonal streets, especially in outlying sections; and the creation of an adequate system of streets in the district between Madison street, Roosevelt road, Halsted street and the Chicago river, which is destined to become a highly developed industrial district, and, unless proper street facilities are provided now, in the near future will become as congested as the loop district to-day.

The aim of the Chicago Plan Commission is two-fold: First, to assure, maintain and develop the commercial prestige of the city, and, second, to provide humanitarian benefits for all its citizens. Surrounding cities are competing for the business that now comes to Chicago and if Chicago is to maintain its commercial standing among American cities it must carry out the economic project in the Chicago plan. By making it easier and cheaper to transact business, by supplying direct and easy means of communication between the several sections of the city, and by providing ample recreational facilities, the wealth, the health and happiness of every one in Chicago will be assured and constantly increased. Especially is this true in view of the enormous revenue that will be attracted to Chicago through the carrying out of Chicago plan projects, because both people and business will be drawn to Chicago thereby.

The Chicago Plan Commission is working in harmony with every organization in Chicago. It gives illustrated lectures before clubs, societies, etc., and upon application at its headquarters literature can be secured covering the various features of its work in endeavoring to make Chicago the best, most orderly, healthful, convenient and attractive city in America.

COOK COUNTY FARM STATISTICS.

[Federal census report.]

On Jan. 1, 1920, there were 5,305 farms in Cook county, Illinois, of which 5,301 were operated by white farmers and four by colored farmers. Owners and managers operated 3,107 of the farms and tenants 2,198. There were 348,616 acres of land in the farms, of which 303,470 acres were improved. The value of the land and buildings on Jan. 1, 1920, was $90,730,831, as compared with $85,543,087 on April 15, 1910. Following were the principal crops raised in 1919:

Crop.	Acres.	Bushels.
Oats	56,196	1,682,981
Corn	54,259	1,485,835
Wheat	25,105	426,749
Hay	68,242	*85,443

*Tons.

Domestic animals on farms in Cook county reported Jan. 1, 1920:

Horses	16,327
Mules	278
Cattle	41,941
Sheep	3,043
Swine	42,818

BOULEVARD LINK AS A FORT DEARBORN MEMORIAL.

BIRD'S-EYE VIEW OF THE BOULEVARD LINK IMPROVEMENT AS IT WILL APPEAR WHEN COMPLETED.

[Drawing furnished by Chicago Plan Commission.]

On March 23, 1921, the executive committee of the Chicago Plan Commission through its chairman, Charles H. Wacker, issued the following statement:

"We are happy to announce to the men and women of Chicago that William Wrigley, Jr., has contributed $50,000 toward a fund of $100,000 for a fitting treatment of the four Michigan avenue bridge houses. This gift is especially generous because Mr. Wrigley, at the request of the Chicago Plan Commission, already has spent an extra $20,000 on the beautification of the entrance to his monumental building.

"Matching his public spirit, the Ferguson fund trustees have contributed the additional $50,000 for the bridge houses. The Chicago Plan Commission expresses for both these gifts the appreciation which will be felt by all the citizens of Chicago.

"Through the money thus provided it will be possible to make the bridge houses architecturally beautiful and historically significant, a fitting capstone to the Michigan avenue improvement. The site of Fort Dearborn and the spot where stood the first white man's house constructed in Chicago are both included in the plazas, and both will be commemorated. The Michigan avenue improvement already is notable for imposing views. The bridge houses will add artistic charm and a link with the past, elements that we shall appreciate more and more in Chicago as the city grows older.

"Not only for the direct result but also for its influence toward the finer and better city of the future do we value these public-spirited benefactions. They cannot fail to point the way to others who will be called upon to aid in embellishing the improved South Water street. Decorative features and sculpture must be provided to make the Chicago river attractive like European water courses, and an object of beauty instead of ugliness.

"This treatment of the public thoroughfares

will raise the standard of private architecture. It will have a decisive influence on the character of the buildings along Michigan avenue from Randolph street to Chicago avenue, as well as along South Water street and eventually along the entire north side of the river. Michigan avenue and South Water street, connected and beautified, will become as widely known as the Place de la Concorde in Paris, Trafalgar square and Hyde Park in London, the Ringstrasse in Vienna and Unter den Linden in Berlin.

"Such accomplishment in the future will be only a logical continuation of the record of the past, because the history of Chicago is replete with achievements. The growth in eighty-four years, within the span of an extended life, from a swampy Indian village to a city of nearly 3,000,000 people, is in itself almost a miracle. The world knows no parallel.

"What is it that has brought Chicago to this point and enabled it to weld together an unbroken chain of achievements? The answer is men. Men make cities. Whenever needed in the past, men were not wanting, men of vision and foresight, stalwart men who recognized the potentialities of their city, believed in its future and were unafraid. Their example inspired others; obstacles were overcome and 'I Will' was permanently emblazoned upon the shield of Chicago. The fine contributions now announced show that the public spirit of the citizens of Chicago still lives, and therein lies the promise of the future."

The statement was signed by Chairman Wacker, Frank I. Bennett, vice-chairman, and A. C. Bartlett, Edward B. Butler, Clyde M. Carr; John J. Coughlin, alderman; Frederick A. Delano, John V. Farwell; Albert J. Fisher, alderman; Theodore K. Long, Joy Morton, William N. Pelouze; John Powers, alderman; Julius Rosenwald, Daniel J. Schuyler, James

Simpson, John F. Smulski, Charles H. Thorne, Harry A. Wheeler, Walter H. Wilson and Michael Zimmer.

The Ferguson fund was designed by its donor, Benjamin Franklin Ferguson, a pioneer lumberman of Chicago, to provide from year to year the erection and maintenance of enduring statuary and monuments in parks, along boulevards and in other public places, "commemorating worthy men or women of America or important events in American history." Mr. Ferguson died in 1905. When his will was probated it was found that he had set aside a trust fund of $1,000,000 with the Northern Trust company designated as trustee, the annual income of which was to go to the Art institute to be expended in the manner set forth in the will.

Mr. Wrigley, the other donor, is owner of the Wrigley building, at the north end of the Michigan avenue bridge. It was completed in 1921 and is one of the most striking buildings in Chicago. It is shown in part on the right of the first drawing reproduced herewith.

DEEP-WATER HARBOR IN LAKE CALUMET.

The following report to the mayor and aldermen of Chicago was made July 20, 1921, and the ordinance recommended in the report was adopted without opposition:

"Your committee on harbors, wharves and bridges, which has had under consideration the construction of a deep-water harbor in Lake Calumet, beg leave to report and recommend the passage of the attached ordinance, entitled:

" 'An ordinance relating to the construction of a deep-water harbor at Lake Calumet and to the filling in of lands adjoining such harbor; accepting a grant of lands in said lake from the state, and ratifying certain boundary-line agreements.'

"The adoption of this ordinance will be in harmony with recommendation of the Chicago harbor commission in its report of 1909; the various acts of the city council in relation to the acquisition of the riparian rights in the lake and in requesting the legislature (Council Journal of March 28, 1921), to grant the city the title of the state to the harbor lands that are to be reclaimed, which grant was made by an act in force July 1 last.

"The plan of improvement adopted is, with a few changes, that prepared for the city by Arend Van Vlissingen and which has the unqualified approval of Col. W. V. Judson, resident United States engineer, and as to which no objections have been raised except from one of the shore owners.

"Under this ordinance there will be dredged a deep-water harbor of an area of 693 acres and having a water frontage of 13.7 miles, and from the spoils of the dredging there will be filled in to a grade of six feet above city datum some 1,451 acres of land that will belong to the city. The cost of the dredging will be about $3,500,000 and the value of the city lands will be in excess of that cost.

"The harbor basin will have a width of 1,600 and a length of 12,000 feet, and from this basin will be projected twelve slips of lengths varying from 1,000 to 3,200 feet and each of a width of 450 feet.

"The act recently passed by the legislature [approved June 24, 1921] grants to the city the state's title to the harbor lands, with power to sell and lease; it provides that, by the acceptance of the grant, the city shall be obligated to construct the harbor (an obligation which the city previously assumed by entering into the boundary-line agreements), and, also, that all moneys received from the sale or leasing of the public lands shall be used in the construction and maintenance of the harbor.

"The ordinance, as drawn, does not provide for any canal between the river and lake north of 110th street and leaves it to the future to determine whether an entrance to the harbor, other than by way of the 200-foot federal channel in the Calumet river, is desirable.

"Under the new state law the city may turn the entire Lake Calumet harbor project over to the sanitary district, which, thereupon, will have authority to levy, in four consecutive years, a tax about sufficient to cover the cost of digging the harbor. The question of whether or not it is desirable to turn this project over to the district is one that can be decided later.

"The ordinance herewith submitted will permit the city to go ahead with necessary work, such as that of securing court approval of the boundary-line agreements and of securing federal and state approval of the harbor plan by the ordinance adopted; in fact, about every step short of actual work of construction, which must wait upon funds being appropriated therefor."

Lake Calumet lies immediately to the east of Pullman, between 103d and 130th streets. It is connected with the lake by the Calumet river, the mouth of which is at the foot of 91st street in South Chicago. It is also connected with Hyde lake and Wolf lake, the latter lying partly in Cook county, Illinois, and partly in Lake county, Indiana.

CHICAGO CHARITABLE CORPORATION.

William A. Wieboldt, Chicago department store owner, on July 21, 1921, transferred fourteen pieces of real estate to the Chicago Charitable corporation for the express purpose of administering the income from the properties to Chicago charities. The foundation was incorporated June 25, 1921, by Werner A. Wieboldt, son of the merchant; Kirk W. Starr and B. J. Schwindt. The total value of the real estate and securities turned over to the corporation was estimated at $4,500,000.

CHICAGO PARKS AND BOULEVARDS.

LINCOLN PARK SYSTEM.

Commissioners (appointed by governor with consent of senate)—Eugene R. Pike, Mrs. Helen T. Pelouze, Samuel Gassley, John A. Torstenson, Robert H. Morse, Charles I. Pierce, Harold N. Scott.

Officers—President, Eugene R. Pike; vice-president, Harold N. Scott; auditor, Charles I. Pierce; secretary and superintendent, William H. Wesley; advisory counsel, Jay C. McCally; treasurer, William J. Fickinger.

Office—In Lincoln park near Clark and Center streets.

The Lincoln park district consists of the towns of North Chicago and Lake View, with Fullerton avenue as the dividing line, and is bounded on the north by Devon avenue, on the south by the Chicago river, and extends from Lake Michigan on the east to the north branch of the river and North Western avenue on the west.

The area of the Lincoln park district is 12.64 square miles. The total area of the parks and boulevards is 642.63 acres, with 11.755 miles of boulevards.

Lincoln Park—Lincoln park, previously known as Lake park, began its history under its present name by resolution passed by the common council of Chicago under date of June 5, 1865. The park proper is 317 acres in extent and extends from Diversey boulevard to Oak street along the lake front. To this 200.59 acres of land has been added by filling in Lake Michigan north of Diversey boulevard. This extension contains a 57 acre yacht harbor. The park contains a large floral department, also an extensive zoological garden containing about 1,800 animals. Boating and bathing facilities are furnished and the park lagoon—one mile in length—gives an admirable course for racing. The Academy of Sciences is located in the park at the foot of Center street. This building was erected in 1893 and contains about 250,000 specimens. It is noted for its collection of local natural history specimens and for its complete collection of mollusks. The park has provided facilities for outdoor games during both the winter and summer seasons.

Stanton Park—At Vedder, Vine and Rees streets; area 4.78 acres; equipped with fieldhouse and outdoor gym facilities.

Lake Shore Playground—Area 9.16 acres; is situated between Pearson street and Chicago avenue, extending from the Chicago avenue pumping works to the lake. This park is fitted up as a playground, containing a shelter house, and with outdoor and indoor gymnasium apparatus.

Seward Park—Contains 1.78 acres; is fitted with outdoor and indoor gymnasium and has a fieldhouse which contains reading rooms, assembly hall, clubrooms, a branch of the public library and facilities for gymnastic work and aquatic sports.

Hamlin Park—Wellington avenue and Robey street; area 8.64 acres; is fully equipped with fieldhouse and out-of-door gymnasium facilities.

Welles Park—Western avenue and Montrose boulevard; fieldhouse and out-of-door gymnasium facilities; area 8.17 acres.

Gowdy Square—Goethe street on the north and Astor street on the west; area .46 acre.

SOUTH PARKS.

Commissioners (appointed by Circuit court judges)—Albert Mohr, Charles L. Hutchinson, L. B. Patterson, John Barton Payne, John Bain.

Officers—John Barton Payne, president; John Bain, auditor; William A. Tilden, treasurer; John F. Neil, secretary; Roy O. West, attorney; J. F. Foster, general superintendent; H. C. Carbaugh, superintendent of employment.

Offices—In Washington park, 57th street and Cottage Grove avenue.

The south park district is bounded on the north by the Chicago river and the Illinois and Michigan canal, east by Lake Michigan and the state of Indiana, south by 87th street and 138th street and west by South Cicero avenue and State street.

The area of the south park district is 92.6 square miles, population is in excess of 800,000. The total area of parks is 2,043.98 acres and of parks and boulevards 2,494.59 acres, consisting of twenty-four parks and 32.98 miles of boulevards. The following is a list of the parks and boulevards:

Jackson Park—Area 542.89 acres; bounded on the north by 56th street, east by Lake Michigan, south by 67th street and west by Stony Island avenue; this park is provided with facilities for boating, rowboats and launches, has two golf courses, one of nine holes and the other eighteen holes, with golf shelter, lockers and showers for both men and women; it has baseball and football fields, tennis courts, refectory, beach bathing, music court and in the winter skating is provided. It also has a playground for small children. The commissioners have completed and in operation a new bathing beach at the foot of 63d street, extended. This beach with its equipment is undoubtedly one of the finest in the country and has a capacity of taking care of from 6,000 to 10,000 bathers every two hours. Everything is absolutely free, including bathing suits, towels and shower baths.

Washington Park—Area 371 acres; bounded on the north by 51st street, east by Cottage Grove avenue, south by 60th street, west by South Park avenue; has the same accommodations for the public as Jackson park except the golf facilities and the beach and in addition has roque courts, archery range, accommodations for fly casting, wading pool and sand court for children and a house for the game of curling.

Marquette Park—Area 322.68 acres; bounded on the north by 67th street, east by California avenue, south by 71st street and west by the Grand Trunk Western railroad. The east 80 acres has been improved. It has ball fields and tennis courts and skating in the winter. It also has an eighteen hole golf course.

Grant Park—Area 205.14 acres; bounded on the north by Randolph street, east by Lake Michigan, south by Park row, west by Michigan avenue. The Logan and Hamilton monuments, the Great Lakes fountain, the Art institute and the Field Museum of Natural History are located in this park. The Roosevelt memorial and the great stadium are to be erected at the south end of the park.

Midway Plaisance—The connecting way between Washington and Jackson parks; bound-

ed on the north by 59th street, east by Stony Island avenue, south by 60th street, west by Cottage Grove avenue. Has tennis courts and in the winter skating and hockey

McKinley Park—Area 74.88 acres; bounded on the north by 37th street and Archer avenue, east by Robey street, south by 39th street, west by Western Avenue boulevard. Has swimming pool, outdoor gymnasiums for men and women, tennis courts, ball field, children's playground, wading pool and skating in the winter. Modern and complete recreation buildings have been provided.

Gage Park—Area 20 acres; situated at the intersection of Western avenue and 55th street. Has wading pool, ball field and tennis court.

Sherman Park—Area 60.6 acres; bounded on the north by 52d street, east by South Racine avenue, south by Garfield boulevard, west by Loomis street. Has recreation buildings which include an assembly hall used by the people free of charge for various entertainments, clubrooms for meetings of the various clubs of the community, reading room supplied with periodicals by the park commissioners, gymnasiums for men and for women, shower and plunge baths and locker rooms. There are also outdoor gymnasiums for men and women, playground for children, wading pool and swimming pool with the necessary dressing booths. Provision is made for baseball, football, tennis and boating. There is also a bandstand from which concerts are given during the summer every Sunday evening. Also skating in the winter.

Ogden Park—Area 60.56 acres; bounded on the north by 64th street, east by South Racine avenue, south by 67th street, west by Loomis street. The same facilities for recreation and pleasure are provided as in Sherman park.

Palmer Park—Area 40.48 acres; bounded on the north by 111th street, east by South Park avenue, south by 113th street, west by Indiana avenue. The same facilities for recreation and pleasure are provided as in Sherman park, except boating.

Hamilton Park—Area 29.95 acres; bounded on the north by 72d street, east by C., R. I. & P. railway, south by 74th street, west by C. & W. I. railway. The same facilities for recreation and pleasure are provided as in Sherman park, except swimming pool and boating.

Bessemer Park—Area 22.88 acres; bounded on the north by 89th street, east by Muskegon avenue, south by 91st street, west by South Chicago avenue. The same facilities as Sherman park except boating.

Mark White Square—Area 10 acres; bounded on the north by 29th street, east by Halsted street, south by 30th street, west by Poplar avenue. The same facilities as Sherman park except boating.

MUSIC IN CHICAGO.

CHICAGO SYMPHONY ORCHESTRA.

Founded by Theodore Thomas.

The Theodore Thomas orchestra was organized in Chicago in 1890-1891 by a number of men interested in promoting the highest class of instrumental music. The Orchestral association was incorporated Dec. 16, 1890, and Theodore Thomas, famous for many years as a conductor, was engaged to lead the new organization, which was then named the Chicago orchestra. The preparations were completed in 1891 and the first public rehearsal was given at the Auditorium Friday afternoon, Oct 16, of that year. Financially the result of the first season was discouraging, the fifty or more gentlemen guaranteeing the expenses being compelled to meet a deficit of about $53,000. Receipts, however, continued to increase from year to year until the orchestra was finally placed on a permanent basis. This was accomplished when Orchestra hall, erected by subscriptions from more than 8,000 persons, was completed at 220 South Michigan avenue, and the organization was provided with a home of its own. The first concert there was given Wednesday evening, Dec. 14, 1904. Theodore Thomas died Jan. 4, 1905, and the orchestra, which until then had been called the Chicago orchestra, was named the Theodore Thomas orchestra. Feb. 24, 1913, the title was changed to the Chicago Symphony orchestra (founded by Theodore Thomas). Frederick Stock, after the death of Mr. Thomas, was made conductor, a position he held until Oct. 2, 1918, when he withdrew until he could acquire citizenship in the United States. His place was taken by Eric De Lamarter. Mr. Stock resumed the position of conductor in May, 1919. The plan of giving two performances a week—a public rehearsal on Friday afternoon and a concert on Saturday evening—has been followed from the beginning. The season consists of twenty-eight weeks, beginning in October and ending in April.

The first officers of the Orchestral association were: N. K. Fairbank, president; C. Norman Fay, vice-president; P. A. McEwan, treasurer and secretary; Milward Adams, manager.

62 to 67 feet....	16.00	77 to 82 feet....	19.00
67 to 72 feet....	17.00	82 to 87 feet....	20.00

Residences—Frontage rate plus 5 cents per ton of coal consumed for steam heating plant; each 100 square feet of greenhouse space, $2; hose connection, 30 foot frontage, $2; 30 to 50 foot frontage, $3; each additional 25 foot frontage, 50 cents.

Business—Hotels, lodging houses and taverns, not over twelve rooms, one set of fixtures with frontage rates: each room over 12, $1. Additional fixtures: Bathtubs, each, $3; urinals, each, $1.50; hand basins, each, $1; water closets, each, $3; steam heated, same as residences; steam engines, per horse power, $4. Office buildings, same as hotels. Stores and business premises, frontage rates plus 25 cents per person over ten employed. Additional fixtures: Hand wash basin, $2.50; closet, $3.50; other fixtures, similar to hotels. Public fixtures; Bathtub, $6; hand basin, $2.50; closet, $3.50; urinal, $1.50; laundry tub, $1.75. Barber shop fixtures, same as public. Bakeries, frontage rates plus 1 cent for each barrel of flour or meal used.

Building—Each 1,000 bricks used, 5 cents; each cord of stone, 6 cents; each cubic yard concrete, 2 cents; each 100 yards plastering, 15 cents. If flat rates amount to more than $100 a year, metered service is required.

Meter Rates.

Meter rates are 62½ cents per 1,000 cubic feet. Discount of 10 per cent for prompt payment of bills. Special rates are quoted on water drawn through direct connection with city tunnels, from conduits and from Lake Michigan or the Chicago river.

Charles S. Duke.

Under a law passed by the Illinois legislature and approved June 28, 1919, empowering city councils to provide for residential, commercial and industrial zones the board of aldermen of Chicago passed an ordinance Feb 18, 1920, creating a zoning commission and defining its powers and duties. The mayor appoints the members of the commission, which has the power to employ a competent zoning expert or experts and such employes as might be necessary to make all surveys, investigations, maps and compilations for the preparation of reports and an ordinance or ordinances in pursuance of the act of the Illinois assembly passed June 28, 1919, and in force July 1, 1919, entitled "An act to confer certain additional powers upon city councils in cities and presidents and boards of trustees in villages concerning buildings, the intensity of the use of lot areas, the classification of buildings, trades and industries with respect to location and regulation, the creation of residential, industrial, commercial and other districts, and the exclusion from and regulation within such districts of classes of buildings, trades and industries."

The commission is authorized to hold public hearings upon the subject of the proposed districting; to publish from time to time such maps, books and other matters as will give the city council and the general public information as to progress in the work; to make and publish a tentative report to the city council covering the zoning of the entire city; to formulate and publish a final report with ordinance or ordinances and maps covering the entire city to the end that wide publicity may be given before the enactment of any ordinance creating such districts.

Finally the commission is empowered to prepare and submit with the final report to the city council an ordinance or ordinances to carry into effect the report, making classifications of districts for purposes of regulation, limitation and restriction of buildings and uses of the same, describing fully each kind of district and establishing within the city districts of one or more of the classes so specified, and defining the limits of each of such districts.

ELEVATION OF CHICAGO AND LAKE MICHIGAN.

Mean sea level or mean tide at New York is the standard plane to which all elevations in the United States are referred, and the figures here given are heights above that plane. They are from the official records of the United States lake survey which have been maintained since 1860. The monthly mean surface of Lake Michigan has varied from 583.57 in June, 1886, to 578.98 in December, 1895. The annual mean surface has varied from 582.96 in 1886 to 579.47 in 1896.

The actual fluctuations in water surface from which these means are obtained have a much larger range and the immediate change in a few hours is often as great as two feet. The mean level of Lake Michigan from 1860 to 1914 (the average of all monthly means) was 581.20, and for the period from 1860 to 1875 it was 581.63, indicating that the mean level remains about the same, although the daily, monthly and annual fluctuations may be quite large. The highest known monthly mean was in 1838—584.7—and the lowest was in 1819—578.0—these being somewhat indeterminate. The United States lake survey has adopted as a standard low water for reference of soundings on its charts 578.5, a little higher than the lowest ever known as a monthly mean.

The Chicago city datum is 579.94 and this plane is used in most local works, including the harbor improvements made by the United States. This is about one foot above the lowest monthly mean of recent years and 1.26 feet below the mean level 1860-1914.

For general purposes the level of Lake Michigan should be taken as being somewhere between 581 and 582 feet. The heights of land in Chicago vary from 590 to 652 (Galewood) but the average may be placed at about 600 feet. The downtown section runs from 586 to 593 feet.

POSTAL SAVINGS BANK.

The postal savings bank was opened at the main postoffice, Chicago, Aug. 1, 1911. Any one 10 years old or over may open an account. No account may be opened for less than $1, nor will fractions of a dollar be accepted for deposit. Depositors are now allowed to deposit a total of $2,500, any part or all of which may be deposited in any month.

Deposits are evidenced by postal savings certificates issued in denominations of $1, $2, $5, $10, $20, $50, $100, $200 and $500.

Depositors of the postal savings system by applying therefor thirty days in advance may exchange the whole or a part of their deposits on Jan. 1 or July 1 of each year for United States registered or coupon bonds in denominations of $20, $100 and $500, bearing interest at the rate of 2½ per cent per annum, payable semiannually and redeemable at the pleasure of the United States after one year from the date of issue, both principal and interest payable twenty years from that date in United States gold coin.

Postal savings banks have also been established at the following postal stations: Armour, Auburn Park, Austin, C, Canal, Chicago Avenue, Chicago Lawn, Cragin, D, Dauphin Park, Douglas Park, Eastside, Edgewater, Elsdon, Englewood, 51st Street, Garfield Park, Grand Crossing, Hawthorne, Hegewisch, Humboldt Park, Hyde Park, Irving Park, Jackson Park, Jefferson, Lake View, Lincoln Park, Logan Square, McKinley Park, Morgan Park, North Halsted, Norwood Park, Ogden Park, Pilsen, Pullman, Ravenswood, Riverdale, Rogers Park, Sheridan Park, South Chicago, Stockyards, 20th Street, Washington Heights, West Pullman, Wicker Park, North Clark Street, Kenwood, Roosevelt Road, Armitage Avenue, Albany Avenue, Wabash Avenue, Windsor Park, Cicero Branch and at stations No. 10 (Hull House) and No. 195 (Boston Store).

The Chicago office ranks third in the United States with total deposits June 30, 1921, of $7,104,607 and 16,405 depositors.

TENSO Die Castings

We are now supplying to manufacturers of automobiles and accessories, electric motors and appliances, phonographs, washing machines, vacuum cleaners, pumps, vending machines and various other machines and devices—

MECHANICAL PARTS DIE CAST

to exacting accuracy from our TENSO ALLOY—a new alloy of great tensile strength, very hard and light in weight.

TENSO CASTINGS are double the tensile strength of Cast Iron, stronger than Brass, equal in strength to Malleable Iron, 200% stronger than ordinary white Metal Die Castings.

If you are a quantity user of small metal parts up to eight inches in diameter or length, investigate TENSO.

TENSO CASTINGS REQUIRE NO MACHINING

INTERESTING FACTS AND FIGURES

In 1907, when the traction problems were solved by the so-called "Settlement Ordinances" (after the entire question had been submitted to a referendum vote of the residents of Chicago), a value was established by the City of Chicago through an independent valuing commission covering the properties as they then existed. The valuation established by the city, **$55,775,000**, was more than **$30,000,000** below the value claimed by the companies and was reached by arbitrarily disregarding many millions of capital that actually had been invested in the properties.

To this 1907 valuation the city, under the ordinances, provided that the companies should add the amounts actually expended on capital account when authorized and certified by the Board of Supervising Engineers. These expenditures, covering track extensions and additions to equipment, brought the total purchase price as of January 31, 1921, up to **$160,254,131.** This represented the figure at which the city might have taken over the properties if it had chosen to exercise its right at that date.

The companies pay to the city of Chicago for the privilege of operating their cars in the streets 55 per cent of their net receipts annually. This has amounted in fourteen years to approximately **$26,016,197.**

During the year ended January 31, 1921, the Surface Lines carried a total of **1,353,171,493** passengers. Of these 769,025,413 were revenue passengers and 551,676,792 were transfer passengers. Out of each 8 cent fare collected the companies pay out **5.61** cents for labor and materials alone. When taxes, bond interest, the city's 55 per cent, damage claims and other charges are paid there is left to the companies out of each fare a little over four-tenths of a cent.

Suggestions for Visitors.

Chicago, aside from its importance as a great business center, has numerous attractions which make it the ideal vacation city, and its location on the shores of Lake Michigan justifies its recognition as the ideal summer resort. The Surface Lines offer the most convenient transportation in Chicago.

Here are a few suggestions to the visitor who desires to become acquainted with some of Chicago's attractions and for the general information of those who would like to have a more comprehensive idea of what to see and how to see it.

NEW MUNICIPAL PIER—Here is one of Chicago's newest and greatest wonders—a great recreation center and a steamboat landing extending 3,000 feet into the lake and costing about $5,000,000. Here one may enjoy the cooling breezes of Lake Michigan while getting an expansive view of the city's sky line. There are many attractions on the pier itself during the season, including observation towers, board walk, children's playground, open air and inclosed restaurants, public dining room for picnickers and immense freight and passenger boat terminals. No one should miss this trip. Take through route No. 1 car in Wabash avenue, State street car in State street, Broadway car in Dearborn or Randolph street, Clark street or through route No. 22 car in Clark street, or Lincoln avenue car in LaSalle street; ride north to Grand avenue and transfer east to the lake. Cars operate on the pier.

CLARENDON BATHING BEACH—This municipal enterprise is one of the newest attractions in Chicago. It is owned and operated by the city and should be visited by every one. Costly buildings beautify the premises. Ten thousand bathers can use the beach at one time, and even if one does not care to "take a dip" a pleasant afternoon can be spent here. Take through route No. 1 car in Wabash avenue or Broadway car in Dearborn or Randolph street, ride north to Sunnyside avenue and walk east to the lake.

CHICAGO'S GREAT ZOO—No collection of animals in the United States is more complete or interesting than the one in Lincoln park. Here are 1,700 specimens which are a continual source of delight to children and grownups alike. One cannot visit the "Zoo" too often. Take through route No. 1 car in Wabash avenue, Clark street or through route No. 22 car in Clark street, Broadway car in Dearborn or Randolph street, or Lincoln avenue car in LaSalle street, ride north to main entrance of Lincoln Park at Center street.

CHICAGO'S WONDERFUL PARKS.

DOUGLAS PARK—Has many attractions, such as athletic field, flower gardens, boating facilities and natatorium. Take Roosevelt road car in Dearborn or Adams street, or Ogden avenue car in State or Randolph street, ride west to park at Roosevelt road and California avenue.

GARFIELD PARK—Has many attractions, including flower gardens, boating facilities, public golf course, largest conservatory in the United States, several statues. Take Madison street car in Madison street to park entrance at Central Park avenue.

HUMBOLDT PARK—Offers facilities for boating and other recreation and has some attractive statues. Take Division street car in State or Washington street and ride west to park at terminus of line.

JACKSON PARK—One of Chicago's most beautiful spots, on part of which was located the World's Columbian Exposition in 1893. Here are splendid boating facilities, a bathing beach, two public golf courses, flower gardens, government life saving station and La Rabida sanitarium. Take Jackson park car or Stony Island-93d car in Wabash avenue to "Midway" at 59th street.

LINCOLN PARK—One of the city's most interesting attractions. See Zoo with 1,700 animals, Academy of Sciences, bathing beach and golf course near Diversey boulevard, conservatory, flower gardens, boating and other recreation facilities; also the world famous Saint Gaudens statue of Abraham Lincoln. Take through route No. 1 car in Wabash avenue, Clark street or through route No. 22 car in Clark street, Broadway car in Dearborn street or Lincoln avenue car in LaSalle street, ride north to main entrance of park at Center street.

WASHINGTON PARK—Offers facilities for boating and other recreation. Take Indiana-51st car in Wabash avenue and ride south to terminus at park, or take Cottage Grove car in Wabash avenue and ride south to 55th street entrance.

AMUSEMENT RESORTS.

RIVERVIEW PARK—A large amusement park with many attractions and space for picnicking purposes. Take Riverview-Larrabee car in Dearborn street and ride north to park at terminus of this line. Or take through route No. 2 car in Clark street or Clybourn avenue car in Wells street, ride north to terminus at Belmont avenue and walk north two blocks to gate.

AMUSEMENT RESORTS—Continued.

WHITE CITY—A large amusement park with many things to interest a visitor. Take Wentworth avenue or through route No. 2 or No. 22 car in Clark street, or take State street car in State street, ride south to 63d street and transfer east to park gate at South Park avenue. Or take Cottage Grove-71st or through route No. 4 or No. 5 in Wabash avenue, ride south to 63d street and transfer west to park gate at South Park avenue.

MADISON GARDENS—Those who enjoy roller skating can spend a very pleasant evening at Madison Gardens at the corner of Madison and Rockwell streets. There are special facilities for those who are learning, special instructors for ladies and children. An orchestra furnishes appropriate music. Take Madison street cars to the doors.

OTHER POINTS OF INTEREST.

ACADEMY OF SCIENCES—A noted museum of natural history having many interesting specimens. Open from 9 a. m. to 5 p. m. daily and 1 p. m. to 5 p. m. Sundays. Free. Take through route No. 1 car in Wabash avenue, or Clark street or through route No. 22 car in Clark street, or Broadway car in Dearborn street, or Lincoln avenue car in LaSalle street, ride north to Lincoln park entrance at Clark and Center streets.

CHICAGO HISTORICAL SOCIETY—Depository of valuable historical documents and relics of Chicago's early days. Open daily 9 a. m. to 5 p. m., except Saturday afternoons and Sundays. Free. Take State street car on State street, or through route No. 1 car on Wabash avenue, ride north to Ontario street and walk one block west. Or take Clark street or through route No. 22 car on Clark street, ride north to Ontario street and walk east one block to Dearborn.

FIELD MUSEUM—One of Chicago's "seven wonders" is this costly collection of natural history material gathered from the remotest corners of the world. Its original home in Jackson park was the Fine Arts building of the World's Columbian Exposition of 1893. A permanent building to house this great institution has been erected in Grant park at a cost of $4,000,000. The museum is open to visitors from 9 a. m. to 4 p. m. daily; free on Saturdays and Sundays.

CUBS' PARK—Home grounds of Chicago's National league team. Take Clark street or through route No. 22 car in Clark street and ride north to entrance at Addison street.

SOX PARK—Home grounds of Chicago's representative in the American Baseball league may be reached by taking Wentworth avenue or through route No. 2 or No. 22 car in Clark street. Ride south to 35th street and walk one block west to park entrance.

HAYMARKET SQUARE—This largest market for truck garden produce was the site of the anarchist riot in 1886. The activity of this place any weekday morning is worth watching. Take Ogden avenue car in State, Randolph or Lake street, and ride west to Desplaines street. Or take Madison street car west as far as Desplaines street and walk north two blocks to Randolph street. A stroll for several blocks west through the market will be interesting.

A Remarkable Record

THE CHICAGO ELEVATED RAILROADS have established a record for the safe transportation of passengers that stands without a parallel among transportation companies.

In 1916 the American Museum of Safety awarded the Chicago Elevated Railroads "Honorable Mention" for the work done in the way of accident prevention.

Nineteen committees working under the direction of a Safety Engineer and numbering 115 persons in the aggregate hold regular semi-monthly meetings to act on suggestions for the protection of the employes and the traveling public.

One hundred and twenty-five First Aid Stations are located along the elevated lines, so that minor injuries to employes may receive immediate attention.

First Aid teams, composed of employes who have received a course in medical training, are organized on each road to apply first aid methods in case of accident.

Safety first and always is the watchword of the Elevated management. Civic pride alone, aside from individual interest, should induce Elevated patrons to co-operate with the management in the prevention of accidents.

HOMES IN CHICAGO AND THEIR OWNERSHIP.

According to the federal census bureau, the number of homes in Chicago, as enumerated in January, 1920, was 623,910, of which 165,866, or 26.6 per cent, were owned by the occupants, and 447,405, or 71.7 per cent, were rented; for the remaining 10,639 the facts as to tenure were not reported. Of the owned homes, 58,382, or 35.2 per cent, were free from incumbrance and 102,719, or 61.9 per cent, were mortgaged; for the remaining 4,765 no information as to mortgage indebtedness was secured.

The bureau of the census secured reports regarding the value of the home, the amount of the incumbrance, and the rate of interest from 76,573, or 74.5 per cent, of the 102,719 mortgaged homes enumerated in the census. The average market value of the mortgaged homes was $6,460, and the average mortgage was $2,734. Assuming that the average value and the average mortgage debt for the homes not reporting was the same as for those for which reports were secured, the total market value of all mortgaged homes in Chicago was estimated at $664,000,000 and the total mortgage debt at $281,000,000.

The prevailing rate of interest was 6 per cent, this being the rate reported for 83.9 per cent of the total number of homes reported as mortgaged and 81.6 per cent of the total amount of mortgage indebtedness. Five and one-half per cent was the rate on 9.6 per cent of the total number and 5 per cent was the rate on 3.1 per cent of the total number of mortgaged homes reporting. From 5 per cent to and including 7 per cent formed 98.7 per cent of the number of homes reporting the rate of incumbrance on their mortgage debt. For the remaining indebtedness other rates were reported, ranging from less than 5 per cent to more than 8 per cent. The average rate on all mortgages was 5.9 per cent.

Of the 76,573 mortgaged homes concerning which information was secured 5,099, or 6.7 per cent, were valued at less than $2,500; 30,127, or 39.3 per cent, at $2,500 to $5,000; 22,100, or 28.9 per cent, at $5,000 to $7,500; 9,444, or 12.3 per cent, at $7,500 to $10,000; 5,721, or 7.5 per cent, at $10,000 to $15,000; and 4,082, or 5.3 per cent, at $15,000 and over. Of the latter number 1,308, or 1.7 per cent, were valued at $25,000 and over.

As a rule, the greater the value of the home, the smaller the proportion which the incumbrance represents of the total market value, this proportion ranging from 38.8 per cent for homes valued at $15,000 to $20,000 each to 50.2 per cent for those valued at less than $2,500. On homes valued at amounts of more than $25,000 the incumbrance amounted to $22,466,190, forming 41.9 per cent of the market value on January 1, 1920.

SCHOOL ATTENDANCE IN ILLINOIS.

According to the census of 1920 there are 860,832 children 7 to 13 years of age in the state of Illinois and of this number 815,080, or 94.7 per cent, were reported as attending school. In 1910 the percentage attending school was 92.5, thus indicating an improvement as regards school attendance between 1910 and 1920. Of the children 14 and 15 years of age in 1920, 79.0 per cent were attending school and of those 16 and 17 years of age, 37.1 per cent.

SOME REASONS WHY YOU SHOULD

REGISTER YOUR PROPERTY

UNDER THE

TORRENS SYSTEM

By JOSEPH F. HAAS, Registrar of Titles of Cook County

What is the Torrens System in Cook County? It is a system of registering the title of land, with a guarantee by the people of Cook County that the title as registered is correct.

It is the modern, up-to-date method of holding and transferring title to real estate.

BECAUSE

1. Cook County guarantees each Torrens title with three billion dollars of taxable assets.
2. The Indemnity Fund of over fifty thousand dollars insures the immediate cash payment of any damages sustained.
3. Protection is given owners against judgments rendered against people of the same or similar name.
4. Special protection is afforded against tax sales and tax deeds.
5. Owners are protected against fraudulent signatures on deeds or other instruments.
6. Adverse possession does not run against land registered under the Torrens System.
7. A Torrens Certificate of Title is conclusive evidence of good and valid title.
8. Defects in title are wiped out forever by initial registration.
9. Transfers may be made in one-third the time required under other systems.
10. The transfer fee is only $3.00 no matter what the value may be of the property transferred.
11. The Circuit Court of Cook County retains a continuing jurisdiction for the purpose of protecting the title to Torrens property.
12. No statute of limitations runs against the guarantee of a Torrens Certificate.

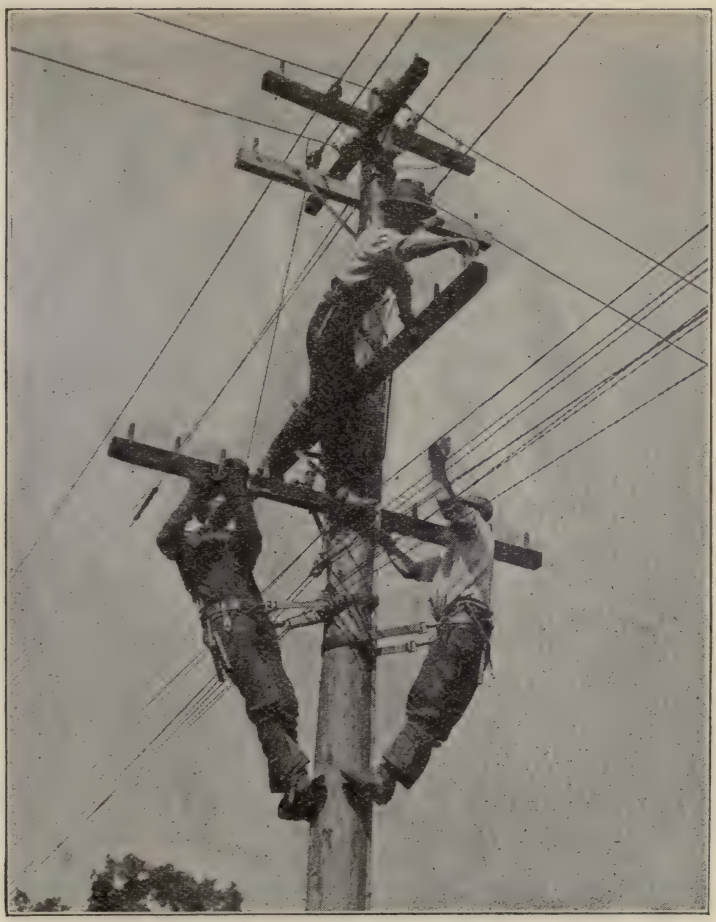
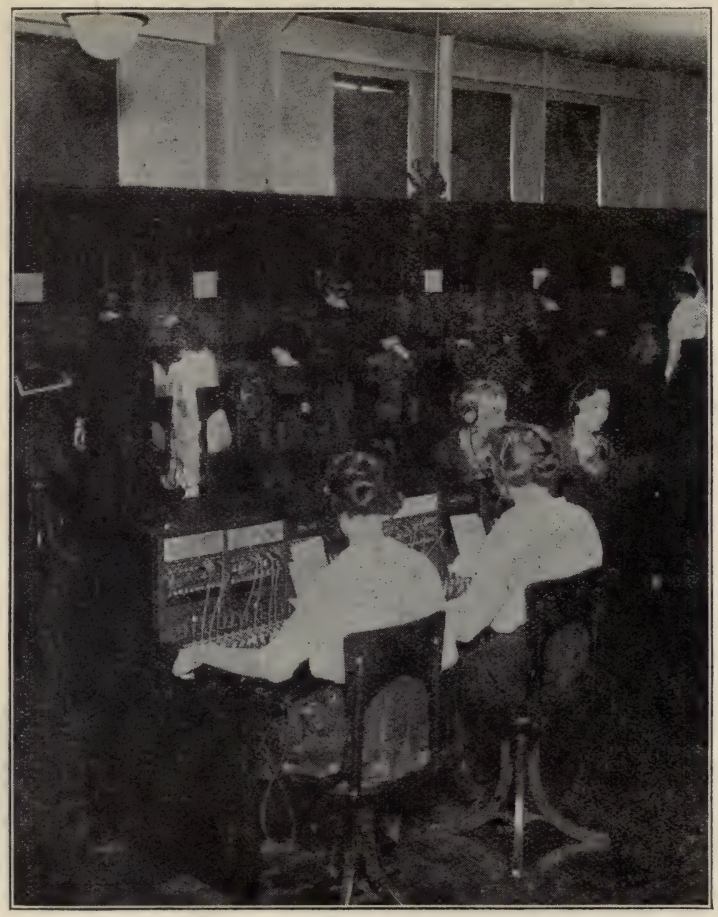
A very large part of the business telephone service in Chicago is handled through private branch exchanges, installed and maintained by the telephone company and operated by the subscribers. This service affords intercommunication between various departments of a store, factory, hospital, hotel or other place of business as well as local and long distance connections outside.

ILLINOIS BELL TELEPHONE COMPANY



In all seasons and all weather Bell telephone men are busy constructing new lines and maintaining, in the best operating condition, those already erected. This is an essential and invariable feature of Bell telephone service.

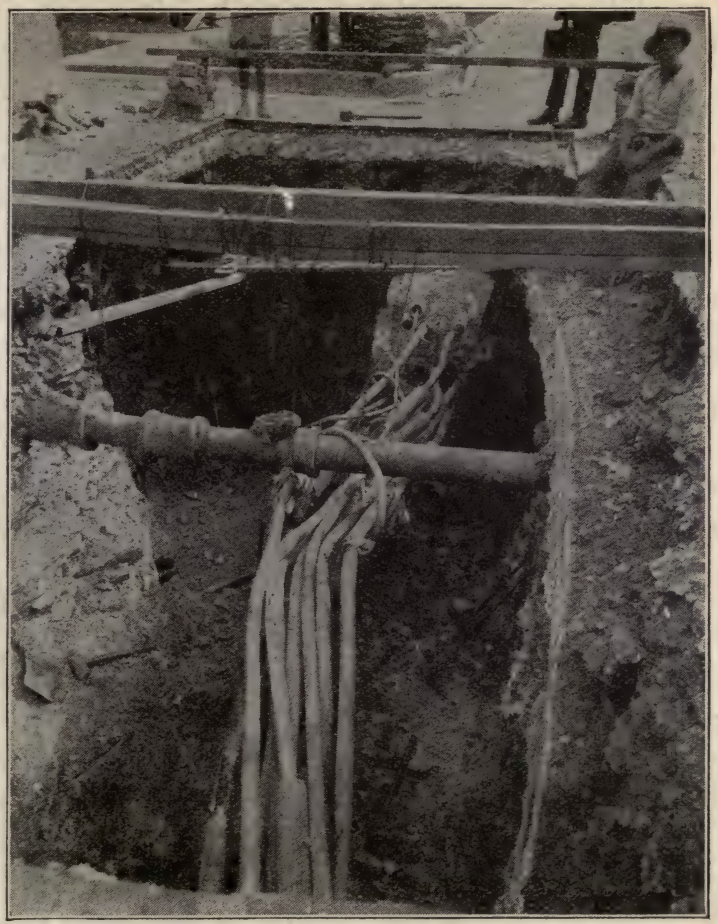
ILLINOIS BELL TELEPHONE COMPANY



Telephone operators are given thorough instruction before they begin at the switchboards. The above shows a section of the Operators' Training Department where several thousand young women learn telephone operating every year.

The boards shown are practice boards. They do not serve subscribers.

ILLINOIS BELL TELEPHONE COMPANY



Telephone service must go on regardless of street improvements. This picture shows temporary suspension of cables while a street is torn up. These cables contain several thousand pairs of wires, none of which are out of service at any time during the progress of work of this kind.

LOOK UNDER THE LID!

Tunnel Your Goods and Save Money!

Look under the lid of Chicago's Loop—"the busiest square mile in the world"—and see what is going on forty feet below. The business traffic of the city is not all on the surface.

Busy Beavers

A veritable army of busy beavers are at work down under the Loop's lid—and many of them work both day and night. In the form of steel freight cars they are busily plowing their way over the 60-mile network of tunnel tracks constituting the transportation facilities of the

Chicago Tunnel Company

Quietly, efficiently, rapidly and safely these tireless carriers haul 1,400 tons or more of freight daily from the freight terminals of the railroads to the city's warehouses and office buildings. They will carry for a customer a single package or a car load or a whole train load. They carry as willingly a lady's hat as a ton of coal. And they help to beautify the city by being the silent arteries through which flows the debris of razed buildings, excavations and other unsightly impedimenta.

There are four Public Receiving Stations all conveniently reached from the Loop, and there are hundreds of connecting stations within the Loop itself.

This system for freight traffic keeps 6,000 or more trucks off the already congested Loop streets during every business day.

Save Time—Save Money

This method of transportation is a saving to the shipper, for the railroads literally "pay the freight." Save your money and your time. Tunnel your goods and pull down your overhead.

OUTDOOR ADVERTISING is the one medium of publicity that has absolutely universal circulation. It reaches those who ride and those who walk; those who read, and those who do not; all creeds, all races, all classes.

It is used to convey a national advertiser's message to every nook and corner of the entire country; and it is used to concentrate the message of a local advertiser on the exact trading territory where his prospects are located.

We shall gladly submit to any interested business man a built-to-measure plan for using
